Consultation Questions

The answer boxes will expand as you type.

Procuring rail passenger services

1. What are the merits of offering the ScotRail franchise as a dual focus franchise and what services should be covered by the economic rail element, and what by the social rail element?

Q1 comments: No view

2. What should be the length of the contract for future franchises, and what factors lead you to this view?

Q2 comments: No view

3. What risk support mechanism should be reflected within the franchise?

Q3 comments: No view

4. What, if any, profit share mechanism should apply within the franchise?

Q4 comments: No view

5. Under what terms should third parties be involved in the operation of passenger rail services?

Q5 comments: No view

6. What is the best way to structure and incentivise the achievement of outcome measures whilst ensuring value for money?

Q6 comments: Not competent to answer

7. What level of performance bond and/or parent company guarantees are appropriate?

Q7 comments: No view

8. What sanctions should be used to ensure the franchisee fulfils its franchise commitments?

Q8 comments: Not competent to answer

Achieving reliability, performance and service quality

9. Under the franchise, should we incentivise good performance or only penalise poor performance?

Q9 comments: Incentivise good performance

10. Should the performance regime be aligned with actual routes or service groups, or should there be one system for the whole of Scotland?

Q10 comments: Actual routes

11. How can we make the performance regime more aligned with passenger issues?

Q11 comments: Good communication on trains

12. What should the balance be between journey times and performance?

Q12 comments: Depends on the journey length and frequency of service

13. Is a Service Quality Incentive Regime required? And if so should it cover all aspects of stations and service delivery, or just those being managed through the franchise?

Q13 comments: No view

14. What other mechanisms could be used for assessing train and station quality?

Q14 comments: Not competent to comment

Scottish train services

15. Can better use be made of existing train capacity, such as increasing the permitted standing time beyond the limit of 10 minutes or increasing the capacity limit? What is an acceptable limit for standing times on rail services?

Q15 comments: Around 10 minutes

16. Should the number of services making use of interchange stations (both rail to rail and rail to other modes) be increased to reduce the number of direct services? What would be the opportunities and challenges of this?

Q16 comments: Not competent to comment

17. Should Government direct aspects of service provision such as frequency and journey time, or would these be better determined by the franchisee based on customer demand?

Q17 comments: Customer demand and road congestion should be the deciding factors irrespective of who decides

18. What level of contract specification should we use the for the next ScotRail franchise?

Q18 comments: Not competent to comment

19. How should the contract incentivise the franchisee to be innovative in the provision of services?

Q19 comments: No view

Scottish rail fares

20. What should be the rationale for, and purpose of, our fares policy?

Q20 comments: To encourage train use

21. What fares should be regulated by government and what should be set on a commercial basis? Do your recommendations change by geographic area (the Strathclyde area example), or by type of journey (for example suburban or intercity)?

Q21 comments: Those which reduce road congestion and provide lifeline services in rural areas should be regulated

22. How should we achieve a balance between the taxpayer subsidy and passenger revenue contributions in funding the Scottish rail network? At what rate should fares be increased, and how feasible would it be to apply higher increases to Sections of the network which have recently been enhanced?

Q22 comments: Not competent to comment

23. What should the difference be between peak and off-peak fares? Will this help encourage people to switch to travelling in the off-peak?

Q23 comments: Not competent to comment on the level of difference but feel intuitively they are different markets not readily interchangeable

Scottish stations

24. How should we determine what rail stations are required and where, including whether a station should be closed?

Q24 comments: Where there has been a longstanding ambition by a local community and housing/other development is taking place survey should be carried out amongst residents. Road congestion MUST be considered and parking provision MUST be offered. Obvious candidate currently Allander Rail Halt required to ease local road congestion and provide parking facilities, given recently approved development for several hundred additional houses near Milngavie town. This is a once in a generation chance to transform local services which no bus service can hope to emulate. No stations should be considered for closure

25. What are the merits or issues that arise from a third party (such as a local authority or local business) being able to propose, promote and fund a station or service?

Q25 comments: Obvious merits for local champions of all types including land availability for parking, planning gains in developments, raising profile of proposals, surveys, Local Development Plans, and innovative solutions joining together different transport modes.

26. Should only one organisation be responsible for the management and maintenance of stations? If this was the franchisee how should that responsibility be structured in terms of leasing, investment, and issues relating to residual capital value?

Q26 comments: Not competent to comment

27. How can local communities be encouraged to support their local station?

Q27 comments: By Local Authorities and others making stations easy to access and use. Parking and Park and Ride essential as well as access by bus services which may need to be dedicated in rural areas.

28. What categories of station should be designated and what facilities should be available at each category of station?

Q28 comments: No view

Cross-border services

29. Should cross-border services continue to go north of Edinburgh? In operating alongside ScotRail services, how do cross-border services benefit passengers and taxpayers? And who should specify these services, the Department of Transport or the Scottish Ministers?

Q29 comments: Yes; Scottish Ministers

30. Or should the cross-border services terminate at Edinburgh Waverley, allowing opportunities for Scottish connections? And if so, what additional benefits would accrue from having an Edinburgh Hub?

Q30 comments: No

Rolling stock

31. What alternative strategies or mechanisms could be used to reduce the cost of the provision of rolling stock?

Q31 comments: Not competent to comment

32. What facilities should be present on a train and to what extent should these facilities vary according to the route served?

Q32 comments: Longer journeys require extra facilities

Passengers – information, security and services

33. How should we prioritise investment for mobile phone provision and / or Wi-Fi type high-bandwidth services?

Q33 comments: No view

34. How should we balance the need for additional seating capacity and retain the flexibility of a franchisee to offer first-class services if commercially viable?

Q34 comments: No view

35. What issues and evidence should be considered prior to determining whether or not to ban the consumption of alcohol on trains?

Q35 comments: Not competent to comment

36. How can the provision of travel information for passengers be further improved?

Q36 comments: On train updates that work

Caledonian Sleeper

37. Should we continue to specify sleeper services, or should this be a purely commercial matter for a train operating company?

Q37 comments: Continue

38. Should the Caledonian Sleeper services be contracted for separately from the main ScotRail franchise? Or should it be an option for within the main ScotRail franchise?

Q38 comments: No view

- 39. We would be interested in your views in the level and type of service that the Caledonian Sleeper Services should provide. Including:
 - What is the appeal of the Caledonian Sleeper Service, and if there
 were more early and late trains would the appeal of the sleeper
 services change?
 - What is the value of sleeper services to Fort William, Inverness and Aberdeen and are these the correct destinations, for example would Oban provide better connectivity?
 - What facilities should the sleeper services provide and would you pay more for better facilities?

Q39 comments: Not competent to comment

Environmental issues

40. What environmental key performance indicators should we consider for inclusion in the franchise agreement or the High Level Output Specification?

Q40 comments: Not competent to comment
