

Nanette Mutrie

I write to oppose all planned closures for the Maryhill line or reductions in service. I moved to this area because of Maryhill station. Closing this station will mean that many people, including me, will use their car now for journeys into town. This would have an impact on the environment, congestion and personal health since the walk to the train station is removed. These plans make no sense since this line was recently re-opened and the line is used very well especially at peak and school hours.
