

15. Full List of Noise Predictions at Sensitive Receptors

Appendix 15 Full List of Noise Predictions at Sensitive Receptors

The following table presents a list of all the receptors in the study area and some which are between 600m and 1km of the scheme (note to show >600m in the Address column). The number of properties assigned to each receptor point is given in brackets after the address.

Property addresses have been taken from the address layer in the OS Mastermap data which did not include every property name or house number. Where the address is unknown a description is given to try to indicate the location of the property.

ID	Address (No. of Props)	Floor	Predicted Noise Level dB L _{A10,18h}				Opening Year Impacts	Design Year Impacts
			Open Do Min	Open Do Some	Design Do Min	Design Do Some
