

Figure 4.2

LEGEND

LAND SUITED TO ARABLE CROPPING

LAND CAPABLE OF PRODUCING A MODERATE RANGE OF CROPS

Land capable of average production but high yields of barley, oats and grass are often obtained.

LAND CAPABLE OF PRODUCING A NARROW RANGE OF CROPS

Land suited to rotations, yields of grass are high but difficulties of utilisation and conservation may be encountered.

Land is primarily grassland with limited potential for other crops, grass yields can be high but difficulties of conservation or utilisation may be severe.

LAND SUITED ONLY TO IMPROVED GRASSLAND AND ROUGH GRAZINGS

LAND CAPABLE OF USE AS IMPROVED GRASSLAND

Establishment of a grass sward and its maintenance present few problems and potential yields are high with ample growth throughout the season.

Sward establishment presents no difficulties but moderate or low trafficability, patterned land and / or strong slopes cause maintenance problems.
