

## Respondent Information Form and Questions

Please Note this form **must** be returned with your response to ensure that we handle your response appropriately

### 1. Name/Organisation

Organisation Name

Title Mr ☐ Ms ☐ Mrs ☐ Miss ☐ Dr ☐ *Please tick as appropriate*

Surname

Forename

### 2. Postal Address

9, Castle Street		
Brechtin		
Angus		
PostcodDD9	Phone 01356	Email

### 3. Permissions - I am responding as...

Individual / Group/Organisation

☒

*Please tick as appropriate*

☐

- (a) Do you agree to your response being made available to the public (in Scottish Government library and/or on the Scottish Government web site)?

*Please tick as appropriate* ☒ Yes ☐

- (b) Where confidentiality is not requested, we will make your responses available to the public on the following basis

*Please tick ONE of the following boxes*

Yes, make my response, name and address all available ☒

or

Yes, make my response available, but not my name and address ☐

or

Yes, make my response and name available, but not my address ☐

- (c) The name and address of your organisation **will be** made available to the public (in the Scottish Government library and/or on the Scottish Government web site).

Are you content for your **response** to be made available?

*Please tick as appropriate* ☐ Yes ☐ No

- (d) We will share your response internally with other Scottish Government policy teams who may be addressing the issues you discuss. They may wish to contact you again in the future, but we require your permission to do so. Are you content for Scottish Government to contact you again in relation to this consultation exercise?

*Please tick as appropriate*

☒ Yes

☐ No

## Consultation Questions

The answer boxes will expand as you type.

### Procuring rail passenger services

1. What are the merits of offering the ScotRail franchise as a dual focus franchise and what services should be covered by the economic rail element, and what by the social rail element?

Q1 comments:

2. What should be the length of the contract for future franchises, and what factors lead you to this view?

Q2 comments:

3. What risk support mechanism should be reflected within the franchise?

Q3 comments:

4. What, if any, profit share mechanism should apply within the franchise?

Q4 comments:

5. Under what terms should third parties be involved in the operation of passenger rail services?

Q5 comments:

6. What is the best way to structure and incentivise the achievement of outcome measures whilst ensuring value for money?

Q6 comments:

7. What level of performance bond and/or parent company guarantees are appropriate?

Q7 comments:

8. What sanctions should be used to ensure the franchisee fulfils its franchise commitments?

Q8 comments: Railway services in Scotland should be operated as a public service by the Scottish Government and legislation should be amended to

permit this to happen.

### **Achieving reliability, performance and service quality**

9. Under the franchise, should we incentivise good performance or only penalise poor performance?

Q9 comments:

10. Should the performance regime be aligned with actual routes or service groups, or should there be one system for the whole of Scotland?

Q10 comments:

11. How can we make the performance regime more aligned with passenger issues?

Q11 comments:

12. What should the balance be between journey times and performance?

Q12 comments:

13. Is a Service Quality Incentive Regime required? And if so should it cover all aspects of stations and service delivery, or just those being managed through the franchise?

Q13 comments:

14. What other mechanisms could be used for assessing train and station quality?

Q14 comments:

### **Scottish train services**

15. Can better use be made of existing train capacity, such as increasing the permitted standing time beyond the limit of 10 minutes or increasing the capacity limit? What is an acceptable limit for standing times on rail services?

Q15 comments: Permitted standing time should not be increased. The need is for better quality rolling stock and more frequent services.

16. Should the number of services making use of interchange stations (both rail to rail and rail to other modes) be increased to reduce the number of direct services? What would be the opportunities and challenges of this?

Q16 comments:

17. Should Government direct aspects of service provision such as frequency and journey time, or would these be better determined by the franchisee based on customer demand?

Q17 comments:

18. What level of contract specification should we use for the next ScotRail franchise?

Q18 comments: As above – there should be no further franchise.

19. How should the contract incentivise the franchisee to be innovative in the provision of services?

Q19 comments: Carry rail services out as a public service and be responsive to the democratic process.

### **Scottish rail fares**

20. What should be the rationale for, and purpose of, our fares policy?

Q20 comments: Concern for environmental impact (and reducing the number of journeys made by air and road) should be a component of fares policy

21. What fares should be regulated by government and what should be set on a commercial basis? Do your recommendations change by geographic area (the Strathclyde area example), or by type of journey (for example suburban or intercity)?

Q21 comments:

22. How should we achieve a balance between the taxpayer subsidy and passenger revenue contributions in funding the Scottish rail network? At what rate should fares be increased, and how feasible would it be to apply higher increases to Sections of the network which have recently been enhanced?

Q22 comments:

23. What should the difference be between peak and off-peak fares? Will this help encourage people to switch to travelling in the off-peak?

Q23 comments:

## Scottish stations

24. How should we determine what rail stations are required and where, including whether a station should be closed?

Q24 comments: Adequate services need to be provided for demand to be effectively assessed. In Angus and Dundee, Monifieth, Broughty Ferry and Invergowrie are underserved.

25. What are the merits or issues that arise from a third party (such as a local authority or local business) being able to propose, promote and fund a station or service?

Q25 comments:

26. Should only one organisation be responsible for the management and maintenance of stations? If this was the franchisee how should that responsibility be structured in terms of leasing, investment, and issues relating to residual capital value?

Q26 comments:

27. How can local communities be encouraged to support their local station?

Q27 comments: By Scotrail being publicly owned.

28. What categories of station should be designated and what facilities should be available at each category of station?

Q28 comments:

## Cross-border services

29. Should cross-border services continue to go north of Edinburgh? In operating alongside ScotRail services, how do cross-border services benefit passengers and taxpayers? And who should specify these services, the Department of Transport or the Scottish Ministers?

Q29 comments: It is essential that cross border services continue to go north of Edinburgh. Passengers benefit by not having to change trains. If the change is at Edinburgh Waverley then with the shortage of porters, conveying luggage for older passengers is a real disincentive. Having to make connections risks missing the connection if the train is delayed. Through services are faster. If the government as part of its concern about climate change wishes to reduce air travel and road travel (especially now that HS2 has been approved), through trains not only to London and Birmingham but also to Europe should be the aim. East Coast provide much better quality rolling stock than Scotrail. The line from Edinburgh to Aberdeen should be

electrified.

30. Or should the cross-border services terminate at Edinburgh Waverley, allowing opportunities for Scottish connections? And if so, what additional benefits would accrue from having an Edinburgh Hub?

Q30 comments: No and none! [apart from Scotrail having even more crowded trains and gaining a windfall bonus]

### **Rolling stock**

31. What alternative strategies or mechanisms could be used to reduce the cost of the provision of rolling stock?

Q31 comments: The rolling stock is too cheap.

32. What facilities should be present on a train and to what extent should these facilities vary according to the route served?

Q32 comments: Adequate toilets and sufficient comfortable seating should be available on all routes.

### **Passengers – information, security and services**

33. How should we prioritise investment for mobile phone provision and / or Wi-Fi type high-bandwidth services?

Q33 comments:

34. How should we balance the need for additional seating capacity and retain the flexibility of a franchisee to offer first-class services if commercially viable?

Q34 comments:

35. What issues and evidence should be considered prior to determining whether or not to ban the consumption of alcohol on trains?

Q35 comments:

36. How can the provision of travel information for passengers be further improved?

Q36 comments:

### **Caledonian Sleeper**

37. Should we continue to specify sleeper services, or should this be a purely commercial matter for a train operating company?

Q37 comments: Caledonian sleeper services should continue to be specified.

38. Should the Caledonian Sleeper services be contracted for separately from the main ScotRail franchise? Or should it be an option for within the main ScotRail franchise?

Q38 comments: Not bothered as long as it continues to operate.

39. We would be interested in your views in the level and type of service that the Caledonian Sleeper Services should provide. Including:

- What is the appeal of the Caledonian Sleeper Service, and if there were more early and late trains would the appeal of the sleeper services change?
- What is the value of sleeper services to Fort William, Inverness and Aberdeen and are these the correct destinations, for example would Oban provide better connectivity?
- What facilities should the sleeper services provide and would you pay more for better facilities?

Q39 comments: It avoids flying to arrive in London from Aberdeen at a reasonable hour in the morning for meetings.

It gives unhurried time to prepare, and the buffet car has a good ambience.

On the east coast, Aberdeen is clearly the obvious destination and provides a good alternative to flying.

It is impossible to envisage timings for day trains that would be effective alternatives to the sleeper.

Pricing needs to be competitive with airlines but if air fares were increased (eg by a higher airport duty or by introducing tax on aviation fuel) then sleeper fares could also be increased.

At present the facilities are OK (although I lament the loss of a bit more to eat at breakfast in second class). I would not wish to pay more. Perhaps the business end of the first class might like a more luxurious en suite option.

## **Environmental issues**

40. What environmental key performance indicators should we consider for inclusion in the franchise agreement or the High Level Output Specification?

Q40 comments: The consultation is woefully short on integrating the wider

environmental concerns of the Scottish government on climate change with its policy on the development of rail transport.
