

To whom it may concern,

Re: Transport Scotland

Consultative paper 2014

1) Please excuse handwriting but unfortunately I have recently injured my right arm. This would have been less of a problem if your on-line document had been readily accessible which it was not.

2) This "consultation" has been a fairly well kept secret - not a lot of publicity about it which limits its worth, credibility & impact.

3) Why is this being proposed?

4) St Andrews is a tourist attraction, University town & has a fairly elderly resident population. We are already disadvantaged by having to take some form of transport to & from Leuchars Station. This proposal will make the transport system even less accessible! The Scottish Government

claims to support use of public transport but if this proposal comes to fruition I for one will use my car more often.

5) The proposal does not take into account connection times/problems/delays as well as people having to handle their own baggage.

I do hope that you will take into account the negative comments of the few who will have been made aware of this consultation.

Yours sincerely

M W Brown M.A.
