Consultation Questions

The answer boxes will expand as you type.

Procuring rail passenger services

1. What are the merits of offering the ScotRail franchise as a dual focus franchise and what services should be covered by the economic rail element, and what by the social rail element?

Q1 comments: High intensity rail services in the central belt and the suburban routes into and out of Glasgow and Edinburgh could be covered by the economic rail element, whilst the rest should be covered by social rail element.

2. What should be the length of the contract for future franchises, and what factors lead you to this view?

Q2 comments: Much longer contract to allow for it to be worth the franchise holder's effort and money to improve services and rolling stock.

3. What risk support mechanism should be reflected within the franchise?

Q3 comments: n/a

4. What, if any, profit share mechanism should apply within the franchise?

Q4 comments: None

5. Under what terms should third parties be involved in the operation of passenger rail services?

Q5 comments: N/A

6. What is the best way to structure and incentivise the achievement of outcome measures whilst ensuring value for money?

Q6 comments: N/A

7. What level of performance bond and/or parent company guarantees are appropriate?

Q7 comments: N/A

8. What sanctions should be used to ensure the franchisee fulfils its franchise commitments?

Q8 comments: Financial penalties, the ability to terminate the franchise early.

Achieving reliability, performance and service quality

9. Under the franchise, should we incentivise good performance or only penalise poor performance?

Q9 comments: Both

10. Should the performance regime be aligned with actual routes or service groups, or should there be one system for the whole of Scotland?

Q10 comments: One system for the whole of Scotland

11. How can we make the performance regime more aligned with passenger issues?

Q11 comments: N/A

12. What should the balance be between journey times and performance?

Q12 comments: N/A

13. Is a Service Quality Incentive Regime required? And if so should it cover all aspects of stations and service delivery, or just those being managed through the franchise?

Q13 comments: All aspects of stations and service delivery

14. What other mechanisms could be used for assessing train and station quality?

Q14 comments: Cleanliness. Ease of ridership (inspectors carrying out inspections in a 'real life' scenario e.g. carrying luggage etc...)

Scottish train services

15. Can better use be made of existing train capacity, such as increasing the permitted standing time beyond the limit of 10 minutes or increasing the capacity limit? What is an acceptable limit for standing times on rail services?

Q15 comments: Up to 30 minutes.

16. Should the number of services making use of interchange stations (both rail to rail and rail to other modes) be increased to reduce the number of direct services? What would be the opportunities and challenges of this?

Q16 comments: No. Whilst changing trains when travelling short distance merely adds time to the journey, when one is travelling with heavy luggage, as I do, from London to north of Edinburgh, it becomes very difficult. I would probably not use the rail service if I was required to change at Edinburgh.

17. Should Government direct aspects of service provision such as frequency and journey time, or would these be better determined by the franchisee based on customer demand?

Q17 comments: Better determined by the franchisee based on customer demand.

18. What level of contract specification should we use for the next ScotRail franchise?

Q18 comments: N/A

19. How should the contract incentivise the franchisee to be innovative in the provision of services?

Q19 comments: Long length of contract / subsidies to encourage innovation?

Scottish rail fares

20. What should be the rationale for, and purpose of, our fares policy?

Q20 comments: To make those who can pay the fare pay it, those who cannot should have discounted fares e.g. Off-Peak trains should be much cheaper than Peak trains.

21. What fares should be regulated by government and what should be set on a commercial basis? Do your recommendations change by geographic area (the Strathclyde area example), or by type of journey (for example suburban or intercity)?

Q21 comments: Suburban should be regulated.

22. How should we achieve a balance between the taxpayer subsidy and passenger revenue contributions in funding the Scottish rail network? At what rate should fares be increased, and how feasible would it be to apply higher increases to Sections of the network which have recently been enhanced?

Q22 comments: N/A

23. What should the difference be between peak and off-peak fares? Will this help encourage people to switch to travelling in the off-peak?

Q23 comments: Substantial difference. For those who can be flexible, they will choose the cheaper fares, thus encouraging people to switch to off-peak.

Scottish stations

24. How should we determine what rail stations are required and where, including whether a station should be closed?

Q24 comments: Passenger numbers and the social cost to shutting the station (e.g. other public transportation provisions).

25. What are the merits or issues that arise from a third party (such as a local authority or local business) being able to propose, promote and fund a station or service?

Q25 comments: Should be actively encouraged.

26. Should only one organisation be responsible for the management and maintenance of stations? If this was the franchisee how should that responsibility be structured in terms of leasing, investment, and issues relating to residual capital value?

Q26 comments: Franchisee should manage and maintain the stations. Encouragement to invest.

27. How can local communities be encouraged to support their local station?

Q27 comments: Charities.

28. What categories of station should be designated and what facilities should be available at each category of station?

Q28 comments: N/A

Cross-border services

29. Should cross-border services continue to go north of Edinburgh? In operating alongside ScotRail services, how do cross-border services benefit passengers and taxpayers? And who should specify these services, the Department of Transport or the Scottish Ministers?

Q29 comments: Yes. They benefit the passenger because many people travelling cross-border and north of Edinburgh do so with heavy luggage and by having to change at Edinburgh it may create issues of people getting onto ScotRail services with large amounts of baggage. I regularly use the cross-border service purely because I am able to get off at my local station – if this was no longer the case then I would, along with many others, fly to Edinburgh. Should be the responsibility of the Department of Transport.

30. Or should the cross-border services terminate at Edinburgh Waverley, allowing opportunities for Scottish connections? And if so, what additional benefits would accrue from having an Edinburgh Hub?

Q30 comments: No, the cross-border services should not terminate at Waverley.

Rolling stock

31. What alternative strategies or mechanisms could be used to reduce the cost of the provision of rolling stock?

Q31 comments: N/A

32. What facilities should be present on a train and to what extent should these facilities vary according to the route served?

Q32 comments: Maintenance of current facilities, except with greater space to store luggage (a luggage van / compartment for example).

Passengers – information, security and services

33. How should we prioritise investment for mobile phone provision and / or Wi-Fi type high-bandwidth services?

Q33 comments: N/A

34. How should we balance the need for additional seating capacity and retain the flexibility of a franchisee to offer first-class services if commercially viable?

Q34 comments: Leave the decision to the franchisee.

35. What issues and evidence should be considered prior to determining whether or not to ban the consumption of alcohol on trains?

Q35 comments: Inspection of all services, especially around the cities prior to football and rugby matches.

36. How can the provision of travel information for passengers be further improved?

Q36 comments: Greater communication between the guard and central control.

Caledonian Sleeper

37. Should we continue to specify sleeper services, or should this be a purely commercial matter for a train operating company?

Q37 comments: N/A

38. Should the Caledonian Sleeper services be contracted for separately from the main ScotRail franchise? Or should it be an option for within the main ScotRail franchise?

Q38 comments: It should be a separate franchise.

39. We would be interested in your views in the level and type of service that the Caledonian Sleeper Services should provide. Including:

- What is the appeal of the Caledonian Sleeper Service, and if there were more early and late trains would the appeal of the sleeper services change?
- What is the value of sleeper services to Fort William, Inverness and Aberdeen and are these the correct destinations, for example would Oban provide better connectivity?
- What facilities should the sleeper services provide and would you pay more for better facilities?

Q39 comments: N/A

Environmental issues

40. What environmental key performance indicators should we consider for inclusion in the franchise agreement or the High Level Output Specification?

Q40 comments: N/A
