|               | <p>1.19.2.3 The injected crack shall be left undisturbed for a period of at least 24 hours to allow the resin to harden.</p> <p>1.19.2.4 When the resins are sufficiently cured the cracks and resin spillages shall be cleaned to the face of the concrete.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>1776AR</b> | <p><b>1 Foamed Concrete Fill to Structures and Backfilling to Drainage Trenches</b></p> <p>1.1 Foamed concrete fill to arches or bridge decks shall be of density 1400 – 1600 kilograms per cubic metre. Minimum cement content shall be 350 kilograms per cubic metre. The maximum free water cement ratio shall be 0.4. The minimum compressive strength shall be eight newtons per square millimetre.</p> <p>1.2 Foamed concrete fill to drainage trenches shall comply with sub-Clause 1 above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>1777AR</b> | <p><b>1 Installation of Resin Anchored Reinforcement</b></p> <p>1.1 General</p> <p>1.1.1 Installation of resin anchored reinforcement into existing reinforced concrete shall utilise proprietary products, materials and methods suitable for highway works and for the conditions set out below.</p> <p>1.1.2 The Company shall consult and comply with the requirements of Transport Scotland with regard to all resin anchor systems. The Company shall provide the Contracting Authority with completed Consultation Certificates in accordance with Part 5 of the New Works Requirements in respect of this requirement.</p> <p>1.1.3 The resin anchor system proposed shall be checked against the anchorage design to ensure that it is capable of resisting the design loads by means of testing. For the purposes of testing the test loading shall be the load calculated allowing for a 30 per cent increase above ULS design load and adjusted to allow group effects to be ignored.</p> <p>1.1.4 Site testing to verify the above loads is required and is specified in sub-Clause 1.2 below.</p> <p>1.1.5 <b>Materials</b></p> <p>1.1.5.1 Resin adhesive grout for anchoring reinforcement shall be polyester or epoxy based and non-expansive. Grout shall be stable over the temperature range of –20 degrees Celsius to +40 degrees Celsius and be resistant to mechanical and chemical degradation under normal service conditions.</p> <p>1.1.6 <b>Workmanship</b></p> <p>1.1.6.1 Installation shall strictly follow the methods and working procedures specified by the proprietary product manufacturer. Adequate preparations shall be made to work involving resin grouting to avoid inconsistent results.</p> <p>1.1.6.2 Locations for the drilling of holes shall be determined by the design of the New Works. The design of the New Works shall ensure that</p> |

Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>locations can be adjusted within tolerances specified in the design of the New Works to avoid existing reinforcement. It shall be ensured that holes do not clash with existing buried reinforcement by using non-destructive test methods (e.g. cover meter) prior to commencement of drilling.</p> <p>1.1.6.3 Before and after drilling holes it shall be ensured that the existing concrete is sound, and that any significant defects such as loose fractures and voids are repaired. Any defective holes shall be repaired and not used. Alternative holes shall be re-drilled in new locations without affecting the design of the New Works.</p> <p>1.1.6.4 Holes shall be formed using rotary percussion drilling. The diameter and minimum depth shall be as required by the design of the New Works.</p> <p>1.1.6.5 After drilling, holes shall be free of all contaminants including dust and water before injecting grout. It shall be ensured that grout fills the hole entirely without air voids following insertion of the reinforcement, and that the reinforcement is fully coated by the grout. Excess grout shall be removed immediately.</p> <p>1.1.6.6 Reinforcement shall not be inserted or grout used after the gel time, and the completed installation shall not be disturbed until the grout is fully cured. Gel times and curing times as stated by the product manufacturer will depend on concrete temperature, therefore temperature shall be recorded during installation.</p> <p>1.2 Testing of Resin Anchored Reinforcement</p> <p>1.2.1 The adequacy of resin fixed reinforcement shall be verified by site testing. For each combination of bar size and embedment depth, 1 No. test shall be carried out for every 20 bars, subject to a minimum of 3 No. tests.</p> <p>1.2.2 A test rig equivalent to that shown in BS 5080 Part 1: 1993, Figure 3 shall be used. The test rig shall be capable of testing the anchor bars in situ.</p> <p>1.2.3 If, due to the shape code or spacings of the bars to be resin grouted into the deck, it is not possible to apply the test rig to a bar, the following procedure should be followed: A straight bar of the same type, diameter and embedment depth shall be tested as close to the scheduled test bar as is practical.</p> <p>1.2.4 The bars shall be capable of resisting the test loads given in sub-Clause 1.1.3 above.</p> <p>1.2.5 A force sufficient to take up any slack in the apparatus, attachment and seating should be initially applied in accordance with BS 5080 Part 1: 1993. Readings taken at this stage will constitute the base from which subsequent relative movement shall be measured.</p> <p>1.2.6 Each tested anchor shall be loaded incrementally in tension in accordance with BS 5080 Part 1: 1993 up to the test load.</p> <p>1.2.7 Incremental loads shall be held for not less than half a minute and the test load for not less than five minutes.</p> |

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      | <p>1.2.8 Readings shall be taken immediately after applying load and at the ends of the time intervals stated above.</p> <p>1.2.9 There should be no movement of the anchorage during the test and total movement should be no greater than the load / extension characteristics of the reinforcement bar being tested and the testing apparatus being used.</p> <p>1.2.10 Any evidence of slip during loading up to the test load, as demonstrated by a significant change in the slope of the load / extension curve, shall constitute a failure.</p> <p>1.2.11 Testing records shall be retained at the end of each testing day.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <p><b>1778AR</b></p> | <p><b>1 Early Thermal cracking</b></p> <p>1.1 The Company shall develop suitable concrete mix designs and safe curing methods to ensure that any cracking due to early thermal effects does not exceed appropriate permissible crack widths in BS EN 1992-2 and to ensure compliance with the following criteria.</p> <p>a) Peak temperature: 65 degrees Celsius</p> <p>b) Maximum temperature differential within a single pour: in accordance with Table 7.1 of CIRIA C660 for internal restraint, <math>R = 0.42</math>, for the appropriate coarse aggregate type. If limestone coarse aggregate is to be used, the assumed value for coefficient of linear thermal expansion shall be demonstrated by measurements on concrete specimens.</p> <p>(i) The demonstration shall include the results of early thermal cracking trial pours, as scheduled in Appendix 1/5 of the specification. The temperature rise recorded in the trial pours may be used to establish the temperature rise for the concrete and to enable more reliable predictions of temperature rise using CIRIA C660.</p> <p>(ii) The relationship established from the trial pours between temperature and strain change may be used to determine the coefficient of thermal expansion and contraction as the temperature in the block rises and falls. This performance data can then be used to demonstrate compliance with the Agreement requirements to restrict early thermal cracking.</p> <p><b>2 Early Thermal Cracking Trial Pours</b></p> <p>2.1 Early thermal cracking trial pours shall be performed in advance of construction for each proposed concrete mix subject to these considerations. Further testing shall be performed in advance of any changes to materials or mix composition that might have a significant effect on these properties including, but not limited to, changes in type, source or content of cement, ground granulated blastfurnace cement or fly ash.</p> <p>2.2 Insulated 'hot-blocks' (one cubic metre) shall be used to simulate the</p> |

Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | <p>temperature conditions in large sections. The base, sides and top should be contained in 18 millimetre plywood with 50 millimetres of polystyrene insulation. The temperature in the block should be measured using thermocouples (at the centre and at the surface). 100 millimetres cores shall be taken at 28 days for testing compressive strength and checking for internal cracks.</p> <p>2.3 The test blocks should be instrumented using thermocouples and Vibrating Wire strain gauges (VWG) to provide a measure of the temperature rise and the associated strain.</p> <p>2.4 The following test data shall be recorded on the test certificate:</p> <ul style="list-style-type: none"> <li>a) Name and address of the test laboratory;</li> <li>b) Date and identification number of the test report;</li> <li>c) Name and address of the organisation responsible for the testing;</li> <li>d) Name and address of the concrete supplier;</li> <li>e) Date of arrival of the concrete;</li> <li>f) Composition of the concrete tested, including sources of materials;</li> <li>g) Purpose of the test;</li> <li>h) Test method;</li> <li>i) Any deviation from the test method;</li> <li>j) Name of the person who performed the test;</li> <li>k) Date of the test;</li> <li>l) Test results, including:             <ul style="list-style-type: none"> <li>(i) Compressive strength of cores taken and tested in accordance with BS EN 12504-1 and BS EN 13791 at an age of 28 days;</li> <li>(ii) The temperature rise; and</li> </ul> </li> <li>m) Date and signature.</li> </ul> |
| <p><b>1870 AR</b></p> | <p><b>1870 General</b></p> <p><b>1870.1 Basis of execution</b></p> <p>1 The basis for the execution of structural steelwork in this Series shall be BS EN 1090-2:2008+A1:2011, with options and additional requirements specified in this Series (see 1870.3).</p> <p><b>1870.2 Clause numbering</b></p> <p>1 The clause and sub-clause numbering and headings in Clauses 1871 to 1882 in this Series adopt those in BS EN 1090-2:2008+A1:2011, Clauses 1 to 12 respectively.</p> <p>2 The numbering of paragraphs in this Series bears no specific relationship to the order of paragraphs presented in BS EN 1090-</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>2:2008+A1:2011.</p> <p>3 Reference to a specific paragraph in this Series is by sub-clause number followed by the paragraph number in brackets where appropriate.</p> <p><b>1870.3 Options and additional requirements</b></p> <p>1 Where the requirements specified in BS EN 1090-2:2008+A1:2011 are to apply to this Series without amendment, the heading of the related sub-clause in this Series is followed by the abbreviation (AS) (as specified).</p> <p>2 Where there is a choice between two or more different requirements in a sub clause in BS EN 1090-2:2008+A1:2011 the selected requirement(s) shall be as specified in this Series. All other requirements in that sub-clause in BS EN 1090-2:2008+A1:2011 shall apply to this Series unless otherwise specified in this Series.</p> <p>3 Where additional requirements are specified in this Series, the requirements in the related sub-clause in BS EN 1090-2:2008+A1:2011 shall also apply to this Series unless otherwise specified in this Series.</p> <p>4 Where there may be additional project specific requirements in Appendix 18/1, the heading of the sub-clause in this Series is followed by the abbreviation (18/1).</p> <p>5 Where a requirement in BS EN 1090-2:2008+A1:2011 is qualified in that standard by the words ‘unless otherwise specified’, the requirement shall not be amended unless it is specified otherwise in this Series or in Appendix 18/1.</p> <p><b>1870.4 Qualification of Constructors</b></p> <p>1 In order to satisfy the general assumptions stated in BS EN 1990:2002+A1:2005, 1.3(2) relating to the execution of structures designed to the Eurocodes, all structural steelwork executed in accordance with this Series shall be undertaken by a constructor listed in the Register of Qualified Steelwork Contractors Scheme for Bridgeworks, which demonstrates that they have the necessary technical capability and competence for the type and value of work to be undertaken. These requirements may also be satisfied by registration and audit through an equivalent recognised registration scheme. Details of the current Register of Qualified Steelwork Contractors for Bridgeworks (RQSC) can be found at <a href="http://www.steelconstruction.org">www.steelconstruction.org</a> .</p> <p>2 The constructor shall undertake a review to confirm that their approved scope of work in respect of all execution processes is sufficient for the execution of the works described on the drawings referred to in Appendix 18/1. The review shall be documented and shall be submitted for the approval of the Design Organisation in advance of execution. The review shall include supporting evidence that shall include but not be limited to:</p> <ul style="list-style-type: none"> <li>• details of registrations in accordance with 1870.4 (1) and</li> </ul> |

|   | <p><b>1875.6 2 Terminology</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 1 | <p>The ‘part-turn’ method of tightening of preloaded fasteners is similar to the ‘combined method’ in BS EN 1090-2:2008+A1:2011. However it is restricted to Grade 8.8 assemblies, but class K<sub>o</sub> assemblies may also be used. It has reduced torque values in the first step and higher nut rotations in the second step (see 1878.5.1(5)).</p>                                                                                                                                                                                                                     |

Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

- 1 For plates 3mm thick or less with a quantified service category of less than F71, round holes for fasteners or pins may be formed by punching without reaming as permitted for EXC1/2. For plates 3mm thick or less with a quantified service category of F71 and above, round holes for fasteners or pins shall be drilled or be punched at least 2mm undersize in diameter and reamed after punching.
- 2 For plates thicker than 3mm, round holes for fasteners or pins shall be drilled or be punched at least 2mm undersize in diameter and reamed after punching in accordance with the requirements for EXC3/4.
- 3 For slotted holes the methods given in Table 1 may be used up to the maximum quantified service categories and thicknesses given in Table 1.

**Table 1 Method for slotted holes**

| <b>Method</b>                                                | <b>Maximum quantified service category</b> | <b>Maximum thickness, mm</b> |
|--------------------------------------------------------------|--------------------------------------------|------------------------------|
| Punching and hand thermal cutting                            | F36                                        | -                            |
| Punching in a single operation<br>Thermal cutting my machine | F56                                        | 15                           |
| Drilling and/or milling                                      | F112                                       | -                            |

**1876.7 Cut outs (18/1)**

- 1 The minimum radius for re-entrant corners and notches in all thicknesses of material shall conform to the requirements for EXC2/3, except for quantified service category F71 and above when the requirement for EXC4 shall apply (when the stress direction is in the plane of the radius), subject to a smaller radius not being specified in Appendix 18/1. If Form B in BS EN 1090-2:2008+A1:2011, 6.7 is to be used, the design shall be checked for the loss of section.
- 2 The restriction on the use of punched cut outs required for EXC4 shall apply where:
  - quantified service categories F56 and above are required;
  - materials conforming to BS EN 10025-6 are used.

**1876.9 Assembly (18/1)**

- 1 Elongations of holes by drifting shall be limited according to the tolerance class for EXC1/2 when applied to non-preloaded connected parts. The tolerance class for EXC3/4 shall apply to preloaded connected parts.
- 2 All connections for temporary components shall be executed in accordance with the requirements of this Series including those

Part 4 Specification

|  | 2 | If the tack weld is to be removed prior to welding of the joint, the minimum permitted size of tack weld shall be subject to a welding procedure test in accordance with BS EN ISO 15614-1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|  | 3 | If the tack weld is to be left in the joint, the maximum cross section of tack weld shall be used and the root and subsequent passes shall be deposited until such time as the root pass is fully covered. The full length of the tack weld location shall be subjected to a welding procedure test in accordance with BS EN ISO 15614-1 (see Table 11, footnote A)                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|  | 4 | The tack weld shall be assumed to be a fillet weld for the purposes of qualification.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|  |   | <b>1877.4.1.2 Qualification of welding procedures for processes 111, 114, 12, 13 and 14</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|  | 1 | Methods of qualification shall be in accordance with those permitted for EXC3/4 in BS EN 1090-2:2008+A1:2011, Table 12.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|  | 2 | The weld procedure qualification acceptance levels in BS EN ISO 15614-1 are less stringent in some respects than those required for FPC for EXC3/4 (see BS EN 1090-2:2008+A1:2011, 7.6). Also, for the highest quantified service categories, the acceptance limits for certain imperfection types are more stringent than for EXC4 (see 1882.4.2.3 and 1882.4.2.4). If either of these criteria are being used for FPC the relevant weld procedure qualification acceptance levels shall be amended. Existing procedures qualified to BS EN ISO 15614-1 shall be re-qualified accordingly by reference to the original test results, if possible. If this cannot be done, or the original results do not conform to the more stringent requirements, the relevant qualification tests for evaluation of imperfections shall be repeated. |
|  | 3 | Joints with restricted access for welding (e.g. slot and plug welds, shallow angle branch connections), shall be subject to procedure testing in accordance with BS EN ISO 15613.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|  |   | <b>1877.4.1.3 Qualification of welding procedures for other welding processes (processes 21, 22, 23, 24, 42, 52, 783 and 784) (AS)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  |   | <b>1877.4.1.4 Validity of a welding procedure qualification</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|  | 1 | Welding production tests shall be carried out in accordance with the qualification standard for the process concerned.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|  |   | <b>1877.4.1.5 Welders and welding operators</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|  | 1 | Welders shall be qualified by specific test for welding of joints with restricted access (see 1877.4.1.2 (3)).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>procedures shall be tested in accordance with the requirements for EXC3/4.</p> <p><b>1877.5.1.2 Hollow sections (AS)</b></p> <p><b>1877.5.4 Assembly for welding</b></p> <p>1 The guidance on preparation, assembly and welding of joints in hollow sections given in BS EN 1090-2:2008+A1:2011, Annex E shall be applied. Regarding the assembly of hollow sections, particular attention shall be paid to the following:</p> <ul style="list-style-type: none"> <li>• adequate access for penetration to the root in the case of full penetration butt welds. Where access is restricted a pre-production welding test conforming to BS EN ISO 15613 shall be conducted;</li> <li>• compensation for loss of throat and leg length in the case of fillet welded joints with root gaps (see BS EN 1090-2:2008+A1:2011, 7.5.8.1).</li> </ul> <p><b>1877.5.5 Preheating (AS)</b></p> <p><b>1877.5.6 Temporary attachments (18/1)</b></p> <p>1 Temporary welded attachments shall not be permitted in zones of quantified service categories F112 and above, or within 25mm of an edge, or where specified in Appendix 18/1.</p> <p>2 The use of temporary welded attachments shall be specified as required for EXC3/4.</p> <p>3 Restrictions on the removal of temporary welded attachments shall be in accordance with the requirements for EXC3/4 for thermal cutting and chipping, except that thermal cutting may be used if not closer than 3mm from the original member surface. Remnants of temporary materials proud of the original member surface shall be removed by grinding parallel to the member axis and the ground surface checked for freedom from cracking using magnetic particle testing.</p> <p><b>1877.5.7 Tack welds</b></p> <p>1 Tack welds shall be made using qualified welding procedures as required for EXC2/3/4 (see 1877.4.1.1).</p> <p><b>1877.5.9 Butt welds</b></p> <p><b>1877.5.9.1 General (18/1)</b></p> <p>1 Run-on and run-off pieces shall be used on all butt welds and shall conform to the requirements for EXC3/4, where access allows.</p> <p>2 Where a weld surface is required to be ground or machined flush, this shall be executed prior to non-destructive testing.</p> <p><b>1877.5.9.2 Single sided welds (18/1)</b></p> <p>1 Permanent steel backing shall only be used if specified in Appendix 18/1. The continuity of permanent steel backing shall conform to the requirements for EXC3/4. The execution of the continuity weld shall depend upon the quantified service category related to stresses parallel to the axis of the backing component, as follows:</p> <ul style="list-style-type: none"> <li>• F36: no additional requirements;</li> </ul> |

|  |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|--|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | 1 | <p>Welding of nuts, bolts or washers shall not be used on bolt assemblies above property class 4.6. Welding of property class 4.6 nuts, bolts and washers shall only be undertaken where specified in Appendix 18/1 and shall be subject to the requirements in 1877, 1882.4 and BS EN 1090-2:2008+A1:2011, 7.</p> <p><b>1878.2.4 Washers (18/1)</b></p> <p>1 Washers shall be placed under the nut or head of the bolt in non-preloaded assemblies whichever is rotated.</p> <p><b>1878.4 Preparation of contact surfaces in slip resistant connections (18/1)</b></p> <p>1 All surfaces which overlap each other in the final assembled connection excluding any painted edge strip around the perimeter of the connection described in Series 1900, 1906 shall be deemed to be 'contact surfaces'.</p> <p>2 The specified surface treatment applied to the friction surfaces shall be maintained until the surfaces are brought together and the connection assembled.</p> <p><b>1878.5 Tightening of preloaded bolts</b></p> <p><b>1878.5.1 General (18/1)</b></p> <p>1 At the snug tight stage, the exposed surfaces of the components being connected shall be aligned within 1mm where they emerge from beneath the cover plate(s) at the joint plane. This is subject to the tolerances of thickness difference between the two components (including any packing plates) in BS EN 1090-2:2008+A1:2011, 8.1 also being met. If this is exceeded, steel packing plates shall be used.</p> <p>2 In the case of preloaded lap joints subject to axial load only in the plane of the friction surfaces, the out of plane bending stiffness of cover plates may need to be limited to achieve adequate contact between friction surfaces. Measures to limit the out-of-plane bending stiffness of cover plates shall be as specified in Appendix 18/1. Additional contact surfaces shall be treated as contact surfaces in slip resistant connections.</p> <p>3 Where a connection is designed to transfer applied tensile forces through a flanged and bolted end plate, as a minimum, the area of the mating surfaces in direct line with the tension member cross section shall be in contact when all bolts are snug tight. Any remaining gaps in this zone shall be filled by steel shims prior to the application of the remaining preload. If necessary, bolts can be partially slackened to enable shims to be inserted. The shims shall not be loose in the final snug tight stage. In the event of a tapering gap, a purpose machined tapered steel shim may be used. As an alternative, flat (parallel) steel shims of not less than 0.1mm and of not more than 0.2mm thick shall be inserted to refusal in steps until the gap in the contact zone is filled, followed by retightening to the snug tight stage.</p> <p>4 The part turn method may be used for tightening preloaded bolts if:</p> <ul style="list-style-type: none"> <li>• the bolts are property class 8.8 and assemblies conform to 1875.6.4;</li> </ul> |
|--|---|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

- the minimum required preloading force is not in excess of the values specified in BS EN 1090-2:2008+A1:2011, Table 19; and
  - the joint fit-up conforms to 1878.5.1(1) or 1878.5.1(3) above, whichever is applicable.
- 5 The part turn method is the same as the combined method in BS EN 1090-2:2008+A1:2011, 8.5.4, except that:
- K<sub>o</sub> bolt assemblies may be used;
  - In the first tightening step the nut shall be tightened to a specified torque, as given in Table 2 of this Series;
  - In the second tightening step the nut shall be tightened to a specified turn as given in Table 3 of this Series.

**Table 2 Torque values for the part turn method – step one**

|                     |    |     |     |     |     |
|---------------------|----|-----|-----|-----|-----|
| Bolt diameter d, mm | 16 | 20  | 22  | 24  | 27  |
| Torque value M, Nm  | 80 | 160 | 210 | 270 | 340 |

**Table 3 Rotation values for the part turn method – step two**

| Bolt diameters, mm | Grip length <sup>A)</sup> , mm | Rotation, °  |
|--------------------|--------------------------------|--------------|
| 16 to 22           | ≤115                           | 180 (½ turn) |
|                    | 115 < ≤275                     | 270 (¾ turn) |
| 24 to 30           | ≤160                           | 180 (½ turn) |
|                    | 160 < ≤350                     | 270 (¾ turn) |

<sup>A)</sup> Equal to nominal thickness, *t*, in BS EN 1090-2:2008+A1:2011, Table 21

- 6 The torque method shall not be used for the tightening of preloaded bolts unless specified in Appendix 18/1.

**1878.5.2 Torque reference values (AS)**

**1878.5.3 Torque method**

- 1 The *k* value shall be checked daily with torque wrenches in accordance with BS EN 1090-2:2008+A1:2011, Annex. H and the torque for both tightening steps adjusted accordingly. Any assembly lots that fail to conform to this test shall be discarded.

**1878.5.4 Combined method**

- 1 For property class 8.8 and 10.9 bolt assemblies to BS EN 14399-3 (see 1875.6.4), the further rotation values in BS EN 1090-2:2008+A1:2011, Table 21 shall be amended as follows for the same thickness ranges:

- replace 60° by 90° (¼ turn);
- replace 90° by 120° (1/3 turn);
- replace 120° by 180° (½ turn).

- 2 The *k* value shall be checked daily with the torque wrenches in

## Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p>purchase requirements and the requirements of the product standard to which the mechanical fasteners have been manufactured (see 1870.5.2(1)). Reports of the verification undertaken shall be prepared and shall form part of the execution documentation (see 1874.2.4). The verification shall include:</p> <ul style="list-style-type: none"> <li>• Obtaining evidence of certification of the quality of the mechanical fasteners such as the manufacturer’s declaration of performance under a CE mark, manufacturer’s certificates and test reports from manufacturer’s or suppliers.</li> <li>• Review of the mechanical fastener documentation to confirm authenticity, relevance, accuracy and completeness.</li> <li>• Inspection and sample testing of the mechanical fasteners to be used in the works in accordance with BS EN ISO 3269:2001, to confirm that the dimensional and mechanical properties comply with the product standard to which the mechanical fasteners have been manufactured. The inspection and sample testing shall use an AQL of 0.65 for non-destructive tests, an AQL of 1.5 for destructive tests, and an Ac Level of 0(zero).</li> </ul> <p>3 In addition to the requirements of 1882.2.1(2) or 1870.5.2(1) as appropriate, the Constructor shall undertake suitability testing of mechanical fasteners in accordance with a relevant standard. For each inspection lot of mechanical fasteners supplied for use in the works, three fasteners shall be drawn at random and tested in accordance with the suitability test related to the product standard to which the mechanical fasteners have been manufactured. The mechanical fasteners that are subjected to the suitability testing shall be discarded following testing. In the event of a mechanical fastener not meeting the requirements of the suitability test, all mechanical fasteners in the associated inspection lot shall be discarded. The suitability testing shall be reported in accordance with the relevant standard, and the reports shall form part of the execution documentation (see 1874.2.4).</p> <p><b>1882.2.2 Components (AS)</b></p> <p><b>1882.2.3 Non-conforming products (AS)</b></p> <p><b>1882.3 Manufacturing: geometrical dimensions of manufactured components (18/1)</b></p> <p>1 The inspection plan shall identify all dimensions which could be at risk of non-conformity. Checks shall be made during execution and action taken to ensure that any non-conformity is corrected at the earliest opportunity. All such dimensions shall be checked before the steelwork is dispatched to site. Components in the neighbourhood of site connections shall be re-checked once the connections are complete.</p> <p>2 Repair of local dents in hollow sections by means of welded cover plates shall not be undertaken unless otherwise specified in Appendix 18/1.</p> <p><b>1882.4 Welding</b></p> <p><b>1882.4.1 Inspection before and during welding (AS)</b></p> <p><b>1882.4.2 Inspection after welding (AS)</b></p> |

## Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p><b>1882.4.2.1 Timing (AS)</b></p> <p><b>1882.4.2.2 Scope of inspection</b></p> <p>1 All welded joints shall be subject to specific inspection. The scope of specific inspection for each joint shall be 100% visual and in accordance with the extent and methods of supplementary non-destructive testing (NDT) given in Table 4, Table 5 and Table 6 of this Series.</p> <p>2 Table 4 specifies the minimum proportions of welded joints subjected to specific supplementary NDT for shop welds in steel grades up to and including S355 and quantified service category F56, which represent the most common conditions. The percentages in Table 4 shall be applied to the number of joints tested up to weld lengths of one metre in any joint. For joints with weld lengths exceeding one metre, the percentage shall be applied to the proportion of weld in every joint.</p> <p>3 Where other conditions than those assumed in Table 4 apply, the minimum proportion of welded joints to be subjected to specific supplementary NDT shall be increased (or decreased) by one or more levels in accordance with Table 5. This shall be done by applying the next highest (or lowest) proportion using the following sequence of seven increasing levels of proportion: 0%, 2%, 5%, 10%, 20%, 50%, 100%.</p> <p><i>NOTE: For example, if the proportion in Table 4 is 20%, an increase of one level changes the requirement to 50% and a decrease of one level to 10%.</i></p> <p>4 If adjustments are made according to more than one condition in Table 5, the net number of levels shall be used, after adding and/or subtracting the number of levels given in each note.</p> <p><i>NOTE: For example, if the proportion in Table 4 is 100% and the adjustments according to Table 5 are -1, -1 and +1 level respectively, the net adjustment would be -1 level, which would result in a proportion of 50%.</i></p> <p>5 For quantified service category F71 and above for shop welds in steel grades up to and including S355, the minimum proportions of welded joints which shall be subjected to supplementary NDT are specified in Table 6. For other conditions, the proportion tested in Table 6 shall be adjusted in accordance with Table 5 as described in 1882.4.2.2 (3) and (4) for Table 4.</p> <p>6 The selection of EXC in BS EN 1090-2:2008+A1:2011, Table 24 for scope of routine FPC inspection shall be determined by the constructor according to the nature of the work in normal production. It shall be not less than the specific inspections required in 1882.4.2.2(1) to (5), whichever is the greater.</p> <p><i>NOTE: Any FPC inspections undertaken on a specific structure which conform to Table 4 in this Series, providing that the acceptance criteria in 1882.4.2.3 and 1882.4.2.4 are fully met, can be regarded and documented as part of the specific inspection required in 1882.4.2.2(1) to (5).</i></p> |

| <p><b>2171AR</b></p> | <p><b>1 Bearing Replacement</b></p> <p>1.1 Bearings to new structures</p> <p>1.1.1 Bridges supported on bearings shall be designed to allow the inspection, maintenance, removal and replacement of such bearings without the need to close the bridge to normal traffic. Under such circumstances, only traffic loads due to Load Model 1 and Load Model 2 shall be considered. Other traffic loads shall not apply, i.e., Load Model 3 (Special Vehicles) and Fatigue Load Models need not be considered.</p> <p>1.1.2 Replacement of bearings by jacking shall allow for the effect of the deck being raised by 10 millimetres, or other specified value appropriate to the particular bearing in accordance with the manufacturer’s requirements, to facilitate removal and replacement of bearings.</p> <p>1.1.3 Jacking points shall be designed to accommodate the jacking loads including any fixed / sliding articulation requirements to ensure the overall stability of the structure during bearing replacement operations.</p> <p>1.1.4 The effects due to jacking of a Structure for bearing replacement shall be considered in combination with permanent and variable actions as follows:</p> <ul style="list-style-type: none"> <li>a) ultimate limit state: application of Equation 6.10 of BS EN 1990; and;</li> <li>b) serviceability limit state: as a frequent load combination as</li> </ul> |

Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      | <p>defined in Clause 6.5 of BS EN 1990.</p> <p>1.1.5 The location of temporary jacking points and any restrictions on the positioning of jacks, e.g. in relation to jacking stiffeners in steel web plates, and safe working loads assumed in the design of the temporary jacking system shall be clearly identified on the drawings.</p> <p>1.2 Bearings to existing structures</p> <p>1.2.1 The design of replacement bearings shall allow the inspection, maintenance, removal and replacement of such replacement bearings without the need to close the bridge to normal traffic.</p> <p>1.2.2 Replacement of bearings to be undertaken by jacking shall allow for the effect of the deck being raised by 10 millimetres, or other value appropriate to the particular existing and replacement bearings in accordance with the manufacturer's requirements, to facilitate removal and replacement of the bearings.</p> <p>1.2.3 The deck shall be jacked from suitable jacking points which shall accommodate the jacking loads including any fixed / sliding articulation requirements to ensure the overall stability of the structure during bearing replacement operations. Where necessary, the existing deck shall be modified and/or strengthened to accommodate the jacking points to be used in the replacement of the bearings.</p> <p>1.2.4 Replacement bearings shall be designed for the load effects due to Load Models LM1, LM2 and LM3 (Special Vehicles).</p> <p>1.2.5 The location of temporary jacking points and any restrictions on the positioning of jacks, e.g. in relation to jacking stiffeners in steel web plates, and safe working loads assumed in the design of the temporary jacking system shall be clearly identified on the drawings.</p> |
| <p><b>2670AR</b></p> | <p><b>1 Anti-Graffiti Coatings</b></p> <p>1.1 Anti-graffiti coatings shall be of the sacrificial type and shall be capable of being cleaned at least twice before re-coating is necessary</p> <p>1.2 The coating system shall be applied strictly in accordance with the manufacturer's written instructions.</p> <p>1.3 The application of the coating system shall not change the appearance of the substrate.</p> <p>1.4 Prior to application the surface shall be cleaned of all loose material oil grease dirt and existing graffiti. The surface shall be clean and dry before lightly abrading. All loose and flaking paintwork shall be feathered back to a sound edge. A suitable sealer / primer shall be applied to bare areas and areas of graffiti which resist cleaning and may present a problem by showing through the coating system unless sealed.</p> <p>1.5 The cleaning of the coating / removal of graffiti shall not have any detrimental effect on the substrate. Grit-blasting water jetting or the use of chemical cleaning agents likely to have long term effects on the substrate shall not be acceptable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      | <p><b>1.6</b> Where an existing anti-graffiti coating system is of the type that requires grit-blasting water jetting or the use of chemical cleaning agents likely to affect the substrate then the Company shall consult and comply with the requirements of Transport Scotland (Contact: [REDACTED] , Telephone: [REDACTED]) with regard to the methods proposed. The Company shall provide the Contracting Authority with completed Consultation Certificates in accordance with Part 5 of the New Works Requirements in respect of this requirement.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <p><b>3270AR</b></p> | <p><b>1 Emergency Response</b></p> <p>1.1 Response Time</p> <p>1.1.1 The response time for attendance of the Company's initial and secondary emergency response resources at the scene of an emergency shall be as stated in Table 1 of Appendix 32/1 to Part 5 of Schedule 4 of the Agreement.</p> <p>1.1.2 During the hours of 07.00 to 19.00 Monday to Friday the Company may use the personnel identified to respond to emergency requests for assistance on other operations or parts of the New Works in connection with this Agreement.</p> <p>1.1.3 The emergency response personnel shall however be able to attend at the site of any emergency on any part of the Land Made Available within the response time stated in Appendix 32/1 to Part 5 of Schedule 4 of the Agreement.</p> <p>1.2 Resources for emergency response operations</p> <p>1.2.1 Details of the types of resources that shall be made available by the Company to respond to emergencies shall be as specified in Table 2 of Appendix 32/1 to Part 5 of Schedule 4 of the Agreement.</p> |

|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>erection section can be started before two adjacent completed erection sections are temporary held together.</p> <p>c) Each erection section shall be assembled by tack welding the components together while temporarily held to the adjacent erection section. When tack welding two components within one erection section the temperature difference between the two components shall not exceed two degrees Celsius. The components shall be adjusted until, with the erection sections in correct alignment, a correct fit-up is obtained at the longitudinal butt welds within the section and at the peripheral erection weld with the adjacent erection section. Accurate alignment of the stiffeners around the erection welds shall also be obtained.</p> <p>d) Trial assembly shall only take place during temperature conditions where the temperature difference between the deck and bottom panels is less than +/-2 degrees Celsius. Correlation to the reference temperature shall be made if the temperature during trial assembly deviates from the reference temperature. Precautions shall be taken to overcome the effects of differential temperature during assembly, so that the required tolerances are satisfied.</p> <p>e) During trial assembly the support conditions of the erection sections shall resemble the support conditions for the erection sections during erection. Thereby the deformed shape of the erection sections will resemble each other in the two situations. Hence a match between adjacent erection sections is established during trial assembly that later can be re-established on the bridge site. The centre of gravity shall be determined for all deck erection sections and the support reactions shall be measured for all deck erection sections. The Company shall survey and record the geometry of each trial assembly and thereby determine deviations in geometry on single sections and accumulated deviations. The survey shall be carried out using the same survey points. The survey results of each individual trial assembly shall be combined to calculate and check the cumulative geometry of the completed bridge deck assembly relative to the design vertical alignment as trial assembly proceeds.</p> <p>f) The level and profile of deck plates, which form the roadway deck, shall be checked and adjusted if necessary to bring them within tolerances.</p> <p>g) Before completed erection sections are separated, all necessary temporary connections shall be carefully positioned and welded to each section in order to ensure accurate alignment after erection. These connections shall be designed to withstand all forces which are liable to occur during erection.</p> <p>1.11 Delete Clause 12.706.</p> |

## Part 4 Specification

**Appendix 0/1: Additional, Substitute and Cancelled Clauses, Tables and Figures Specific to This Agreement**

| Clause Number | Title and Written Text                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Clause Number | Title and Written Text                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>Site a Certificate of Compliance with the Specification and Annex A.</p> <p>The Company shall provide 2 No free film samples, sprayed on to open moulds (at least 200 millimetres x 200 millimetres in area and minimum thickness two millimetres), for tensile strength, elongation at break to BS ISO 37:2011 and tear strength to BS ISO 34: Part 1: 2010, Method C. The Company shall supply the Contracting Authority with copies of the test results with the samples.</p> <p>A membrane can be applied to the surface of concrete slabs between 14 to 17 days after casting provided no water was added to the surface of the concrete during cure.</p> <p>The Company shall continuously monitor the coverage rate of the material applied to the deck and shall provide the Contracting Authority with sheets on a daily basis showing the start / finish weights and area covered for each period of spray operation.</p> <p>The Company shall continuously monitor the wet film thickness using a gauge pin or a standard comb type thickness gauge. The Company shall provide the Contracting Authority with sheets on a daily basis indicating the wet film thickness measured and location.</p> <p>The Company shall measure the adhesion of the fully cured membrane to the deck using Elcometer Adhesion Tester Model 106 or similar. Three tests shall be required per 500 square metres of sprayed membrane. The Company shall provide the Contracting Authority with the test values and location of test before these areas are covered. The Company shall reinstate the test areas including primer if necessary. Test values below 0.7 newton / square millimetre shall require spraying operations to be suspended while further investigation is undertaken. The Company shall at his own expense remove and respray areas that do not meet this figure.</p> <p>The finished waterproof membrane surface shall be 'Holiday Tested' or tested by an equivalent method approved in writing by the Overseeing Organisation and any imperfections detected shall be rectified by the Company at his own expense. The Company shall make allowance in his programme of Works for such testing.</p> <p><b>High Voltage Pinhole / Holiday Detection for Bridge Deck Membranes Equipment</b></p> <p>Pinhole detection shall be carried out using suitable equipment and the results made available to the Contracting Authority. The equipment shall have the following facilities:</p> <ul style="list-style-type: none"> <li>(a) variable DC test voltage (1 - 20 kilovolts DC);</li> <li>(b) audible and visual alarm signals;</li> <li>(c) sensitivity adjustment;</li> <li>(d) phosphor bronze or silicon rubber electrode;</li> <li>(e) earth lead connection with clip; and</li> </ul> |

**Appendix 0/2: Minor Alterations to Existing Clauses, Tables and Figures Specific to This Agreement**

| Clause Number                    | Title and Written Text                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                          |                     |                                  |                |                                  |                |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|---------------------|----------------------------------|----------------|----------------------------------|----------------|
|                                  | <p>(f) test voltage.</p> <p>The output voltage of the pinhole detector shall be adjusted in accordance with the following table.</p> <table border="0" data-bbox="454 584 1152 719"> <thead> <tr> <th style="text-align: left;"><b>COATING THICKNESS</b></th> <th style="text-align: left;"><b>TEST VOLTAGE</b></th> </tr> </thead> <tbody> <tr> <td>2 millimetres to 2.5 millimetres</td> <td>12.5 kilovolts</td> </tr> <tr> <td>2.5 millimetres to 3 millimetres</td> <td>13.5 kilovolts</td> </tr> </tbody> </table> <p>The coating thickness is the maximum expected not the average.</p> <p><b>Procedure</b></p> <p>(a) Identify a site on the bridge deck to which the earth lead connection from the pinhole detector can be fixed, i.e. a metal object imbedded in the bridge deck.</p> <p>(b) Connect the leads from the pinhole detector in accordance with the manufacturer’s written instructions.</p> <p>(c) Fix the earth lead from the pinhole detector to the substrate and ensure that a good electrical contact is made.</p> <p>(d) Adjust the pinhole detector to the required test voltage in accordance with Sub-Clause (a) above.</p> <p>(e) With the pinhole detector turned OFF, connect any extension rods that may be required to the test probe handle. Connect the electrode to the end of the extension rods if fitted. A damaged electrode that does not make 100 per cent contact along its length shall not be used.</p> <p>(f) To check the pinhole detector is working correctly, touch the electrode onto the exposed substrate. The pinhole detectors alarm signal should be activated. If not, check the lead connections to the equipment and the earth lead to the substrate, also it may be necessary to adjust the sensitivity control on the equipment.</p> <p>(g) Pass the electrode over the coated surface at a maximum rate of 100 millimetres / second, paying particular attention to edges, holes and visible irregularities in the coating. The test voltage will have to be reduced if testing edges as the coating will be thin.</p> <p>(h) When a fault has been identified by the detector, the electrode shall be moved sideways in order to identify its precise location. Subsequently the fault should be ringed with a suitable marker. Such markings shall be made sufficiently distant from the coating defect to allow the repair procedure to be carried out without detriment to the adhesion of the repair material.</p> <p>(i) Continue testing and marking defects until all the coating has been tested, changing the electrode size as necessary.</p> <p>All repaired areas shall be re-tested.</p> | <b>COATING THICKNESS</b> | <b>TEST VOLTAGE</b> | 2 millimetres to 2.5 millimetres | 12.5 kilovolts | 2.5 millimetres to 3 millimetres | 13.5 kilovolts |
| <b>COATING THICKNESS</b>         | <b>TEST VOLTAGE</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                          |                     |                                  |                |                                  |                |

| None          |                       |

## Part 4: Specification

**Appendix 0/3: List of Numbered Appendices Referred to in the Specification and Included in This Agreement****1 Appendix 0/3**

- 1.1 Appendix 0/3 is comprised of two lists, A and B, of numbered Appendices as follows:
- 1.2 List A is a complete list of the numbered Appendices referred to in the Specification with those not adopted marked "Not Used".
- 1.3 The responsibility for compiling/completing the numbered Appendices is indicated by the following symbols:
- E The Contracting Authority compiles
- E/C The Contracting Authority partially compiles and the Company completes and returns to the Contracting Authority.
- C The Company compiles, completes and returns to the Contracting Authority.
- I For Company's information only
- (P) This indicates the Appendix is a national proforma and the format shall not be altered.
- T The Participant compiles, completes and returns with Tender.
- 1.4 The Company shall compile/complete the numbered Appendices in accordance with the Notes for Guidance on the Specification for Highway Works (Volume 2 of the MCHW), and provide as a minimum the information described in the sample appendices.
- 1.5 List B is not used.

**List A**

| 850SE            | <p><b>1 Crushed Gravel Sub-base Material Type 1</b></p> <p><b>Material Properties</b></p> <p>1.1 For the purpose of this Clause gravel is defined as aggregate derived from a natural, unconsolidated, coarse-grained sedimentary deposit consisting of water-worn rock fragments.</p> <p>1.2 Crushed gravel granular sub-base material Type 1 shall be derived from natural cobble-sized material (60 millimetres – 200 millimetres), or larger, crushed and screened to be well-graded and lie within the grading envelope of Table 8/50SE below.</p> <p><b>TABLE 8/50SE: Sub-base Type 1 Range of Grading</b></p> <table> <thead> <tr> <th>BS sieve size</th> <th>Percentage by mass passing</th> </tr> </thead> <tbody> <tr> <td>75 millimetres</td> <td>100</td> </tr> <tr> <td>37.5 millimetres</td> <td>85 – 100</td> </tr> <tr> <td>10 millimetres</td> <td>40 – 70</td> </tr> <tr> <td>5 millimetres</td> <td>25 – 50</td> </tr> <tr> <td>600 microns</td> <td>8 – 22</td> </tr> <tr> <td>75 microns</td> <td>0 – 10</td> </tr> </tbody> </table> <p>1.3 The particle size shall be determined by the washing and sieving method of BS 812: Part 103</p> <p>1.4 The material passing the 425 microns BS sieve shall be non-plastic as defined in BS 1377: Part 2 and tested in compliance therewith.</p> <p>(i) The degree of crushing of individual particles in the mixed material shall meet the following requirements:</p> <p>(ii) not less than 90 per cent by mass of the particles passing BS 50 millimetres and retained on BS 6.3 millimetre sieve shall exhibit at least three freshly broken faces; and</p> <p>(iii) not less than 80 per cent by mass of the particles in each BS 63 specified size fraction within the size range stated at (i) above shall exhibit at least three freshly broken faces.</p> <p>(iv) The material shall satisfy the minimum CBR requirement of Appendix 7/1 when tested in accordance with Clause 7 of BS 1377: Part 4. The material shall be tested at the density and moisture content likely to develop in equilibrium field conditions which shall be taken as being the density relating to the uniform air voids content of 5 per cent and the optimum moisture content determined in compliance with BS 5835. The specimens shall be tested in a soaked condition.</p> <p>(v) The material shall have a ten per cent fines value of 50</p> | BS sieve size | Percentage by mass passing | 75 millimetres | 100 | 37.5 millimetres | 85 – 100 | 10 millimetres | 40 – 70 | 5 millimetres | 25 – 50 | 600 microns | 8 – 22 | 75 microns | 0 – 10 |
| BS sieve size    | Percentage by mass passing                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |               |                            |                |     |                  |          |                |         |               |         |             |        |            |        |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>kilonewtons or more when tested in compliance with BS 812 : Part 111 except that the samples shall be tested in a saturated and surface-dried condition. Prior to testing, the selected test portions shall be soaked in water at room temperature for 24 hours without previously having been oven-dried.</p> <p>1.5 The aggregate will be considered suitable if:</p> <p>(i) aggregate from the source, when tested in accordance with BS 812 : Part 121, has a soundness value greater than 65; or</p> <p>(ii) evidence can be provided to the Employer of satisfactory use of aggregate from the source as Type 1 sub-base material.</p> <p>1.5.1 The water absorption of the coarse aggregate from the source determined in accordance with BS 812: Part 2 shall also be declared.</p> <p>1.6 Transportation and Compaction</p> <p>1.6.1 The material shall be transported, laid and compacted to the requirements of Clause 801 at a moisture content within the range one per cent above to two per cent below the optimum moisture content determined in compliance with BS 5835 and without drying out or segregation.</p> <p>1.7 Trafficking Trial</p> <p>1.7.1 When required by Appendix 7/1, the Company shall construct a trial area incorporating the crushed gravel sub-base material proposed for use in the Works. The trial area shall be constructed, trafficked and assessed in accordance with the procedure described in Appendix 7/1. The mean vertical deformation after 1000 standard axles shall be less than 30 millimetres when measured in accordance with the stated procedure.</p> <p>1.8 Performance of Crushed gravel Sub-base</p> <p>1.8.1 A brief performance report on the behaviour of the crushed gravel sub-base is required.</p> |
| <b>1202TS</b> | <p><b>1 General Requirements for Permanent Traffic Signs</b></p> <p>1.1 Sub-Clause 1:<br/>Delete “described in Appendix 12/1” and insert “of the Contract”</p> <p>1.2 Sub-Clause 2:<br/>Delete “BS 873 : Part 1” and insert “BS EN 12899-1:2001<br/>And insert at the end of the paragraph<br/>“Additionally, unless protected by existing safety barriers signs shall be, by preference, designated as Passively Safe and shall therefore conform to testing as BSEN12767:2007, TD89/08 and be installed in compliance with TD19/06.”</p> <p>1.3 Sub-Clause 3:</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>integral 0.5 metre outreach and flush access doors. Sign support posts shall be of tubular aluminium or aluminium lattice construction.</p> <p>The nominal height of a flange column or mast is taken as the distance between the underside of the flange plate and the highest point of the mast. See Fig. 1. of BD88 (DMRB 2.2.13)”</p> <p>1.2 Insert additional Sub-Clause 8</p> <p>”Unless protected by an existing Vehicle Restraint System (“VRS”), columns shall be, designated Passively Safe or otherwise located so as to require no protection in accordance with TD19/06. Where passively safe columns are used they shall conform to testing as BSEN12767:2007. Installation shall always be in compliance with TD19/06.”</p> <p>1.3 Add Sub-Clause 9:</p> <p>“Non-hygroscopic base compartment back-board not less than 15mm thick and of a sufficient size to accept the selected cut-out shall be positioned internally opposite the access door. The baseboard shall be securely fixed to the inside of the column. All screws and fixings used for the attachment of equipment and components to this wooden back-board shall be of stainless steel.”</p> <p>1.4 Add Sub-Clause 10:</p> <p>”Lighting columns shall be manufactured with a flush mounted access door correctly positioned relative to with the integral bracket. This position ensures that access through the door can only take place when the operative is facing the oncoming traffic.”</p> <p>1.5 Add Sub-Clause 11:</p> <p>“The column cable entry slot, which shall be positioned on the face to the right of the column access door opening, shall have minimum dimensions of 150mm x 75mm with the lower edge of the slot 600mm below ground level. The cable entry slot shall be free from irregularities and burrs.”</p> <p>1.6 Add Sub-Clause 12:</p> <p>“Each column shall be fitted with an 8 mm (minimum) diameter earth terminal complete with two plain washers and one full nut and one locking nut. These items shall be corrosion resistant and compatible with the column material. Earth terminals shall be readily accessible through the door opening and located such as to minimise the risk of injury to persons accessing them while undertaking installation and maintenance.”</p> <p>1.7 Add Sub-Clause 13:</p> <p>“All electrical and similar joints made onto the column structural aluminium and column access door shall be such as to eliminate or protect against corrosion resulting from contact between dissimilar</p> |

|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>metals. The Company is required to adhere to such aspects of the guidance provided in PD6484 as it relates to dissimilar metals in contact with aluminium. The selection of electrical earthing components shall also comply in this and other respects with the requirements of BS 7430. All access doors shall be fitted with chain or wire. Termination of the bonding earth conductor shall use components manufactured from compatible material.”</p>                                                                                                                                     |
| 1.8           | <p>Add Sub-Clause 14:</p> <p>“The flush fitting weatherproof single access door shall provide protection no less than IP33 and shall be free from any irregularities, burrs or sharp edges likely to cause injury. Unless specifically required by this Contract each column access door shall have at least one lock. All locks shall use a triangular type key. The number of column door keys to be supplied shall be 10% of the number of columns erected subject to a minimum of three keys. All column access door keys shall be manufactured from metal and be of an adequately size.”</p> |
| 1.9           | <p>Add Sub-Clause 15:</p> <p>“On completion of the installation, all door locking components shall be coated with suitable corrosion inhibitor grease providing lubrication and protection from seizure and general deterioration.”</p>                                                                                                                                                                                                                                                                                                                                                           |
| 1.10          | <p>Add Sub-Clause 16:</p> <p>“Lighting column access doors shall be retained by stainless steel chain or braided stainless steel wire. Such retaining chain or wire shall be compatible with the column material and be held captive by fixings similarly manufactured from compatible material. Chains shall be a minimum gauge of 4mm and be long enough to allow the column access door to be rested completely on the ground whilst removed. All removable access doors shall be interchangeable with access doors of similar columns without the need for adjustment.”</p>                   |
| 1.11          | <p>Add Sub-Clause 17:</p> <p>Where columns are mounted on structures and behind parapets, the access doors shall be positioned such that the access opening is fully accessible above the upper height of the protective parapet and facing the maintenance personnel.</p>                                                                                                                                                                                                                                                                                                                        |
| 1.12          | <p>Add Sub-Clause 18:</p> <p>Flange plate columns shall be set vertical on the foundation bases prepared for them. To ensure the column is set vertical compatible metal shims shall be used for adjustment. The nuts and exposed bolts shall be made suitably tight and then coated with protective paste and suitable protective tape. All fixings shall be compatible with the column material.”</p>                                                                                                                                                                                           |
| 1.13          | <p>Add Sub-Clause 19:</p> <p>“Where the column flange is not in accordance with BS EN 40-2 the</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number        | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      | <p>Company shall liaise with the Contractor responsible and agree details of the flange sizes and fixing centres. The Operating Company shall implement a design based upon the agreed flange fixing and provide the design to the column manufacturer.”</p> <p>1.14 Add Sub-Clause 20:<br/>“Where separate bracket arms are used such bracket arms shall be of the same material as the column and fixed in accordance with the manufacturer’s written instructions to prevent rotation using an anti-rotational device.”</p> <p>1.15 Add Sub-Clause 21:<br/>“Road lighting columns and brackets shall be manufactured, located and erected in compliance with this Series, the 1400 Series and all relevant requirements.”</p> <p>1.16 Add Sub-Clause 22:<br/>“Where wall brackets and associated service boxes are installed they shall, where applicable, match existing items.”</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <p><b>1302TS</b></p> | <p><b>1 Design of Lighting Columns, Brackets, CCTV Masts, Cantilever Masts, Foundations, Anchorages and Attachment Systems</b></p> <p>1.1 Delete whole of Sub-Clause 1 and replace with:</p> <p>“Lighting columns, brackets, CCTV masts, cantilever masts, the foundations of both planted columns and columns and masts with flange plates, and the anchorages and attachment systems for columns and masts with flange plates shall be designed to comply with the requirements of Standards BD 94/07 of the DMRB and the technical approval scheme adopted by the Overseeing Organisation. The Company shall similarly comply with BS PD 6547:2004+A1:2009 and the referenced standards within it. The Operating Company shall use the soil type information as described in Appendix 13/1. The Operating Company shall design foundations for all columns and masts detailed in this Contract.</p> <p>The Company shall submit to the Overseeing Organisation a copy of all design calculations, variations, certification and supporting information at least two weeks prior to delivery and shall include with such records confirmation that such records have been checked by a competent person to ensure compliance with the required standards and check certificates issued for lighting columns, brackets, CCTV masts, cantilever masts and foundations. The design of the foundations shall be appropriate to the soil types encountered on site, as identified in Appendices 13/1, 13/4 and 13/7.</p> <p>The Company shall establish the soil types on site and submit, to the</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| <b>Clause Number</b> | <b>Title</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 1308TS        | <p><b>1 Handling, Transport and Erection</b></p> <p>1.1 Sub-Clause 4:<br/>Delete whole sub-clause text and replace with<br/>“Columns and masts shall be installed in accordance with the manufacturer’s instructions and all requirements of the Specification.”</p> <p>1.2 Add Sub-Clause 6:<br/>“All verge located lighting columns shall be installed such that the door is facing away from the oncoming traffic. Alternative access door orientation must be agreed with the Overseeing Organisation. Where agreement for such alternative orientations is to be sought this must form part of the initially proposed project design.”</p> <p>1.3 Insert Additional Sub-Clause 7:<br/>“All proprietary materials shall be stored in accordance with the manufacturer’s written instructions.”</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1401TS        | <p><b>1 General</b></p> <p>1.1 Sub- Clause 1:<br/>Insert additional new first paragraph to Sub-Clause 1:<br/>“The lighting installation shall not be operationally energised until the Company has complied with the Electricity at Work Regulations 1989 and provided to the Overseeing Organisation all completed BS7671 Inspection and Testing Certificates. In addition to the provision of the BS7671 Inspection and Testing Certificates the Company shall provide a written record to the Overseeing Organisation stating that these Certificates have been audited for correct and full completion by a resource competent to undertake such audits.”</p> <p>Delete existing first paragraph of Sub-Clause and replace with:<br/>Materials equipment and workmanship required under the Contract shall comply with BS 7671 Regulations for Electrical Installations (the IEE Wiring Regulations) and the applicable regulations of the Distribution Network Operator (DNO) providing the supply. The installation and maintenance of electrical apparatus and cabling for road lighting and illuminated traffic signs shall comply with the quality management scheme detailed in Appendix A Volume 1 of the MCHW. The Company shall incorporate into work procedures the contents of Engineering Recommendation G39/1 ‘Model Code of Practice covering Electrical Safety in the Planning, Installation, Commissioning and Maintenance of Public Lighting and Other Street Furniture’.”</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>Delete existing third paragraph of Sub-Clause 1 and replace with:</p> <p>“In addition to the requirements of Sub-Clauses 10.2 and 10.3 of G.39/1, each Competent Person as defined in G.39/1, Clause 2, shall be provided by the Company with not less than one copy of the above certificate, duly completed and signed as approved. Such certificate(s) shall be retained and be available at all times for inspection on request by the Overseeing Organisation. A formal work allocation record shall be kept by the Operating Company to enable work carried out by individual operatives and the responsible supervisor to be identified. All operatives and supervisors shall hold a valid Electrotechnical Certification Scheme (ECS) identity card. Notification of the details of all such cards shall be submitted to the Overseeing Organisation 14 days prior to commencement of the Works.</p> <p>Insert additional final paragraph to Sub-Clause 1:</p> <p>“The Company shall ensure that only competent persons as defined in the guidance note LDS8014_A.1_Competency – Competency requirements relating to work on Transport Scotland’s Roadside Electrical Assets and Lighting shall be employed on work that falls within the scope of this series. All competent persons shall be registered with the Highway Electrical Registration Scheme (HERS). In addition Authorised Persons shall be registered as specified in the "Highway Electrical Registration Scheme (HERS) Handbook.”</p> <p>1.2 Delete existing Sub-Clause 2(iv) and replace with:</p> <p>“ Electrical Equipment for Lighting Units shall consist of the following as described in this Contract: luminaires, photo-electric control units (PECUs), shorting plugs, lamps, time switches, ballasts, ignitors, starters, capacitors, cut-outs, fuses, fuse holders, miniature circuit breakers (MCBs) and Light Emitting Diode (LED) drivers.”</p> <p>Delete existing Sub-Clause 2(v) and replace with:</p> <p>“In this Series the "network" is the electrical distribution network from the DNO cut-out to the Lighting Units. This includes feeder pillars, cabinets, housings and similar enclosures that form part of the installed electrical distribution network.”</p> <p>1.3 Sub-Clause 3:</p> <p>Delete whole Sub-clause text and insert:</p> <p>“Each network shall operate on a nominal single phase 230V ac, - 6% to +10% or three phase 400V - 6% to +10% at a frequency of 50Hz ±1%. It will be the Company’s responsibility to ensure that the</p> |

|               | <p>shall allow for a minimum of three tilt angles including 0deg. +5deg. and +10 degrees.</p> <p>(iii) the internal arrangement of the luminaire shall consist of separate control gear and lamp compartments. These compartments shall be arranged to provide for the separate sealing of the optical system (lamp housing) and control gear compartment. Both compartments shall have a degree of external sealing and sealing between each other no less than IP66.</p> <p>(iv) luminaire to be used for group control shall be fitted with a NEMA socket and this shall be located in the canopy. The control column shall be sited immediately adjacent to the control pillar and a PECU fitted into the NEMA socket.</p> <p>(v) meet the structural design and aesthetic approval requirements of Clause 1302. The external finish shall be to BS4800 RAL9007 Silver.</p> <p>(v) a range of luminaires of varying rating shall be available in a common style/design.</p> <p>(vii) curved glass shall be manufactured from toughened safety glass. Flat glass shall only be used in the vicinity of railways, airfields and navigable waterways or by agreement with the Overseeing Organisation. Luminaires shall be of the full-cut-off/low-threshold increment type as agreed with the Overseeing Organisation.</p> <p>(viii) electronic ballast units shall be provided in luminaires rated up to and including 400W and shall be suitable for operation over the input voltage range of 210-250 Volts. Electronic ballasts shall incorporate over-temperature protection and have a power factor of 0.95 (lagging/leading) or greater.</p> <p>Prior to delivery of any luminaire using electronic control gear the Overseeing Organisation shall be provided, by the supplier, with a 'statement of Compatibility'. This statement shall detail and confirm that the electronic control gear being supplied is capable of operating over the temperatures range to which it will be exposed in use within the luminaire housing and that the lamp and control gear are fully compatible. The 'Statement of Compatibility' shall describe the testing regime used to ensure</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>Delete whole Sub-Clause text and replace with:</p> <p>“Miniature circuit breakers shall be in accordance with BS EN 60898 and unless agreed with the Overseeing Organisation be the preferred method of circuit protection. Miniature circuit breakers shall be suitable for use on the specified operating voltage of the network at single or three phase as appropriate. Their short circuit current rating shall be no less than 10KA.. The Company shall ensure by enquiry of the DNO that the prospective short circuit current rating of the supply is no greater than 16KA. Thermal or magnetic overcurrent tripping devices shall be provided with a mechanism to ensure that the contact cannot be held closed against a fault. Circuits shall be designed such that devices are operated within the ratings specified by the manufacturer.”</p> |
| 1.7           | <p>Insert Addition Sub-Clause 8:</p> <p>“The cut-out gland plates shall be an integral part of the cut-out and be capable of terminating XLPE/PVC SWA cables up to 25mm sq and have the capacity for looping in-out. The gland plate shall typically accommodate up to 3 cables however additional armoured cable termination and cut-out capacity shall be provided at multi-headed columns, at columns where the group PECU is fitted and at locations where spur supplies are provided.”</p>                                                                                                                                                                                                                                                                                                                                                               |
| 1.8           | <p>Insert additional Sub-Clause 9:</p> <p>“At columns fitted with more than one luminaire, each luminaire shall be wired and fused separately, however all cut-out fuse carriers shall be arranged to be withdrawn as one. Where a PECU is fitted to any of the luminaires, the cut-out for that luminaire shall also carry the fuse for the PECU and provide simultaneous isolation of both PECU and luminaire. Each cut-out fuse carrier shall be clearly marked indicating the luminaire or device that it protects.”</p>                                                                                                                                                                                                                                                                                                                                  |
| 1.9           | <p>Insert additional Sub-Clause 10:</p> <p>“The design of the cut-out shall be such that it is possible to incorporate facilities, integral within the unit, to feed additional spur(s) to sundry equipment such as lit bollards and signs. The supply to each spur shall have its own dedicated circuit protection and be individually isolated by a separate fused cut-out. Spur supplies will be protected using a dedicated fuse carrier allowing the supply to be individually isolated. Where spurs are required for supplies to third parties then reference should also be made to Cl. 1401S.6.”</p>                                                                                                                                                                                                                                                  |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |            |                |             |                 |             |                  |

These measurements shall be carried out in a way that excludes any ‘parallel paths’.</li> <li data-bbox="587 2011 1433 2045">(iii) The resistance of all earth electrodes shall be measured</li> </ul> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>and recorded.</p> <p>(iv) For Periodic Testing Class I luminaires a 500V insulation test shall be carried out between the phase and neutral cores connected together relative to the earth core and metalwork of the lighting unit. The initial commissioning testing being carried out on each individual core. Insulation resistance shall not be less than 1 Mohm in either case.</p> <p>(v) For Periodic Testing Class II luminaires a 500V insulation test shall be carried out between the phase and neutral cores connected together relative to the metalwork of the lighting unit. The initial commissioning testing being carried out on each individual core. Insulation resistance shall not be less than 2 Mohm in either case.</p> <p>(vi) For the Periodic Testing of Network cables a 500V insulation test shall be carried out, with the phase and neutral cores connected together, relative to the earth core and the metalwork of the lighting column. The initial commissioning and testing being carried out on each individual core. Insulation shall not be less than 6 Mohm regardless of cable length. This test shall be carried out with cables in place and connected to the supply side of the lighting units cut-outs. During the testing all luminaires shall be isolated on the consumer side of the cut-out.</p> <p>(vii) The Company shall ensure that a voltage reading is taken at each feeder pillar and at the terminals of the last current-using apparatus on each circuit, with all apparatus energised. Where a spur is created from the main circuit to energise a bollard, sign or similar the voltage at all such spurs shall also be recorded. The voltage measured at the last current consuming piece of apparatus on a given circuit shall be below 223.1V (3% of 230V; BS7671:2008) at full load.</p> <p>(viii) The Company shall record the earth fault loop impedance at the suppliers cut-out at every lighting unit with all earth conductors and earth electrodes in place in accordance with Guidance Note 3 para. 2.7.14. Values of Zs measured for any circuit shall not exceed those given in BS7671 Tables 41.2 and 41.3 for 0.4 second disconnection.</p> <p>(ix) The Company shall ensure that inspection and testing undertaken shall be sufficient to fulfil the requirements of the Electricity at Work Regulations 1989; Regulation 4(1) and other relevant legislation.</p> |

|               | <p>submitted.</p> <p>Insert the following additional Sub-Clause:</p> <p>“The value of Ze provided by the electricity supplier at the electrical origin shall be no greater than 0.35 ohm for TN-C-S supplies and 0.8 ohm for TN-S supplies. The Overseeing Organisation shall not accept values that exceed these Ze maximum values. The Company shall ensure the Ze values are achieved by the DNO prior to acceptance of the supply on behalf of the Overseeing Organisation.”</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1501A         | <p><b>1 Introduction</b></p> <p>1.1 Motorway and Trunk Road Communications for the Scottish Trunk Road Network shall be referred to as Traffic Scotland Equipment. The Traffic Scotland Equipment is provided to support the provision of Traffic Scotland Service and forms part of the Scottish Minister’s Intelligent Transport System. All work relating to the design provision, uplifting, diversion, relocation, construction, installation, connection, testing, commissioning, integration, documentation and handover of Traffic Scotland Equipment shall comply with this Series. This Series supersedes all previously published versions of this Specification Series. For the purposes of this Series unless otherwise described in the New Works Requirements the word “provide” or “provision” means design, uplift, divert, relocate, construct, install, connect,, test, commission, integrate, document and handover to maintenance and operations.</p> <p>1.2 This document serves as the outline specification for the provision of Traffic Scotland Equipment which shall typically consist inter alia of the following elements :</p> <ul style="list-style-type: none"> <li>(a) ducting and chambers and cable management systems;</li> <li>(b) cables and all cable fittings;</li> <li>(c) cabinets and all ancillary items;</li> <li>(d) Emergency Roadside Telephones (“<b>ERT</b>”);</li> <li>(e) Closed Circuit Television (“<b>CCTV</b>”) cameras;</li> <li>(f) National Traffic Data Service (NDS) detection equipment;</li> <li>(g) (NDS) vehicle detection – EuroVI classification levels;</li> <li>(h) Variable Message Signs (“<b>VMS</b>”);</li> <li>(i) Lane and Speed Control Signalling;</li> <li>(j) Motorway Access Control (“<b>MAC</b>”);</li> <li>(k) Journey Time (“<b>JT</b>”) equipment;</li> </ul> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

|               | <ul style="list-style-type: none"> <li>(l) Ramp Metering (“<b>RM</b>”);</li> <li>(m) not used;</li> <li>(n) not used;</li> <li>(o) enforcement systems;</li> <li>(p) Weigh-in-Motion (“<b>WIM</b>”) systems;</li> <li>(q) communications infrastructure;</li> <li>(r) mains power supply and distribution infrastructure;</li> <li>(s) Instation equipment;</li> <li>(t) hard landscaping;</li> <li>(u) transmission stations;</li> <li>(v) structural infrastructure on which Traffic Scotland equipment is mounted on.</li> </ul> |
| 1.3           | <p>The Overseeing Organisation is Transport Scotland, an agency of the Scottish Government. The representative of the Overseeing Organisation is the Traffic Scotland Manager who is responsible for all aspects of the Traffic Scotland Equipment. Contact details for the Traffic Scotland Manager are provided in the New Works Requirements Part 3 The Contracting Authority is acting on the behalf of the Overseeing Organisation in respect to all New Works Requirements detailed in Schedule 2 Part 3.</p>                 |
| 1.4           | <p>The Traffic Scotland Equipment and system are unique and differ in many respects from other driver information and control systems operating within the UK such as those operated by the Highways Agency. The Company shall ensure that all parties working on any Traffic Scotland element of the Agreement take cognisance of the differences as expressed in this Series 1500 and other relevant documents.</p>                                                                                                               |
| 1.5           | <p>This Series 1500 is applicable to all work undertaken under any Agreement that includes Traffic Scotland Equipment and structural infrastructure on which Traffic Scotland Equipment is mounted.</p>                                                                                                                                                                                                                                                                                                                             |
| 1.6           | <p>Roadside verges on or into which Traffic Scotland infrastructure or equipment is to be provided shall be of an adequate width and topology acceptable to Traffic Scotland. The Traffic Scotland roadside sites shall be of suitable for future maintenance activities and if required access by ERT user and shall either be finished horizontal or be of an appropriate minor single gradient.</p>                                                                                                                              |
| 1.7           | <p>The design and construction of any works adjacent to a Traffic Scotland Equipment location shall be such as to adequately route surface water away from the Traffic Scotland Equipment.</p>                                                                                                                                                                                                                                                                                                                                      |
| 1.8           | <p>The design of safety fences, barriers and works directly adjacent to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>Scotland Issued Equipment is required, its type, and configuration, required date for delivery to or uplift by the Company. All Transport Scotland Issued Equipment shall be uplifted in accordance with the arrangements agreed with the Traffic Scotland Manager and the organisation responsible for the Overseeing Organisation's stores at the times and in the manner described in the New Works Requirements. The Company shall adjust the requested uplift time as reasonably requested by the organisation responsible for the Overseeing Organisation's stores. The Company shall retain a record of all documentation associated with requesting and uplifting Transport Scotland Issued Equipment as described in the New Works Requirements and such records shall form part of the records and documentation in compliance with Clauses 1504SR and 1540SR.</p> |
| 1.6           | <p>Unless otherwise stated in the New Works Information, the Company shall be responsible for providing written notice within 24 hours and documented evidence within three days, of any defects or damage to equipment received or uplifted from the Overseeing Organisation's store.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1.7           | <p>The Company shall be responsible for undertaking all works associated with repairing and replacing any Traffic Scotland Equipment damaged or missing after purchase by the Company or uplifted from the Overseeing Organisation's stores. In compliance with the Agreement the Company shall be responsible for the Company's and Overseeing Organisation's costs associated with repairing and replacing any Traffic Scotland Equipment damaged or missing after purchase by the Company or uplifted from the Overseeing Organisation's stores. The period for which the Company shall be responsible and all associated costs for replacement and repairing of Traffic Scotland Equipment shall be in compliance with the Agreement.</p>                                                                                                                                   |
| 1.8           | <p>Prior to commencing any site work the Company shall supply to the Overseeing Organisation written information and confirmation of compliance with the Agreement for all Company supplied Traffic Scotland Equipment and Traffic Scotland related materials that will be incorporated in the New Works. This information shall include the following details:</p> <ul style="list-style-type: none"> <li>(i) Detail of the manufacturer</li> <li>(ii) The specification, safety regulations and statutory requirements the equipment is compliant with</li> <li>(iii) The manufacturers' product number</li> <li>(iv) A specification sheet</li> <li>(v) Transportation, handling and storage requirements</li> <li>(vi) Installation instructions,</li> <li>(vii) Safety information for installation and operation</li> </ul>                                               |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>(viii) Maintenance requirements.</p> <p>(ix) Operational Instructions</p> <p>(x) De-commissioning information</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1.9           | <p>The Company shall provide all self certification, production acceptance testing and factory testing documentation and test results for each item of active/operational Traffic Scotland Equipment that the Company has to provide in accordance with the New Works Requirements. The testing undertaken shall be no less than that detailed in the New Works Requirements.</p>                                                                                                                                                                                                                                                                                  |
| 1.10          | <p>In order to allow time for the integration, testing and commissioning of the Traffic Scotland Equipment, the Company shall programme the New Works or sections thereof so that the Traffic Scotland Equipment is available for integration, testing and commissioning for a period of time before the New Works or sections thereof is open to the road user and such period of time shall be in compliance with the testing requirements highlighted within the New Works Requirements.</p>                                                                                                                                                                    |
| 1.11          | <p>The Company shall provide information, access and appropriate facilities for and to the Electricity Supply Company and communication suppliers as required by them to fulfil their obligations to undertake service connections, disconnections, repairs and reconnections, in compliance with the Agreement. The Company shall provide information, access and facilities for and to the Contracting Authority and other Traffic Scotland Service providers as required by them to fulfil their appropriate obligations associated with the New Works in compliance with the Agreement. The Company shall provide site supervision resources at all times.</p> |
| 1.12          | <p>The Company shall provide all drawings, documentation and certification in compliance with the Agreement</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 1.13          | <p>The Company shall only employ personnel, sub-contractors and consultants qualified and experienced in the provision of Intelligent Transport Systems and associated Internet Protocol (IP) communications systems. The Company shall provide the Overseeing Organisation with full details of the qualifications and experience of all personnel, sub-Contractors and consultants whom he proposes to employ. Such details shall be provided in writing, 56 days prior to the commencement of any Traffic Scotland Equipment work or at any earlier date as required to comply with the New Works Requirements.</p>                                             |
| 1.14          | <p>The Company shall be responsible for the appropriate disposal of all waste, existing equipment and materials, in compliance with TR1100, the WEEE Regulations and any additional obligations required for compliance with the New Works Requirements. The Company shall maximise recycling of all forms of waste arising from existing equipment materials and shall detail such recycling measures in the Project Environmental Plan.</p>                                                                                                                                                                                                                      |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|                      | <p>establishing the identifier for Traffic Scotland Equipment is described in the New Works Requirements. Both the Company's identification method and final chainage/Traffic Scotland Operational ID shall be provided within the same document.</p> <ul style="list-style-type: none"> <li>(ix) Details regarding the removal only and removal and re-siting of existing Traffic Scotland Equipment. These records shall detail the original location, the date it was made disused and the method of disposal of any Traffic Scotland Equipment.</li> <li>(x) Details of all works undertaken in the Traffic Scotland Control Centre (TSCC), transmission stations and any other location where Traffic Scotland Equipment is provided so that the necessary as built records can be prepared and in compliance with the New Works Requirements.</li> <li>(xi) Any additional requirements detailed in the New Works Requirements.</li> <li>(xii) The Company shall maintain an up to date record of all equipment and cable provided by the Overseeing Organisation as detailed in the New Works Requirements.</li> <li>(xiii) At a minimum, in an electronic spreadsheet, a record of requests for, uplift, storage and installation, integration, commissioning, testing and handover of Transport Scotland Issued Equipment and Company supplied Traffic Scotland Equipment so that there is an up to date understanding of the current status of all Traffic Scotland Equipment</li> <li>(xiv) Current and historic equipment calibration records.</li> </ul> |
| <b>1505A</b>         | <p><b>1 Provision of Cabinets and Ancillary Items</b></p> <ul style="list-style-type: none"> <li>1.1 All cabinets shall be manufactured using aluminium or stainless steel unless described otherwise in the New Works Requirements and shall be painted using a paint system suitable for the cabinet material and complying with the 1900 Series. The top coat exterior colour shall be Slate Grey RAL 7015. Ancillary Items shall be provided as detailed in the New Works Requirements.</li> <li>1.2 All locking mechanisms shall be stainless steel and shall use a form of lock and key that is compatible with existing Traffic Scotland Equipment cabinets. Where dissimilar materials will be encountered, suitable barriers or gaskets shall be supplied to prevent corrosion or galvanic action resulting from the direct contact of dissimilar metallic materials.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>1506A</b>         | <p><b>1 Cables</b></p> <ul style="list-style-type: none"> <li>1.1 Traffic Scotland cable types shall be in compliance with the New Works</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>Requirements.</p> <p>1.2 Other than cables used for internal wiring of cabinets and equipment, non-armoured communications cables and mains power cable shall not be used. Cables that are only located within cabinets and racks shall be referred to as wiring.</p> <p>1.3 Unless otherwise described in the New Works Requirements, the Company shall be required to submit reasons to the Overseeing Organisation for any installations requiring the use of mains power cable with conductors larger than 25mm<sup>2</sup>. If such reasons are justifiable the Overseeing Organisation shall approve the use of conductors larger than 25mm<sup>2</sup> otherwise the request shall be rejected and a compliant design shall be made by the Company.</p> <p>1.4 Each drum of cable delivered to the Site shall have quality inspection certificates attached to each flange in accordance with the relevant cable specification. The Company shall ensure that the certificate relates to the cable to which it is attached. The certificate shall form part of the Site Records and a copy shall be given to the Overseeing Organisation prior to the installation of the cable. Before installing armoured communication cables, the Company shall test and accept the integrity of the sheath in accordance with cable test specification MCG1022 (for copper cables) or MCG1055 (for fibre cables). All cable test results shall form part of the Site Records (Clause 1504) and a copy of all cable test result shall immediately, on completion of each cable test, shall be stored with the Site Records and be provided to the Overseeing Organisation. The Company shall include the necessary hold points within the Quality Plan for the immediate provision of cable test results. The location in the ground of cable lengths by reference to their drum numbers shall be kept with the daily records in compliance with Clause 1504.</p> <p>1.5 All underground Traffic Scotland Equipment cables shall be installed in ducts.</p> <p>1.6 The outer sheath of all Traffic Scotland Equipment cables shall be coloured black.</p> <p>1.7 The Company shall return part used drums of cable to the Company's site compound area for subsequent use. Part used drums shall be clearly marked and kept separate from unused drums. The Company shall keep and maintain a register of all cable drums; the register shall for each cable drum include the cable drum number, cable size and the length(s) of cable removed. Surplus cable lengths shall be neatly coiled or drummed as appropriate and the Company shall record the length and other details as for drummed cable specified above. Cable ends will be sealed in accordance with NDX Drawing NDX1061-00.</p> <p>1.8 The Company shall be responsible for arranging with the cable supplier for the collection of empty cable drums where the cable supplier offers such a service. The Company shall provide a record of all drums</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | collected. Where no collection of empty cable drums is offered by the supplier the Company shall then offer the empty cable drums to the cable supply industry otherwise the Company shall dispose of the empty cable drums in an environmentally friendly manner and shall confirm the method of disposal to the Overseeing Organisation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>1507A</b>  | <p data-bbox="357 622 735 656"><b>1 Cable Installation</b></p> <p data-bbox="357 674 1193 707">1.1 All cables shall be laid in accordance with this Clause.</p> <p data-bbox="357 725 1430 824">1.2 Cables shall only be laid when the ambient temperature is above 0° C on a rising thermometer, and the cable has been stored for at least the previous 24 hours at a temperature greater than 0° C.</p> <p data-bbox="357 842 1430 1039">1.3 Sufficient length of cable shall always be installed to allow for correct cable termination and provision of service loops all in accordance with Clause 1507.18SR. When termination does not proceed immediately following the installation of the cable, the cable ends shall be protected from damage and sealed against the ingress of moisture in accordance with drawing NDX1061-00.</p> <p data-bbox="357 1057 1430 1290">1.4 The Company shall not install cables into ducts until the duct mandrel testing and pressure tests have been completed and stored with the daily records as described in Clause 1504SR. The Company shall make the completion of the mandrel and pressure test a hold point in the Company's quality plan. Furthermore the Company shall satisfy himself that ducts are, in all respects, suitable for cable installation prior to the installation of cables.</p> <p data-bbox="357 1308 1278 1341">1.5 No cable shall be left exposed at the end of any work period.</p> <p data-bbox="357 1359 1430 1525">1.6 In the event of any damage whilst cables are being installed, the whole of the length of cable shall be removed, replaced or repaired, reconnected and re-tested at the Company's expense prior at the earliest possible date. All cable repairs shall be at the discretion and to the satisfaction of the Overseeing Organisation.</p> <p data-bbox="357 1543 1430 1709">1.7 Every cable shall be permanently labelled using plastic cable markers (Critchley type or equivalent) to identify the destination of the cable in accordance with the drawing NDX1061-00 to ensure its unambiguous identification immediately following its installation. The cable markers shall be near to the cable terminations and visible within the cabinet.</p> <p data-bbox="357 1727 1430 1892">1.8 The Overseeing Organisation shall be provided with the opportunity to witness the installation of all cables and the Company shall provide an indication to the Overseeing Organisation of where cable installation will take place at least 14 days prior to the cable installation unless otherwise detailed in the New Works Requirements.</p> <p data-bbox="357 1910 1430 2045">1.9 For duct installations cables shall be drawn into cable ducts and chambers that have been installed in compliance with Clauses 1530SR, 1531SR and 1532SR. For cable tray or similar cable management installations the cable installation shall be in accordance with this</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>Clause 1507SR.</p> <p>1.10 Unless otherwise described in the New Works Requirements, power supply cables shall not share the ducts with longitudinal communications cables. For power supply cable runs less than 50 metres, a relaxation has been permitted to allow shared ducts for power and communications cables. For power cable runs greater than 50 metres a separate duct shall be installed for the power cable which at no point is less than 0.5 metres from the ducts containing communications cabling.</p> <p>1.11 Cables shall be installed from a central chamber point outwards using a static mechanical winch fitted with an adjustable clutch, the setting of which shall ensure that at no time during the drawing of cables will the maximum longitudinal mechanical cable loading be exceeded. A copy of the current calibration certificate relating to the winch shall be provided to the Overseeing Organisation prior to use and shall also be held with the daily records in compliance with Clause 1504SR.</p> <p>1.12 The ducts shall be lubricated during installation using a suitable water based, biodegradable lubricant. Such lubricant shall be compatible with all elements of the installed cable and duct infrastructure. The draw cord shall not be used for cable installation. The Company shall use the draw cord to pull through a purpose made cable pulling rope which shall then be used for cable installation. The cable pulling rope shall be attached to the cable by means of a pulling eye fitted to a stocking (copper and power cable) or a pulling eye attached directly to the central strength member (fibre cable). In all cases the Company shall attach a swivel between the cable pulling rope and the pulling eye.</p> <p>1.13 Purpose made bell-mouths shall be fitted to the exit and entry of every duct, including all intermediate points, prior to the commencement of cable installation. A purpose made cable chute shall be used at the cable entry point to the network. Also, during cable laying purpose made rollers shall be temporarily secured to the chamber cover frame to ensure the cable sheath is protected from contact with the frame metal. Cable guides shall be used to support the cable at all intermediate chambers through which the cable is being installed.</p> <p>1.14 Where intermediate chambers exist on a cable route, the cables shall where practical, be installed through these chambers in one operation; the Company shall ensure that an operative is present at every such chamber to ensure the safe installation without damage to the cable. Where cables pass through intermediate chambers, the Company shall, immediately after installation, label each cable with the destination of the cable and chamber or equipment reference as appropriate approximately 150 mm from the entry and exit points of the chamber. The type of labelling to be used shall comply with drawing NDX1061-00.</p> <p>1.15 Where more than one cable is to be installed in a duct, before the second cable is pulled the Company shall ensure that the duct is unobstructed and the cable pulling rope to be used does not pass</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>around the existing cable. If the Company cannot ensure the cable pulling rope is not around the existing cable the Company shall introduce a new pulling rope by using rods or other means independent of the existing draw rope. Where multi-pair copper and optical fibre cables are to be installed into the same duct, the multi-pair copper cable(s) shall be installed first.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 1.16          | Optical fibre cables shall additionally be marked at intervals of 500 mm along their length, inside chambers. If the cable sheath is not indelibly marked during manufacture the marking shall be added using 25 mm wide, yellow PVC adhesive tape or alternative fit for the purpose.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 1.17          | Cables shall not be bent to an internal radius of less than 12 times the external diameter of the cable or the radius recommended by the manufacturer, whichever is greater.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 1.18          | Unless otherwise described in the New Works Requirements, all fibre optic and copper communications cables shall be provided with service loops. These service loops shall be installed in a Type 'C' chamber located at each copper or fibre termination pillar of sufficient dimensions to ensure the cable is not exposed to bends below the minimum bending radius. Each loop shall be made of a minimum of 3 metres of each cable and comply with drawing NDX1063-03.                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 1.19          | Unless otherwise described in the New Works Requirements or required by the Overseeing Organisation, no uncoated metal cable supports shall be fitted within the chambers. All metal supports shall be plastic coated or similar.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 1.20          | The Company shall ensure that on completion of the cable installation works a draw cord is installed in each duct and both ends secured within the terminating chambers or enclosure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1.21          | The use of verge located cable troughs shall not be permitted without the specific written authority of the Overseeing Organisation unless used in temporary situations to provide continuity of service. Such written authority shall only be provided where the Company can provide evidence of constraints that would prevent the installation of ducts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 1.22          | In above ground situations cables shall be installed on cable management systems such as ladder type cable trays or trunking or troughs. The cable management systems shall prevent the cables being bent to a diameter less than that specified in Clause 1507.17SR. No cables in an external environment shall be left exposed and cable tray lids and trunking covers shall be provided to protect the cables from physical and environmental damage. All cable tray lids and trunking covers shall be positively retained using suitable fixings. In situation where the cable management system covers and lids could fall and cause injury or damage the covers and lids shall be provided with stay chains or wires to prevent the covers and lids falling. On horizontal cable management systems the cables shall be tied to the cable management system at intervals not exceeding 5 metres and at points |

|               | <p>where the cables change direction. On vertical cable management systems the cables shall be tied to the cable management system at intervals not exceeding 500mm and shall be tight enough to provide cable strain relief. The support and attachment mechanisms for the cable managements systems shall be of sufficient strength to support the calculated cable mass and the spacing of the support and attachment mechanisms shall be at intervals that will only allow a maximum deflection of 10mm in the cable tray or trunking. All cable management system parts, fittings supports and attachment mechanisms shall be protected from corrosion and shall be fit for purpose for at least 30 years within the environment they are installed.</p> <p>1.23 Cables shall be routed within masts and posts.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>1508A</b>  | <p><b>1 Installation of Cabinets – General items</b></p> <p>1.1 Cabinet types shall be those as described in the New Works Requirements.</p> <p>1.2 The Company shall provide and install paved areas around cabinets together with access paths, steps and hard standings in accordance with Clause 1539. With the cabinet door fully open a minimum 700mm clearance shall be provided between the edge of the cabinet door and any retaining wall, fence, embankment or cutting. The 700mm clearance does not take into account the required working width and access requirements and such requirements shall be included in the overall clearance between cabinets and adjacent features.</p> <p>1.3 The Company shall install foundations and erect cabinets in accordance with the appropriate NDX or Agreement Specific Drawing.</p> <p>1.4 Unless otherwise described in the New Works Requirements or where Combined Equipment Cabinets (CECs) are utilised, cabinets shall be situated in groups located in a consistent sequence as shown typically in NDX1063-00.</p> <p>1.5 Cabinet doors shall be orientated to provide the safest possible environment for roadside maintenance staff and wherever possible cabinets shall be orientated so when the doors are open they provide protection from spray from vehicles. Cabinet doors shall be capable of opening and closing without being fouled by paved area or access paths or steps.</p> <p>1.6 Where cabinets are to include a resin seal then after completion of the terminations and testing, but before the addition of gravel, the entry and exit ducts into the base of the cabinets or below the cabinets shall be sealed with expanded foam to prevent the ingress of soil, pea gravel and water into the duct ends. The internal void within the plinth or base shall then be filled with 6mm-pea gravel to the level shown on the relevant cabinet drawing. Furthermore the base of each cabinet shall additionally be resin sealed typically in accordance with drawing NDX1002-01 or specific Agreement Drawing. To achieve the required</p> |

|               | <p>resin seal the duct ends shall be above the finished level of the resin seal by a minimum of 10mm and a maximum of 30mm. The resin seal shall be poured to provide a waterproof seal to all cables and finished to provide a smooth and level surface.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1.7           | <p>For CEC cabinets and similar where cable entry takes place via penetrations through a suspended metal base plate then correct and compatible glands shall be used in accordance with the cabinet manufacturer's instructions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 1.8           | <p>The Company shall keep the interior of cabinets free from moisture and dirt. The Company shall ensure that the doors of each cabinet are closed and properly secured after the installation of Traffic Scotland Equipment in the cabinet and after the completion of any other work.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 1.9           | <p>The Company shall ensure that all enclosures and cabinets, following the drilling, cutting or removal of cable entry knockouts, maintain the manufacturer's quoted IP Classification ratings and are cleaned of all waste, swarf and surplus material prior to any further work being undertaken. Where such drilling and modification of an enclosure and cabinet causes removal or damage to any protective coating, the coating shall be made good in accordance with the manufacturer's instructions and/or in accordance with Series 1900.</p>                                                                                                                                                                             |
| 1.10          | <p>The Company shall ensure that power is available and all cabinet environmental control equipment is tested, commissioned and operational before any Active Equipment is installed in the cabinet.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 1.11          | <p>Power supply distribution and protection circuits shall be housed in cabinets. The power supply cabinets are as detailed in drawings NDX1011-06, NDX1011-07 and NDX1011-08. The layout of the supply distribution and protection circuits shall be as detailed in the drawings. The circuits detailed on the NDX Drawings are shown for example only and the Company shall provide power schematic layout drawings in a format as agreed with the Overseeing Organisation. The Company shall also ensure that this work conforms to the requirements of the BS7671.</p>                                                                                                                                                         |
| 1.12          | <p>Where cabinet type 600(S) is used, they shall be installed as shown on drawings in the NDX1002 series. The Company shall install such wiring and supports to accommodate equipment to be housed in accordance with the Agreement. Where a termination frame arrangement is required, the frame shall be wired using 0.5 mm single stranded copper twisted jumper wire for the links. Where appropriate the frame can be wired off-site. All wiring shall be mechanically supported and retained using suitable ties or cord and terminations shall conform to the relevant sub-clause of Clause 1513 and shall satisfy the requirements of the applicable Workmanship Standards Manual that forms part of the Quality Plan.</p> |
| 1.13          | <p>Where specialist cabinets or CECs are used, they shall be installed in accordance with the Agreement Drawings and/or manufacturer specific installation requirements.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 1509A         | <p><b>1 Gantries for Overhead Equipment</b></p> <p>1.1 Where required to be installed, the Company shall provide Gantries in compliance with the New Works Requirements.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1511A         | <p><b>1 Marker Tape</b></p> <p>1.1 All ducts installed underground shall have their position indicated by the use of detectable marker tape. Unless otherwise described in the New Works Requirements such marker tape, as described below, shall be buried in the trench above the cable/duct as detailed in NDX1063-00.</p> <p>1.2 Marker tape shall be manufactured from self coloured thermoplastic material not less than 150 mm wide; it shall have a metallic insert or backing which will allow detection by electronic route tracing equipment. The detectable metallic component and the form of tape construction shall be either:</p> <p>(i) Stainless steel wire or wires with a minimum total cross sectional area of 0.30 mm sq. laid in a sinusoidal wave form or stainless steel strip with minimum dimensions of 10 mm wide and 100 micron thick. The stainless steel wire or strip shall be sandwiched in between two layers of thermoplastic tape with a combined minimum tape thickness of 150 micron or bonded to one layer of thermoplastic tape with a minimum thickness of 150 micron.</p> <p>(ii) Aluminium foil with minimum dimensions of 50 mm wide and 9 micron thick totally enclosed in between two layers of thermoplastic tape. The combined thickness of the two tape layers shall be a minimum of 400 micron.</p> <p>1.3 Joints between successive lengths of tape shall be made using crimps or clamps such that the electrical continuity and tensile strength of the tape is maintained. The joint shall be protected from corrosion and attack from ground chemicals.</p> <p>1.4 The wording on the marker tape shall read "CAUTION COMMUNICATIONS/ POWER CABLES BELOW". The wording shall occur at intervals up to a maximum of 1m apart. The letters of the wording shall be a minimum of 30 mm high with a minimum of 5 mm line thickness</p> <p>1.5 Marker tape shall be yellow in colour, with wording in black.</p> |

|               | ancillary items of Traffic Scotland Equipment at all locations where such ancillary items are required unless otherwise described in the New Works Requirements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>1513A</b>  | <p data-bbox="357 607 373 633"><b>1</b>      <b>Jointing and Termination of multi-pair communications and feeder Cables</b></p> <p data-bbox="357 689 400 716">1.1      No permanent multi-pair communications cable underground joints are permitted on Traffic Scotland installations. Temporary above and below ground joints in damaged operational cables shall be allowed until the full length of damaged cable is replaced. Repairs to operational cables shall be undertaken immediately after the damage has occurred. Cable replacement shall take place as soon as possible. Unless otherwise described in the New Works Requirements the Company shall be responsible for all cable repairs and replacement.</p> <p data-bbox="357 976 400 1003">1.2      All permanent multi-pair communication cables joints and terminations shall take place within a cabinet except in the loop tail to feeder cable joints as described in Clause 1513.3.</p> <p data-bbox="357 1093 400 1120">1.3      The Company shall use the type of cable joints between detector loop tails and feeder cables as detailed in NDX1063-04 and shall comply with Clause 1523 of this 1500 Series. The loop tail and feeder cable joints shall be installed in loop roadside chambers in accordance with NDX1063-04. The conductors shall be secured by tightening the screws with a torque screwdriver to within the range 0.4 to 0.6 Nm. The conductors shall be of sufficient length to facilitate routine maintenance and allow for four subsequent re-terminations. Care shall be taken at all times to maintain correct pairing. The Company shall use proprietary cable markers to clearly identify all cables and cable cores by using correctly fitting labels at both ends. To terminate multi-pair cables in cabinets, the outer SWA shall be removed at the gland plate and the inner sheaths at the highest point within the frame. This shall be carefully removed from the cable ends to reveal the pairs of insulated conductors. All surplus jelly shall be removed by the use of a clean dry cloth taking care not to stretch the insulation, and any fluid substance to aid the cleaning process shall have had the prior approval of the cable manufacturer and be shown to have no detrimental effect on the cable or, if applicable, the jointing system.</p> <p data-bbox="357 1749 400 1776">1.4      Cables shall be glanded and dressed neatly and routed within the cabinet with proprietary pair ties and pair identification markers in a neat and orderly manner and shall be terminated in compliance with the pair allocation tables as detailed in the New Works Requirements. The Company shall route the incoming and outgoing cables to vertically align the cables gland plate position with the point they enter/leave the cabinet</p> <p data-bbox="357 2002 400 2029">1.5      The lay of the cable shall be maintained up to the termination position. All conductor pairs shall be identified by means of a numbered plastic</p> |

|               | <p>approved hermetically sealed box containing silica gel to prevent damage due to the occurrence of moisture. The fibres shall be fusion spliced and protected from mechanical strain. The fusion splicing shall not cause losses greater than that detailed in MCG 1055</p> <p>1.4 Unless required for equipment connection, all joints shall be permanent, fusion spliced type.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>1516A</b>  | <p><b>1 Termination and Jointing of Power Supply Cables for Traffic Scotland Equipment</b></p> <p>1.1 Underground joints may in limited circumstances be permitted on Scottish Motorways Communications system but only with the specific approval of the Overseeing Organisation and in compliance with NDS 9565 "Guidance on the use of standard Traffic Scotland termination pillars"</p> <p>1.2 Termination of power supply cables shall be undertaken in accordance with good working and recognised electrical engineering practices. Prior to commencing with power supply terminations the Company shall deliver to the Overseeing Organisation method statements and a Transport Scotland Issued Equipment power cabinet fully terminated and complete as evidence of the workmanship that will be provided as part of the Works</p> <p>1.3 Where the Company requires to terminate power supply cables in existing power supply cabinets or cabinets which contain operational Traffic Scotland Equipment the Company shall comply with Clause 1522.</p>                                                                                                                                                                                                                   |
| <b>1517A</b>  | <p><b>1 Earthing and Bonding</b></p> <p>1.1 The earthing and bonding of the Traffic Scotland installations shall comply with the recommendations contained in BS7671 and BS7430. Where required, further details of the earthing and bonding requirements may also be given in the New Works Requirements.</p> <p>1.2 The area of gland plates or boxes, which will come into contact with a cable gland shall be cleaned prior to fitting of all paint and, in existing equipment any corrosion, before a cable gland is fitted. Once the gland is fitted, exposed metalwork of gland plates or enclosures, where required, shall be suitably treated to protect against corrosion. Furthermore an appropriate earth tag forming part of the gland kit, and retained by the gland fixing nut, shall also be installed and connected to the main earth bonding point within the cabinet using correctly sized cable and crimps as required by the Electricity Safety, Quality and Continuity Regulations. This bonding cable shall be copper and have insulation coloured green/yellow – also see Clause 1517.5SR below.</p> <p>1.3 All connections to bolted fixtures shall be made through crimped type lugs and using correctly sized bolts with appropriate washers and lock</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p style="text-align: center;">nut all as NDX1002-01</p> <p>1.4 All Traffic Scotland Equipment cabinets grouped in close proximity shall be effectively earth bonded together in accordance with the requirements of BS7671 Requirements for Electrical Installations. The Company shall introduce correct and adequate earth bonding arrangements particularly when the cabinet group includes lighting or similar cabinets energised by a different Electricity Supply Company supply to the Traffic Scotland Equipment. It is the Company's responsibility to design the installation to ensure no high fault currents from earth faults on other systems enter the Passive Network.</p> <p>1.5 In all Traffic Scotland Equipment cabinets all SWA gland earth tags shall be installed within the cabinet and bonded together and to the cabinet earth stud using green/yellow insulated bonding wire unless otherwise required by applicable Regulations. This requirement applies to all SWA Communications and Power Supply cables.</p> <p>1.6 At all equipment sites where a power supply is installed it is a requirement that an earth rod be installed as follows:</p> <p>(a) If the Termination Pillar contains the DNO's cut out, then an earth rod will be installed adjacent to the Termination Pillar in accordance with the requirements of BS7671 and BS7430 to act as the Electricity Supply local protective earth.</p> <p>(b) Where Traffic Scotland equipment includes a mast or support introducing an increased risk of damage by lightning then a earth rod shall be installed adjacent to the cabinet as a communications local earth. The earth impedance of the earth rod shall be no greater than 10 ohms.</p> <p>1.7 All pillar, cabinet and Signal pole doors shall be earth bonded to the main structure chassis using a flexible 6 mm sq. green/yellow insulated conductor cable reference. The bonding conductor shall be sufficiently long as not to be strained when the doors are fully extended. Where crimp terminals are used these shall be sound in assembly and protected from strain typically using an insulated clip or similar retaining arrangement.</p> |
| <b>1518A</b>  | <p><b>1 Cable Testing</b></p> <p>1.1 Armoured communications cables shall be tested by the Company in accordance with the Specifications MCG1022 (for multi-pair communications cable) and MCG1055 (for optical fibre cable). The Company shall undertake tests on cables as detailed in this document and the Specification for Highway Works. Appendix 1/5. Scottish modifications to the MCG1022 are as follows :</p> <p>(a) Communications cables to MCE1173 shall be tested to MCG1022C paragraphs. 2.3.1. 2.3.3.(a), 2.3.4.(a) and 3.1. corrected as 1518.2</p> <p>(b) Communications cables to CW1128/1198 shall be tested to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

The Overseeing Organisation may appoint a specialist consultant to witness all testing.</p> <p>1.6 No site cable tests shall be carried out until the cable trench containing the cable duct has been back-filled and the ground above the cable</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>reinstated and the cable ends have been installed (un-terminated) in the respective termination cabinets. No site cable tests shall be carried out until all the cables to be installed in one duct have been installed. No site cable tests shall be carried out until adjacent work, which may damage the cable have been completed.</p> <p>1.7 Cable test result documentation shall be in compliance with clause 1504 and Clause 1540. The cable being tested and the instruments being used to complete the test shall be clearly marked on each cable test result.</p> <p>1.8 The Company shall provide all safety equipment, display warning notices, erect barriers and ensure trained personnel are present at all points where dangerous voltages may be present during testing.</p> <p>1.9 All test instruments requiring calibration shall have a current calibration certificate. Copies of the calibration certificate covering the whole period of cable testing shall be provided with the cable test results.</p> <p>1.10 The Company shall give at least 14 days' notice, in writing, to the Overseeing Organisation of his intention to test any cable and shall be provided with the opportunity to witness the installation of all cables.</p> <p>1.11 In the event of the Company drawing further cables through a duct after cables have been tested, then all cables in the duct shall be re-tested.</p> <p>1.12 Any cable damage identified shall be rectified by the Company in accordance with sub-clause 1550. and re-tested.</p> |
| <b>1519A</b>  | <p><b>1 Labelling and Numbering</b></p> <p>1.1 All Traffic Scotland equipment when detailed in drawings and documentation prepared by the Company shall be numbered in accordance with the Traffic Scotland Equipment numbering scheme in the NDX series drawings and the New Works Requirements. The Company shall not use any other equipment numbering at anytime.</p> <p>1.2 Cabinets, Emergency Roadside Telephones, Signals, and cables shall be numbered and labelled, in accordance with the relevant NDX drawings, using Traffic Scotland labelling procedures and, unless specified otherwise in the New Works Requirements, it shall be the responsibility of the Company to provide such manufactured labels. All equipment labels shall be attached in accordance with the NDX series drawings unless otherwise described in the New Works Requirements.</p> <p>1.3 The Company shall not leave cables unlabelled at any time and shall provide temporary labelling accordingly to facilitate testing and termination prior to the implementation of permanent labelling.</p> <p>1.4 All cabinets containing power shall be labelled to indicate the source of supply, destination, circuit arrangements and details of testing in accordance with the BS7671 regulations. Cabinets shall also include a</p>                                                                                                                                                                                                                                        |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|               | <p>with Clause 201 of the Specification.</p> <p>1.6 Conductors shall be disconnected from the equipment in which they are terminated, the terminal screws and glands re-tightened and the cable withdrawn clear of the equipment.</p> <p>1.7 Where cables are to be recovered, they shall be carefully withdrawn, and the Company shall comply with the requirements for duct sealing, cleaning and roping. Recovered cables shall be coiled onto drums at the time of removal and transferred to the Company's site storage area for subsequent re-use or removal to the Overseeing Organisation's Store, unless otherwise detailed in the New Works Requirements.</p> <p>1.8 The sites of cabinets, plinths and cable trenches shall be reinstated to the level of the surrounding ground as in Clause 201 of the Specification, unless otherwise described in the New Works Requirements.</p> <p>1.9 All re-used cables shall be tested in accordance with Clause 1506SR and 1507SR.</p> <p>1.10 Where cables are being disconnected and removed, or being disconnected and left in situ, the operation shall be carried out in a safe manner which does not form a hazard to maintainers, operators or Users and shall be in compliance with the New Works Requirements.</p>                                                                                                                                                                                                                                                              |
| <b>1522A</b>  | <p><b>1 Works Impacting on Operational Traffic Scotland Systems</b></p> <p>1.1 All works shall be programmed and planned to prevent any detrimental impact on the operation of Traffic Scotland Equipment and systems in accordance with the "Strategy of ITS New Works for Traffic Scotland Equipment Document" which forms part of the New Works Requirements. The details of the works to mitigate the impact on the Traffic Scotland Service or part thereof shall be prepared by the Company and made available to the Overseeing Organisation and the relevant Traffic Scotland Service providers prior to the start of such works. Notification of any such mitigating arrangements shall, unless otherwise stated within the New Works Requirements be no less than 28 days prior to the works commencing.</p> <p>1.2 Detrimental impact may include but not be limited to loss of service due to cable damage, loss of electrical supply or communications link or damage to equipment and similar.</p> <p>1.3 Mitigating arrangements may include temporary equipment housing, temporary electrical supply, temporary communications link by copper cable, optical fibre cable, line-of-sight microwave or similar or combinations of these.</p> <p>1.4 Where no alternative is available, the Company shall provide documentation detailing all the investigated alternatives.</p> <p>1.5 Where migrating arrangements introduced by the Company fail to correctly protect the operation and integrity of the Traffic Scotland</p> |

|               | <p>circuits and adding or altering the electrical distribution protection devices;</p> <p>(o) remove all waste and redundant material and clean out the cabinet;</p> <p>(p) renew external labels;</p> <p>(q) undertake any works such as painting, replacing locks, hinges and general cabinet maintenance works such as oiling and greasing the hinges, adding a document holder ; and</p> <p>(r) updating records and inserting records to be held in cabinet.</p> <p>1.4 All existing direct buried cables exposed during modification of existing Traffic Scotland Equipment shall be installed in ducting laid in compliance with Clauses 1530SR and 1531SR. Also where remake loops in direct buried cables are exposed, Type C chambers shall be constructed to accommodate the remake loop.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>1530A</b>  | <p><b>1 Cable Ducts</b></p> <p>1.1 The term cable duct used in this Series describes the ducts used for Traffic Scotland Equipment communication and power cables.</p> <p>1.2 Longitudinal ducts are those ducts forming the longitudinal route of ducts installed generally parallel to the carriageway. Transverse ducts are those ducts linking the longitudinal ducts and installed underneath and at right angles to the carriageway. Local ducts are those ducts installed from chambers forming part of the longitudinal duct network to the cabinets and Traffic Scotland Equipment</p> <p>1.3 The ducts installed to this specification are used for all types of Traffic Scotland cables</p> <p>1.4 The ducts shall comply with this Series and the New Works Requirements. The Company shall be responsible for ensuring that all components used within the ducts are compatible with each other, with the cable and with existing ducts to which they may be connected.</p> <p>1.5 The ducts shall comply with the general requirements of BS EN 50086-1 and in particular requirements of BS EN 50086-2-4. The ducts shall have a current British Board of Agreement Roads and Bridges Certificate or equivalent in accordance with Clause 104 of the Specification.</p> <p>1.6 The ducts shall be manufactured from thermoplastic material. The internal bore shall be smooth and even. The external surface shall be even or corrugated in the longitudinal section. The ducts shall be twin walled. Non homogeneous ducts with honeycomb or foam filled construction between the inner and outer surfaces shall not be permitted.</p> <p>1.7 The longitudinal, transverse and local ducts shall meet BS EN 50086-2-</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>4 and be classified as "Normal duty" and rigid. These ducts will be supplied and laid in lengths no greater than 6 metres and be jointed using compatible couplers, sealing rings and lubricant. Rigid smooth walled pre-formed bends and junctions shall be used. Pliable or flexible ducting shall not be used to provide a continuous route.</p> <p>1.8 The nominal sizes of the ducts shall be as described in the New Works Requirements. The minimum internal diameters shall be 150 mm, 100 mm and 50 mm.</p> <p>1.9 The external wall of the ducts shall be coloured black for all Traffic Scotland installations regardless of whether they contain power or communications cable.</p> <p>1.10 The materials from which the duct and fittings are made shall be treated so that they are protected from the deleterious effects of short term exposure to ultra violet light and shall be resistant to degradation by acids, alkalis, common chemicals, bacteria, fungi, and moulds occurring in soils. The Company shall protect the duct and fittings on site in accordance with the supplier's recommendations.</p> <p>1.11 Each duct shall be fitted with a pigmented, stranded polypropylene or equivalent rot-proof material draw cord of 5kN breaking load and having a design life of not less than 20 years, the ends of which shall be secured within the chamber or enclosure to which the duct is terminated. Draw cords shall be secured to the duct plugs where fitted. Draw cords shall not be knotted within ducts; where a joint is required it shall be a spliced joint.</p> <p>1.12 The duct network shall be sealed in compliance with Clause 1533.</p> <p>1.13 Ducts containing Traffic Scotland cables or power cables for motorway communications systems installed on motorways shall be clearly and permanently marked with the legend "MOTORWAY COMMUNICATIONS /POWER" in two, diametrically opposite, planes. The ducts shall be installed such that the legend is uppermost. The method of marking shall not affect the integrity of the duct. This marking is in addition of the markings required in the BS EN 50086 series. The method marking and the durability test shall comply with the BS EN 50086 series.</p> <p>1.14 Each duct shall be fitted with a proprietary branded duct insert as shown in NDX1063-00.</p> <p>1.15 Four and six way ducts shall be supplied with purpose made spacers and strapping as indicated on drawing NDX1063-00. The strapping shall bind the ducts tightly in the specified formation during installation, back-filling and for the whole life of the duct. The spacing of the strapping shall be such that the ducts shall not separate by more than 50 mm; this spacing would typically be 1m. The contact area between spacer and duct shall be large enough to ensure that the spacer cannot penetrate or distort the walls of the duct.</p> |

| <b>1531A</b>  | <p data-bbox="359 571 1436 604"><b>1 Installation of Ducts</b></p> <p data-bbox="359 616 1436 1019">1.1 Ducts shall be laid at the level as shown in NDX1063-00 and at a typical offset of 2 metres from the edge of the carriageway. Longitudinal ducts shall generally be run parallel to the edge of the hard shoulder. Transverse ducts shall run at right angles to the carriageway. The exact location of the ducts shall be in accordance with the drawings or where applicable the Company's Design. All ducts shall terminate in an access chamber. Excavations shall comply with Clauses 502 and 602. Immediately following the excavation of the trench, the ducts shall be jointed and laid on the bedding material. Newly laid ducts shall not deviate unnecessarily from straight such as to cause undue loading on the cables during installation. The deviation in level from that specified at any point shall not exceed 50mm</p> <p data-bbox="359 1041 1436 1176">1.2 Ducts and fittings shall be examined for damage and the joint surfaces and components shall be cleaned immediately before laying. Measures shall be taken to prevent soil or other material from entering ducts, and to anchor each duct to prevent movement before the work is complete.</p> <p data-bbox="359 1198 1436 1332">1.3 Cable ducts shall comply with the appropriate British Standard and shall be tested in accordance with Clause 1533. Ducts with push-fit joints shall have a register and clear markings to ensure that the duct joint is fully engaged.</p> <p data-bbox="359 1355 1436 1411">1.4 Cable duct configurations, bedding, haunching and surround shall be as shown on drawing NDX1063-00.</p> <p data-bbox="359 1433 1436 1489">1.5 Backfilling shall be undertaken immediately after the required operations preceding it have been completed.</p> <p data-bbox="359 1512 1436 1736">1.6 Trenches for the cable ducts shown on drawing NDX1063-00 shall be backfilled with Class 8 lower trench fill material, as described in Table 6/1 and in compliance with the 600 Series, which shall be placed above the surround material. The Class 8 material shall extend to within 150 mm of ground level. The material shall be spread and compacted evenly without dislodging, disturbing or damaging the ducts. Power hammers shall not be used within 300 mm of the ducts.</p> <p data-bbox="359 1758 1436 1892">1.7 For ducts shown on drawing NDX1063-00, top soiling, grass seeding and/or turfing as described in Clause 618 and 3005 shall be placed in the top 150 mm of the cable duct trench unless otherwise specified in the New Works Requirements.</p> <p data-bbox="359 1915 1436 2049">1.8 For ducts shown on drawing NDX1063-00 marker tape shall be laid within the trench excavation at a depth of 150 mm or at the class A/topsoil interface whichever is the greater. The marker tape shall comply with Clause 1511.</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>1.9 Prior to mandrelling, the Company shall swab through each duct to clear all debris.</p> <p>1.10 Ducts that are laid across or within the filter drains (French drains) shall be surrounded with 150 mm of mix ST2 concrete in compliance with Clause 2602. In the event that the route of a duct comes within 500mm of the line of a filter drain then either an alternative line shall be determined or precautions taken to ensure that the granular infill used to surround the ducting cannot, over time, compromise the integrity of the filter drain by migration of the infill material into the drain. Any damage caused by the Company to any drain shall be repaired to the satisfaction of the Overseeing Organisation and at no cost to the Contracting Authority.</p> <p>1.11 Unless otherwise described in the New Works Requirements the Traffic Scotland Equipment duct network comprises of :</p> <ul style="list-style-type: none"> <li>(a) quad 100mm inside diameter sealed longitudinal communication ducts installed along both verges terminating at each roadside longitudinal Type A chamber constructed at each equipment site and at transverse duct locations and additional locations such that no duct run is greater than 250m. A nominal spacing of Type A chambers shall be 250m centres. Additional Type A chambers shall be provided where changes of level or direction occur.</li> <li>(b) Six way 100mm inside diameter sealed communication ducts at carriageway cross connection points terminating at each roadside longitudinal Type A chamber at frequencies detailed in the New Works Requirements and at both extents of entry/exit slip roads.</li> <li>(c) single 100mm inside diameter local ducts as typically shown in NDX1063-00;</li> <li>(d) Single 50mm inside diameter local ducts as NDX1063-00 to provide for cables connecting to the Emergency Roadside Telephones.</li> <li>(e) Single 150 mm inside diameter local power ducts for power cable connection from Termination Pillar to Traffic Equipment Distribution Pillars where not local to the CEC.</li> </ul> |
| <b>1532A</b>  | <p><b>1 Chambers for Traffic Scotland Cables</b></p> <p>1.1 Chambers shall be either a Type A, B, C or Loop chamber (Type D). Chambers Type A, B and C are rectangular in plan with a standard plan size and are constructed so that their covers are raised 50mm above the level of the adjacent ground. Type A and B are shown in the drawings NDX1063-01 and NDX1063-02. Type C is shown on NDX1063-03. The construction of the Detector Loop roadside chamber is shown in NDX1063-04.</p> <p>1.2 Chambers shall be used solely for Traffic Scotland Equipment.</p> <p>1.3 Unless otherwise described in the New Works Requirements, the</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>following chamber types shall be installed at the locations as follows:</p> <ul style="list-style-type: none"> <li>(a) Type A chambers shall be placed between 400m and 500m intervals along the length of the longitudinal ducts in both verges. The chambers shall be installed at the same chainage in both verges. Additionally, six way transverse ducts installed at gantry locations and at 400-500m intervals.</li> <li>(b) Type A intermediate chambers shall also be installed in both verges along the longitudinal ducts midway between chambers detailed in the sub clause 1532.3SR (i) so providing duct access at between 200 and 250m intervals. At these intermediate chambers no transverse ducts are required to be installed. .</li> <li>(c) A cable stowage Type C chamber shall be constructed adjacent to all individual or group of communications cable termination cabinets and at other locations where cable service loops are required.</li> <li>(d) Additional Type A chambers where Traffic Scotland Equipment site is not adjacent to the Type A chambers detailed in sub clause 1532.3SR (i) and (ii)</li> <li>(e) Additional Type A chambers for cable access shall also be constructed wherever the associated ducts change level or direction;</li> <li>(f) Type A or Type B chambers shall also be constructed as required to accommodate local ducting containing Electricity supply or Private wire interface cables.</li> </ul> <p>1.4 Roadside Loop Chambers shall be installed in the verge adjacent to each Traffic Scotland vehicle detection site and each National Traffic Data Service vehicle classification detection site.</p> <p>1.5 Foundations to chambers shall be of mix ST4 concrete in accordance with Clause 2602.</p> <p>1.6 Brickwork shall comply with the 2400 Series and be built with mortar designation (i) in English bond. The joints of brickwork where exposed shall be finished as specified for un-pointed joints in Clause 2412. The ends of all ducts shall be neatly built into the brickwork and finished flush with mortar designation (i).</p> <p>1.7 Chambers not exceeding 1.3 metres in depth to invert may be constructed from complete plastic units or other units in equivalent material. Where the units do not meet the loading requirements of BS 5911: Part 200, they shall be surrounded by 150 mm of mix ST4 concrete. Where preformed plastic chambers are used with duct entries then correctly located round duct access holes shall be core cut to provide a clearance fit on each duct. The outer surface of the ducts shall be sealed against the chamber wall using epoxy putty or similar as required by the manufacturer’s instructions. No more than 6 off 100mm diameter ducts shall enter on a single wall. Unless otherwise agreed</p> |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>with the Overseeing Organisation plastic chambers shall be installed in accordance with, the manufacturer's instructions and this Series 1500.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 1.8           | <p>Where the depth of invert of chambers exceeds 900 mm below the finished surface of the carriageway or the adjacent ground, manhole steps complying with BS 1247: Part 1 or Part 2 shall be built in as specified in BS 5911: Part 200. Steelwork fittings shall comply with BS 970: Part 1 and be galvanised in compliance with Clause 1909 after fabrication. Threaded components shall be galvanised in compliance with Clause 1909. The depth of chambers shall not exceed the dimensions given in the NDX series drawings.</p>                                                                                                 |
| 1.9           | <p>Excavation around chambers shall be backfilled with general fill materials as described in Table 6/1 and compacted in compliance with Clause 612. Where mechanical compaction is impracticable, the excavation shall be backfilled with mix ST2 concrete complying with Clause 2602. Where there are pre-cast concrete access shafts to pre-cast or similar concrete chambers, the shafts shall be surrounded by a minimum thickness of 150 mm of mix ST4 concrete, and the remaining excavation backfilled with general fill material as described in Table 6/1 compacted in compliance with Clause 612 of the Specification.</p> |
| 1.10          | <p>Chamber covers and frames shall be suitable for purpose to comply with BS EN 124 and be agreed by the Overseeing Organisation. Special duty covers for use in carriageways and other special situations shall be as agreed with the Overseeing Organisation.</p>                                                                                                                                                                                                                                                                                                                                                                   |
| 1.11          | <p>A concrete apron shall be provided at all Traffic Scotland chambers in accordance with the NDX Drawings. Such aprons shall be constructed to provide adequate surface run-off and should generally be arranged to form a continuous and level hard standing area joining with the access pathway and other such adjacent paved or concrete aprons. Under no circumstances should the chamber apron form any part of safety fence foundations or similar civils construction.</p>                                                                                                                                                   |
| 1.12          | <p>Four sets of lifting keys shall be delivered to the Overseeing Organisation for each type of cover supplied. Additionally, a suitable cover lifter shall be delivered to the Overseeing Organisation.</p>                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 1.13          | <p>Frames for chamber covers shall be set in cement mortar designation (i) complying with Clause 2404 or a suitable proprietary quick setting mortar of equivalent strength.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 1.14          | <p>Chambers shall be constructed with a sump as shown in the NDX Drawings. This sump shall be constructed to drain into a soak away immediately below the chamber. It is a requirement of this specification that the chamber drainage is adequate to minimise the accumulation of water in the chamber. Under no circumstances should running water be allowed to drain through the chambers.</p>                                                                                                                                                                                                                                    |
| 1.15          | <p>Chambers shall be clearly identified by the legend "MOTORWAY COMMUNICATIONS"; the lettering shall be 25 mm high and shall be embossed into each cover. Where covers have a concrete infill a plate</p>                                                                                                                                                                                                                                                                                                                                                                                                                             |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|               | <p>manufactured from a non-corrodible metal or steel, galvanised in accordance with Clause 1909, shall be cast into the concrete flush with the concrete surface.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>1533A</b>  | <p><b>1 Proving and Testing of Ducts</b></p> <p>1.1 Longitudinal and transverse ducts shall be proved by drawing a wooden or plastic mandrel as shown on HCD Drawing I2 through the ducts. Local ducts shall be proved by drawing through each length of completed duct a spherical mandrel of a diameter 10% less than the nominal bore of the duct. On the successful completion of each mandrel pull the Company shall certify compliance of the duct and immediately plug the duct in accordance with Clause 1530.</p> <p>1.2 All longitudinal and transverse ducts shall be tested in sections, e.g. between chambers, by means of the air test described in sub-Clause 3 of this Clause after backfilling. On the successful completion of each test the Company shall certify compliance of the duct and immediately plug the duct in accordance with Clause 1530.14</p> <p>1.3 To undertake the air test, air shall be pumped into the duct by suitable means until a stable pressure of 100 mm head of water is indicated in a U-tube connected to the system. The air pressure shall not fall to less than 75 mm head of water during a period of five minutes without further pumping, after an initial period to allow for stabilisation.</p> <p>1.4 A register of mandrel and air test certificates shall be maintained by the Company and handed to the Overseeing Organisation on the successful completion of the ducting work.</p> <p>1.5 Unless otherwise described in the New Works Requirements, the Company shall provide and install in the end of every duct at every point of entry into cabinets, purpose made push fit duct inserts/end caps. These inserts/end caps will be installed in a fashion to allow the polypropylene draw cord to pass through. NDX drawing 1063-00 sheet 7 of 10 refers.</p> |
| <b>1534A</b>  | <p><b>1 Closed Circuit Television</b></p> <p>1.1 Closed Circuit Television (CCTV) typically consists of cameras, associated masts, Pan Tilt and Zoom (PTZ) units, camera mast cables and video transmission equipment.</p> <p>1.2 At sites remote from gantry locations, the Company shall design and install a camera mast foundation in accordance with the standards detailed in the mast manufacturer's instructions, the New Works Requirements and typically described in the NDX1010 Series Drawings.</p> <p>1.3 All Sites shall be designed and configured to enable safe maintenance and access.</p> <p>1.4 At gantry locations, the Company shall design and install a camera</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>most fixing arrangement in accordance with the standards detailed in the mast and CCTV manufacturer's instructions, the New Works Requirements and the Agreement Drawings.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>1535A</b>  | <p><b>1 Variable Message Signs</b></p> <p>1.1 Variable Message Sign equipment will consist of a variation of Sign types and mounting arrangements as stated within the New Works Requirements.</p> <p>1.2 Where the Company provides and installs VMS foundations and associated infrastructure these shall be in accordance with the standards and requirements detailed in the Agreement Documents. NDX1001-02 describes a typical ladder arrangement to satisfy the access requirements of the equipment to be installed.</p> <p>1.3 Cabinet types shall be in line with typical gantry requirements.</p> <p>1.4 Any ducting required to pass through the foundation shall comply with the New works Information.</p>                                                                                                                                                                                                                                                                                                                                                          |
| <b>1536A</b>  | <p><b>1 Traffic Monitoring Units</b></p> <p>1.1 Traffic Monitoring Units shall be installed in the types of cabinets as described in the New Works Information.</p> <p>1.2 Cabinets housing TMU's shall be co-located at other Traffic Scotland Equipment sites. The length of feeder cable connecting the loop tails to the TMU shall not exceed 200 metres. Within the cabinet housing the TMU the loop feeder cables shall be terminated in terminal blocks complying with Clause 1514, secured to the equipment frame. Terminal screw tightness shall be within the range 0.4 to 0.6 Nm. Each feeder cable shall have a minimum of 3 metre of cable coiled in the chamber adjacent to the Cabinet housing the TMU to allow for subsequent re-terminations. Each feeder cable shall be individually identified in compliance with NDX1061-00.</p> <p>1.3 Where a standalone TMU site is required the Company shall provide all power and hard landscape in compliance with that required of any Traffic Scotland Equipment site and detailed in the New Works Information.</p> |
| <b>1537A</b>  | <p><b>1 National Traffic Data Service Detectors and Equipment</b></p> <p>1.1 An NDS site comprises of loop detectors providing vehicle parameters for all lanes and hard shoulders in both directions and NDS vehicle count equipment. Unless otherwise described in the New Works Requirements. NDS sites shall be installed in addition to Traffic Scotland vehicle detection sites but shall be co-located with a Traffic Scotland Equipment site unless specifically required to be standalone.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>1.2 Where a standalone NDS site is required the Company shall provide all power and hard landscape in compliance with that required of any Traffic Scotland Equipment site and detailed in the New Works Requirements.</p> <p>1.3 The NDS Detectors and NDS equipment shall be provided as described in the New Works Requirements and this 1500 series.</p> <p>1.4 NDS equipment shall be installed within a specialist Transport Scotland Issued Equipment cabinet, suitably located and protected in full compliance with TD19.</p> <p>1.5 A D type chamber shall be provided adjacent to the cabinet for loop tail stowage.</p> <p>1.6 The distance between where the loop tails enter the verge and the detector unit shall not be more than 200 metres including any stowed loop tails.</p>                                                                                                                                                                                                                                                                                                                                                                         |
| <b>1539A</b>  | <p><b>1 Paved Areas, Access Paths, Access Steps and Hard standings</b></p> <p>1.1 Paved areas, access paths, access steps, handrails and hard standings shall be provided at each existing and new Traffic Scotland equipment site that the Company shall require to modify or provide. Each existing and new equipment site is unique and the Company shall provide and install paved areas, access paths, access steps, handrails and hard standings appropriate to each new and existing site.</p> <p>1.2 The general requirements for paved areas, access paths, access steps and handrails shall be as typically shown on NDX Drawings and detailed within the New Works Information.</p> <p>1.3 Hard standings shall be of a size and construction to provide safe parking of a vehicle off the hard shoulder. Such an arrangement shall be contiguous with the access pathway to the Traffic Scotland equipment and provide safe access for the maintenance engineer. Unless installed adjacent to an Emergency Roadside Telephone installation, the hard standing shall be constructed from open cementitious block and be typically as shown in the NDX1072-00.</p> |
| <b>1540A</b>  | <p><b>1 Required Documentation</b></p> <p>1.1 TR1100, and subsequent Scottish Amendments to TR1100 shall be considered as a general guide to Traffic Scotland deliverable documentation requirements. The final overall documentation package relating to the Traffic Scotland Equipment shall reflect inter alia the contents, requirements, structure and format as described in the Traffic Scotland NDS9001 'Traffic Scotland Health and Safety File Requirements and Model Forms'. Any significant changes with respect to this requirement shall be agreed with the Overseeing Organisation.</p> <p>1.2 All final As-Built Documentation as required by this Clause 1540SR forming all or part of the Traffic Scotland deliverable documentation</p>                                                                                                                                                                                                                                                                                                                                                                                                                   |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|               | <p>shall be provided in accordance with the New Works Information.</p> <p>1.3 Documentation shall be made available to the Overseeing Organisation on request relating to Traffic Scotland Equipment until issue of the Performance Certificate.</p> <p>1.4 The Company shall provide new Traffic Scotland documentation in a style and format identical to the existing Traffic Scotland documentation as indicated in the Traffic Scotland Equipment Manual, the Traffic Scotland Maintenance Manual and the Traffic Scotland drawings. Where the Company is required by the Agreement to update existing Traffic Scotland documentation the Overseeing Organisation shall release the necessary Traffic Scotland documentation to the Company and the Company shall update the documentation. All such updated documentation shall be presented to the Overseeing Organisation for approval.</p> <p>1.5 The Company shall use current versions of AutoCAD™ computer software and Microsoft Word/Excel to provide or modify all Traffic Scotland Equipment documentation. All soft versions shall be supplied without any software restriction and shall be capable of being modified by the Overseeing Organisation. The standards and procedures for all CAD Drawings provided under the requirements of this Agreement shall comply with the New Works Information. All test results and test certificates shall be produced in a suitable software format or by an industry standard software package.</p> <p>1.6 An up to date Drawing/Document Register will at all times be maintained reflecting issue, revision dates, status and application. All changes to drawings, or documents, shall be indicated by a change of issue.</p> <p>1.7 Location measurements shall be taken of the underground equipment to the nearest 100mm from the nearest edge of the carriageway or fence line. Offsets to the cables/ducts shall be recorded at 20 metre intervals and at every change of direction along the line of the cable/duct. Offsets shall be defined longitudinally by distance from a permanent highway feature, a marker post or other point and agreed with the Overseeing Organisation. All details shall ensure compliance with the requirements of the Agreement relating to the NRSWA.</p> |
| <b>1541A</b>  | <p><b>1 Journey Time Equipment</b></p> <p>1.1 Journey time equipment shall be as described in the New Works Information</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>1542A</b>  | <p><b>1 Communications Equipment</b></p> <p>1.1 Communications equipment shall be as described in the New Works Information.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

**Appendix 0/5: Special National Alterations of the Overseeing Organisation of Scotland, Wales or Northern Ireland**

| Clause Number | Title                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| N/A           | <b>1 Appendix A, Page 8</b><br>1.1 Delete Note 2 and replace with the following:<br>The implementation date of this scheme is the Base Date.                                                                     |

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority****1 Accommodation Required**

- 1.1 Office Accommodation for Period 1.
- 1.1.1 An integrated office building facility, on no more than two levels, comprising accommodation for shared occupation by the Contracting Authority and the Company shall be provided by the Company as the principal office with a single joint entrance and reception area, including shared conference room and messing facilities, car parking and security arrangements.
- 1.1.2 The principal office and hall accommodation shall accommodate up to forty five staff (Contracting Authority staff). Should the Company elect to utilise any satellite office(s) remote from the principal office, accommodation and equipment shall also be provided within each such satellite office for up to ten Contracting Authority staff.
- 1.1.3 The office buildings shall be constructed of secure 'anti-vandal' steel shell office-accommodation units or any system deemed suitable for temporary accommodation of this nature which is acceptable to the Contracting Authority. If proprietary units are proposed the Company shall provide a certificate from the manufacturer stating that the units have a design life of more than 10 years.
- 1.1.4 The office building facilities shall be connected to existing mains water, 240 volt AC electricity supply, and telecommunication utilities for provision of water, heating, lighting, telephone and broadband. The office building facilities may be connected to existing mains gas, should the Company wish to use gas, for cooking and/or heating purposes.
- 1.1.5 Sewage disposal shall be either direct to an existing piped mains facility or specially provided septic tank which shall be regularly serviced.
- 1.1.6 The office buildings shall comply with and be maintained to comply with the Construction (Health, Safety and Welfare) Regulations 1996. The Electricity at Work Regulations 1989 shall be complied with in all respects in the case of equipment and furnishing of rooms in the office buildings. The buildings and access routes shall also comply with the Disability Discrimination Act 2005 and the Equality Act 2010.
- 1.1.7 Prior to occupation the Company shall have the buildings appropriately certified by the local authority and Fire and Rescue Services as suitable for occupation and use intended.
- 1.1.8 The office accommodation for the use of the Contracting Authority and all facilities to be shared with the Company shall be to a high standard of, including but not limited to, structural integrity, aesthetics, internal finishing, equipment and furniture as described below.
- 1.1.9 The location and layout of the integrated office facilities shall be wholly acceptable to the Contracting Authority whilst conveniently located in close proximity to, and possibly overlooking, the construction works. The integrated office building facilities shall be set apart from the Company's site operations plant store and depot and routes used by construction traffic. Car parking areas shall be set apart from plant, machinery and construction vehicle storage / parking areas.
- 1.1.10 The office buildings shall also be provided with a separate entrance and lobby area away from the main entrance, conveniently located within its layout for direct access by personnel of the Contracting Authority and Company when either visiting or returning from the New Works Site for purpose of changing into or removing/cleaning and storing boots and safety gear.
- 1.1.11 Doorway entrances and access-ways to the office buildings shall comply with the Disability Discrimination Act 2005 and shall be provided with suitable handrails.

---

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

- 1.1.12 The Company shall form a 3 metre wide access from the public road and provide car parking at the principal office allowing space for 40 number Contracting Authority vehicles and 10 number visitor's cars. Parking space for the Contracting Authority for six cars shall be provided at any satellite offices.
- 1.1.13 Fire exit routes from the office buildings shall be in accordance with relevant safety standards and shall be approved by the Fire and Rescue Services. Exit routes shall, as a minimum, be of concrete slabs or bituminous surface free from steps and other obstacles and shall be constructed so as to enable rapid and efficient drainage.
- 1.1.14 All road surfaces and access to the public road connected with the office buildings shall be constructed on prepared ground and covered with bituminous surfacing and have positive drainage.
- 1.1.15 The access roads and car park areas shall have a bituminous surface and the access roads shall be kept clear of snow, ice, frost, mud and debris and shall not be used by construction plant. Car parking areas shall be kept clean. Cleaning shall generally be undertaken at times when vehicles used by the Contracting Authority or its staff or representatives, and visitors are not present.
- 1.1.16 The Company shall consult and comply with the Contracting Authority with regard to the entire integrated layout and specification of the office building facilities that the Company intends to provide, based on the requirements stated in this Appendix.
- 1.1.17 The Company shall provide a Consultation Certificate in accordance with the Certification Procedure in respect of this requirement, prior to commencement of any work in connection with these building facilities.
- 1.1.18 The integrated office building (or units) facilities shall be adequately guarded at all times to ensure no unlawful or unauthorised entry.
- 1.1.19 The integrated office buildings (or units) facilities shall fulfil the following construction requirements and operational conditions as a minimum requirement:
- a) The office buildings shall be erected on pre-prepared under-building of brick or concrete dwarf walls founded on concrete strip-footings with damp-proof course.
  - b) The underside of the external walls and floors of the office-building shall not be less than 400 millimetres above surrounding ground level.
  - c) Floors of the office shall be of tongue and groove timber, lined with hardboard or plywood and covered with vinyl floor covering\* (\*Wall to wall carpet overlay shall be provided in particular rooms occupied by the Contracting Authority and Contracting Authority's Representatives as indicated in the list below. The carpet overlay shall be a tufted loop high wear material suitable for an office environment. It shall be treated to prevent stains and water ingress and shall have a wear life of over 10 years).
  - d) The buildings shall comply with part L2 of the Building Regulations
  - e) External walls shall provide a minimum u-value of 0.35 watts per square metre per kelvin. Internal walls shall be smooth with coloured sustainable paint finish.
  - f) Headroom shall be not less than 2.25 metres.
  - g) Ceilings shall be plasterboard and finished with two coats of white sustainable paint. They will provide a minimum u-value of 0.35 watts per square metre per kelvin.
  - h) The office buildings shall be completely weatherproof and watertight. Windows shall comprise double-glazed sealed units or equivalent with window-area being

## Part 4: Specification

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

not less than 2 square metres for every 10 square metres of floor area and with each window having opening facility for at least one-third of the window size.

- i) All windows shall be fitted with external security roller-shutters operated internally for purpose of security and Venetian-type blinds shall be fitted internally.
- j) All pipe-work shall be suitably lagged and/or insulated to prevent freezing.
- k) All internal doors to rooms shall be fitted with mortice-locks and one set of keys per occupant plus one spare set for rooms occupied by the Contracting Authority and Contracting Authority' Representatives shall be handed over to the Contracting Authority.
- l) The Company shall record the distribution of all room-keys and control additional issue of room-keys.
- m) The external doors shall be fitted with draught excluders and mortise locks, whilst the doors to the entrance and reception area shall be fitted with an electronic opening and closing / locking device operated by means of electronic smart-card.
- n) The Company shall provide smart-cards for use by individuals in the Contracting Authority' staff and shall record the distribution of all smart-cards.
- o) The offices shall be provided with 13 amp socket outlets suitably spaced and provided around the office on the basis of 2 dual gang socket for each 5 square metres of office space.
- p) The offices shall be adequately provided with heating and lighting in accordance with Section 9 below.
- q) Within the integrated office building facilities, the Company shall provide individual office space / rooms for the sole use of the Contracting Authority's staff excepting in cases where staff and /or representatives of the Contracting Authority and the Company are carrying out comparable duties in which case such office space and rooms shall be occupied by the Contracting Authority and the Company.
- r) The office building facilities including both individual office space/rooms and the jointly occupied office space/rooms and facilities provided for use by the Contracting Authority shall include furniture, fixtures and fittings, equipment, stores, protective clothing, and surveying equipment and supplies as listed below, for the Contracting Authority exclusive use and shall be regarded as the minimum requirement.
- s) All furniture, fixtures and fittings, equipment, stores, protective clothing, surveying equipment, computers, computer peripherals software and all supplies for the Contracting Authority's exclusive use shall be new and unused
- t) Complete security, privacy and confidentiality shall be ensured at all times in the rooms and for all facilities including computers and peripherals which are provided for contract administration activities undertaken by the Contracting Authority as described below.
- u) All the telecommunication lines and facilities provided for use by the Contracting Authority as described below, shall be completely independent of the Company's facilities, shall ensure privacy and confidentiality and shall be as a separate account.
- v) The layout and particular room requirements of that part of the office building facility occupied by the Contracting Authority and Contracting Authority's Representatives shall have minimum floor areas as listed in the table below:

| 8        | Set of 3 tier filing tray                                                                                                                                                                                                                                                                                                                                                                |
| 1        | Name plate on door (names as advised by the Contracting Authority).                                                                                                                                                                                                                                                                                                                      |

The Contracting Authority intend to arrange desks in pods of 4 desks adjacent to each other. The Company shall provide sufficient desk mounted screens to be provided on desks which are facing each other, approximately 0.4 metres high, and shall fix these to the desks, as requested by the Contracting Authority.

The Company shall install a photocopier / multi-function device, specification as per Section 4.6.2 below, in one of the rooms of Type M, as requested by the Contracting Authority.

The Company shall install a CAD-PC, specification as per Section 4.4 below, instead of a PC in two of the rooms of Type M, as requested by the Contracting Authority.

**2.2.9 ROOM N Storage Room**

| 1                  | Electric wall-mounted hand drier (low energy use)                                                                             |
| 1                  | Dispensers with selection of barrier creams, sunscreens (high factor) and heavy duty hand cleaner (replenished when required) |
| 2                  | Liquid soap dispensers with supply of liquid soap, or supply of soap (replenished when required)                              |
| 2                  | Wall mirrors 800x600 millimetres                                                                                              |
| 1                  | Set of four coat hooks – wall mounted                                                                                         |
| 1                  | Window or external wall mounted powered extractor fan                                                                         |
| 1                  | Shower room and changing area (Room U) with electrical socket points in separate compartment with door off main toilet area   |

\*\* Numbers to be as required by relevant standards / regulations to service number of personnel at office

---

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority****3 Weather Recording Apparatus**

- 3.1 The Company shall set up and maintain, at a minimum of 4 positions to be determined by the Contracting Authority, apparatus comprising: maximum/minimum thermometer in a standard shelter and a rain gauge for daily reading. The Company shall supply and maintain a portable anemometer provided with tripod and recording device. The Company shall record daily readings on the rain gauge and anemometer in a format to be agreed with the Contracting Authority and shall provide the readings to the Contracting Authority on a weekly basis, or as when requested by the Contracting Authority.

**4 Computer Equipment****4.1 General Requirements**

- 4.1.1 All the equipment listed below shall be provided new when the principal offices are provided and shall be installed in the respective rooms described above in the preceding Section 2. The computer equipment specified in Section 1.21 above for use in the temporary accommodation forms part of the overall computer equipment requirements defined in Section 2 and shall be relocated to the principal offices by the Company and installed, as requested by the Contracting Authority.
- 4.1.2 All the equipment listed below shall be maintained by the Company up to the issue of the Final Completion Certificate plus 12 months unless otherwise stated. The equipment shall be installed and commissioned by a reputable quality assured supplier (BS EN ISO 9001). The equipment shall be covered by a hardware maintenance contract with an eight hour maximum response time for repair or replacement.
- 4.1.3 The Company shall maintain and replace computer equipment as necessary. The Company shall provide software support for all equipment until the end of Period 2 unless otherwise stated.
- 4.1.4 The equipment in this Section is indicative of the specification and standard of equipment required by the Contracting Authority. The Contracting Authority considers the equipment in this Section to be mid-range equipment in March 2013. The Company shall provide computer equipment which is acceptable to the Contracting Authority as being appropriate mid-range equipment at the Effective Date.
- 4.1.5 The Company shall update computer operating systems and software when updated by the vendor.
- 4.1.6 Notwithstanding the requirement of Section 4.14 above, the Company shall upgrade the operating systems and software on the computer equipment to the most up to date versions three years after the Effective Date.
- 4.1.7 Any equipment that is replaced during the period of use by the Contracting Authority shall be replaced with equipment which is acceptable to the Contracting Authority as being appropriate mid-range equipment at the time.

**4.2 Laptop/notebook computers**

- 4.2.1 Laptop / notebook computers shall be retained by the allocated users for the duration of the New Works plus 5 years
- 4.2.2 Laptop / notebook computers shall not be configured in such a manner as to restrict or permit use only on site when connected to the network. Laptops shall be configured to permit use outside of the offices.
- 4.2.3 The equipment shall all be installed in the respective rooms described above in the preceding Section 2 according to the details specified below; these are regarded as

Part 4: Specification

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

typical and alternative suppliers may be considered; the details of the entire package of computers and peripherals shall however be agreed with the Contracting Authority:

4.4 Desktop CAD Personal Computers (CAD-PCs)

4.4.1 CAD Personal Computers shall be installed in the respective rooms described above in the preceding Section 2 according to the details specified below; these are regarded as typical and alternative suppliers may be considered; the details of the entire package of computers and peripherals shall however be agreed with the Contracting Authority:

|                                                         |                                                                                     |
|---------------------------------------------------------|-------------------------------------------------------------------------------------|
| Dell Precision T5600 or similar approved performance PC | Intel® Xeon® Processor E5-2643 (Quad Core, 3.30GHz Turbo, 10MB, 8.0 GT/s) (Minimum) |
|                                                         | 16GB (4x4GB) 1600MHz DDR3 ECC RDIMM (Minimum)                                       |
|                                                         | 600GB 2.5inch SAS (10.000 Rpm) Hard Drive (Minimum)                                 |
|                                                         | Optical Drive 16X DVD+/-RW Drive                                                    |
|                                                         | 2 GB NVIDIA Quadro 4000 (2DP & 1DVI-I) (1DP-DVI & 1DVI-VGA adapter) (Minimum)       |
|                                                         | Onboard Sound Card                                                                  |
|                                                         | Ethernet Intel PRO/1000 Gigabit                                                     |
|                                                         | Full Size Keyboard                                                                  |
|                                                         | Optical Wheel Mouse                                                                 |
|                                                         | Tower case                                                                          |
|                                                         | Microsoft® Windows® 7 Professional 64 bit                                           |
| Two 19 inch flat screen monitors                        |                                                                                     |

4.5 Network (LAN)

4.5.1 The Company shall provide the following:

- a) An Asynchronous Digital Subscriber Line (ASDL) or ISDN line for six concurrent users
- b) All routers, hubs, cabling and connections required to connect six concurrent users to the ADSL/ISDN line and also to the network server.
- c) One desktop pc is required to have two hard drives to double as a network server. The server shall have a degree of hardware redundancy built in by utilising hard drive mirroring or similar.
- d) The network shall be installed by the Company to facilitate free access to internet and enable inter-office communication via email.
- e) The Company shall provide a web based collaboration and document management system which shall be capable of handling the data requirements of the Company and the Contracting Authority, with respect to drawings and documentation generated by both parties during the New Works.
- f) The Company shall provide free wi-fi access to the internet within the Office Accommodation for Period 1 and Period 2, and within the Temporary Initial Office Accommodation.

4.6 Ancillary Equipment

4.6.1 Computer Software - All of which shall be the most up to date version available at the Date of Award of Contract.

## Part 4: Specification

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

- 4.6.2 The following software shall be installed on each computer, but not be limited to, while each full set of the disks and documentation shall be supplied for each set of software installed to the Contracting Authority.
- a) Full installation of Microsoft Office Professional 2013 onwards;
  - b) PC Security packages (Antivirus, firewall, Anti-Spyware etc.) with daily updates or as updated by the vendor (Symantec Endpoint Protection or similar);
  - c) CD / DVD authoring / writing software on all computers;
  - d) Adobe Reader 10 (on all computers except those with Adobe Acrobat 10 Pro);
  - e) CutePDF Writer or similar to allow creation of PDFs with no watermark or software labelling (on all computers except those with Adobe Acrobat 10 Pro);
  - f) DWG Viewer (Autodesk DWG Trueview 2010 or similar); and
  - g) encryption software using an industry standard encryption tool (BeCrypt or similar). The keyfile shall be stored in a secure location.
- 4.6.3 In addition to the software to be installed on each computer, the Company shall install the following on computers as requested by the Contracting Authority:
- a) Adobe Acrobat 10 Pro (3 copies to be provided);
  - b) AutoCAD 2013 (2 copies to be provided);
  - c) Microsoft Project 2013 (4 copies to be provided);
  - d) Primavera P6 Professional Project Management (4 copies to be provided); and
  - e) Adobe Creative Suite (3 copies to be provided)
- 4.6.4 **Printers**
- 4.6.4.1 The following are required to be installed in the respective rooms described in Sections 2:
- a) Lexmark C762DN colour laser printer or similar approved;
  - b) Lexmark T630 black and white laser printer or similar approved.
  - c) Canon LBP5970 colour A3 printer or similar as approved with extended warranty;
  - d) Plotter – Canon image PROGRAF iPF720 large format printer or similar as approved with extended warranty; and
  - e) Photocopier / multi-function device – Canon iR6880Ci or similar capable of A3 / A4 colour and black and white printing, as approved with extended warranty.
- 4.6.4.2 All equipment shall be provided new and installed and commissioned by a reputable Quality Assured supplier (BS EN ISO 9001). The equipment shall be covered by a hardware maintenance contract with an eight hour maximum response time for repair or replacement.
- 4.6.4.3 All photocopiers, printers and plotters shall be connected to the computer network (LAN) and shall have associated network software and cabling to allow use by all Contracting Authority' staff.
- 4.6.4.4 The photocopier / multi-function devices shall be capable of photocopying, printing from computers linked to the network, scanning / emailing documents, document stapling, faxing etc.
- 4.6.4.5 The Company shall maintain and replace all photocopier / multi-function devices, colour printers and plotter as necessary.

Part 4: Specification

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

4.6.4.6 The Company shall provide paper as required for the photocopiers, printers and plotters until the end of Period 2. Copying material, toner/ink, cartridges and paper shall be replenished as required

**4.6.5 Photographic and Video Equipment**

4.6.5.1 The following equipment shall be provided, installed, maintained, and replaced where required, by the Company:

- a) 20 digital cameras, also capable of recording video clips, and peripheral equipment including carry case (minimum specification as follows: Sensor resolution of 12 megapixels, optical zoom of 10x and 2 high speed memory cards, each of size of 8 GB) along with the associated software and cables for downloading pictures onto PCs and printing; and
- b) 1 digital camcorder utilising HDD disc media and peripheral equipment including carry case (minimum specification as follows: 2 megapixel CCD, optical zoom of 10x, digital zoom of 200x and screen size of 2.5 inches) along with the associated software and cables for downloading onto PCs. Additional disc media to be provided by the Company as requested by the Contracting Authority.

4.6.5.2 All photographic and video equipment shall be retained by the Contracting Authority for the duration of the New Works plus 5 years.

**4.6.6 Projector**

4.6.6.1 The projector mounted in Room Type D shall be compatible with the laptops specified in Section 4.2. The projector shall have a minimum resolution of SVGA 800x600 native.

4.6.6.2 In addition to the projector specified in Room Type D, the Company shall provide a standalone projector of the same specification but of suitable size to allow easy transportation, together with carrying case, cables and other ancillary items.

**5 Schedule of Surveying and Other Equipment**

5.1 The following equipment shall be for the exclusive use of the Contracting Authority and his staff, and shall be as described, or equivalent. The Company shall be responsible for the supply of labour and materials for cleaning and maintaining the equipment throughout the period of the New Works:

| Quantity | Item                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2        | Robotic Total Station with the following equipment and specifications:<br>(a) Fitted with absolute angle encoder with diametrical reading with standard deviation (DIN 18723) of 3" and minimum reading of 1" of arc. Distance accuracy of 1 millimetre + 2ppm (ISO 17123-4) with capability of measuring to 2.5 kilometres to a single prism. Capable of measuring to all types of prism targets including retro tape. Fitted with optical plummet. Servo drives with speed of not less than 115 degrees a second. Must support both passive locking to prisms and active tracking of prisms with infrared diodes. Typical search time to locate prisms should be specified at 2-10 seconds. The unit must be able to be fully controlled from the pole and be entirely cable-free.<br>(b) Logger at pole should be fully ruggedized (MIL-STD-810F); have a Windows Mobile operating system and a battery life of up to 30 hours. Application programs to be included – surveying, free station, stakeout, reference line / arc, area calculations, measure rounds, traverse adjustment and roading. The roading program should support the |

Part 4: Specification

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

| Quantity | Item                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|          | <p>reading and use of the industry standard MX GENIO format directly (without conversion to maintain integrity of the data). An optional monitoring program should be available as an upgrade if required.</p> <p>(c) Heavy duty wooden tripod, tribrach, 3 internal batteries, (4400Ah each), detail pole and large 360°circular prism fitted with 8 channel IR diodes run from an internal battery.</p> <p>(d) Half transverse kit comprising a heavy duty wooden tripod, tribrach, prism base, optical plummet and prism.</p> <p>If GPS technology is being used on the contract then the Company must supply a GPS(GNSS) receiver to meet the following specifications:</p> <ul style="list-style-type: none"> <li>(i) Completely cable-free 220 channel GNSS rover capable of tracking GPS frequencies (L1, L2, L2C &amp; L5) and GLONASS frequencies (L1, L2). Fully integrated radio or GPRS modem capable of receiving RTCM 3.x and CMRx corrections. Receiver should be fully ruggedized to IP67 rating.</li> <li>(ii) Accuracy (RMS) in Kinematic mode of 8 millimetres+1ppm in plan and 15 millimetres +1ppm in height. Accuracy (RMS) in Network RTK mode of 8 millimetres +0.5ppm in plan and 15 millimetres +0.5ppm in height.</li> <li>(iii) Initialisation reliability should be &gt;99.9% and standard time for initialisation should be less than 10 seconds.</li> <li>(iv) Logger at pole should be fully ruggedized (MIL-STD-810F); have a Windows Mobile operating system and a battery life of up to 30 hours. Application programs to be included – surveying, stakeout, reference line / arc, area calculations and roading. The roading program should support the reading and use of the industry standard MX GENIO format directly (without conversion to maintain integrity of the data).</li> <li>(v) Heavy duty wooden tripod, tribrach, GPS Tribrach adapter, 2 internal batteries, (2400Ah each) and detail pole.</li> <li>(vi) If a local transformation or calibration is being used by the Company, the parameters must be supplied.</li> </ul> <p>While the total station / GNSS receiver must meet all the above requirements, the total station / GNSS receiver shall not be to any lesser specification than that used by the Company’s staff and shall be compatible with the Company’s method of setting out / setting out data and equipment.</p> <p>The Company shall provide training as requested by the Contracting Authority on the operation and use of the Total Station.</p> |
| 2        | <p>Automatic level with minimum specification as follows: 30x magnification, accuracy per 1 kilometre double levelling of 0.8 millimetres, single measurement accuracy of 1.2 millimetres at 30 metres.</p> <p>Aluminium tripod with cover and strap for carrying.</p> <p>Aluminium staff and detachable staff bubble.</p> <p>Notwithstanding the above requirements, the automatic level shall not be to any lesser specification than that used by the Company’s staff.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## Part 4: Specification

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

| Quantity | Item                                                                                                                                                                                                                                                                                                                                                                 |                                                                        |
|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
|          | The Company shall provide training as requested by the Contracting Authority on the operation and use of the automatic level.                                                                                                                                                                                                                                        |                                                                        |
| 4        | Electronic cover meter (with facility for downloading to computer)                                                                                                                                                                                                                                                                                                   |                                                                        |
| 8        | 30 metre measuring steel tape                                                                                                                                                                                                                                                                                                                                        | To be renewed by the Company as requested by the Contracting Authority |
| 10       | 50 metre measuring fibron tape                                                                                                                                                                                                                                                                                                                                       |                                                                        |
| 5        | 30 metre measuring fibron tape                                                                                                                                                                                                                                                                                                                                       |                                                                        |

## Part 4: Specification

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority**

| Quantity | Item                                                                    |
|----------|-------------------------------------------------------------------------|
|          | 1 No Battery charger                                                    |
|          | 2 No Set of rechargeable batteries for CEL 162E above                   |
|          | 1 No Spare microphone windshield compatible with CEL 162E above.        |
|          | 1 No CEL 193 precision integrating impulse sound level meter.           |
|          | 1 No 12 millimetres foam microphone windshield compatible with CEL 193. |

5.2 The Company shall make available to the Contracting Authority the use of any other survey equipment on the New Works Site as required.

**6 Supply of Documentation**

6.1 The Company shall supply and maintain for the sole use of the Contracting Authority one copy, on compact disk from the Stationary Office (licensed for use by and up to 60 concurrent users), suitable for display on the equipment specified in Sections 4 of Appendix 1/1 of this Specification, the following documents:

- a) The Manual of Contract Documents for Highway Works;
- b) Design Manual for Roads and Bridges;
- c) Eurocodes;
- d) Traffic Signs Manual
- e) Current British Standard and Code of Practice or computerised equivalent all as referred to or cross referenced in this Contract, the Code of Construction Practice or used in the Design. Alternatively provision of access to an online electronic database for the Employer and staff e.g. IHS UK; and
- f) Relevant Road Notes.

6.2 All documents shall be current at the Effective Date.

**7 Safety and Protective Clothing**

7.1 Sets of the following shall be supplied new by the Company within 4 weeks after commencement of the New Works in sizes as required by the Contracting Authority.

| Quantity | Item                                                                                                                                                                                                                                                                                                                                                                             |

| 5               | Packs thin rubber bands                                                              |
| 5               | Packs large rubber bands                                                             |
| 40              | Erasers                                                                              |
| 1               | Pack of clear report binding covers, 100 sheets                                      |
| 6               | A4, one day to a page diary, provided in December of each year for use the           |

**10 Office Insurance**

- 10.1 The Company shall provide for the insurance against all risks, of the contents of the offices including the property of the Contracting Authority and his staff and representatives together with any staff of the Contracting Authority and representatives who may visit the offices from time to time. This includes personal effects required in the normal course of duty and other computer equipment supplied by the Contracting Authority.

**11 Heating and Lighting**

- 11.1 The offices shall be adequately provided with electric heating capable of maintaining a uniform room temperature of at least 20 degrees centigrade and shall be lit with electrical fluorescent diffused lighting to a standard acceptable for a drawing office to achieve a minimum of 500 lux measured at the horizontal tops of desks. An external light shall be provided over the entrance to the building shielded to prevent misleading traffic on any public road.

**Appendix 1/1: Temporary Accommodation and Equipment for the Contracting Authority****12 Required Time Duration for Providing and Maintaining Accommodation and Equipment**

12.1 Period 1: Period 1 means

12.1.1 The Principal Offices including their contents, access roads and hard-standings thereto, shall be available for occupation within 4 weeks of the Effective Date and shall be maintained and serviced until 13 weeks after the issue of the Final Permit to Use Certificate.

12.2 Period 2: Period 2 means

12.2.1 The reduced office accommodation including contents applicable to the rooms defined, access road and hard-standings, shall be maintained and serviced from the expiry of the Period 1 until 26 weeks after the issue of the Final Completion Certificate.

**Appendix 1/2: Vehicles for the Contracting Authority**

**1 Vehicles for the Contracting Authority**

- 1.1 The following specification describes the vehicle requirements for the New Works.
  - 1.1.1 The vehicles shall be provided new and shall be maintained by the Company throughout the period required for the New Works as defined in Section 1.1.11 below. The Company shall supply all fuel and consumables throughout the period defined in Section 1.1.11 below. The vehicles shall be returned to the Company at the end of the period defined in 1.1.11 below.
  - 1.1.2 Vehicles shall be provided for the exclusive use of the Contracting Authority and its representatives.
  - 1.1.3 The Company shall ensure that replacement vehicles are provided for those being maintained or serviced or made unavailable to the Contracting Authority for any other reason.
  - 1.1.4 Vehicles shall be cleaned inside and outside by the Company once per week or as otherwise requested by the Contracting Authority.
  - 1.1.5 The Company shall provide secure parking for the vehicles when the vehicles are not in use.
  - 1.1.6 The Company shall indemnify the Contracting Authority, Contracting Authority’s Representatives and their respective staff authorised to drive the vehicles against claims in respect of damage to vehicles including claims from passengers, claims in respect of damage and personal injury or death.
  - 1.1.7 The Company shall allow for all vehicles provided for the Contracting Authority to be used off the New Works Site on regular journeys between the New Works Site and other locations for purposes related to the Project. Such locations shall include, but not be limited to Scottish Government offices; local authority offices; offices of other statutory bodies (e.g. SNH, SEPA etc.); homes or offices of landowners or their agents; any locations or premises used by the Company adjacent to, or in the vicinity of the New Works; travel between the New Works Site and local transport interchanges, any other venues or locations as agreed with the Company, and the like.
  - 1.1.8 The Company shall allow for the authorised use of vehicles outside the Contracting Authority’s working hours.
  - 1.1.9 The Company shall provide training for driving vehicles on the New Works Site for Contracting Authority’s staff, as requested by the Contracting Authority.
  - 1.1.10 All vehicles provided for the Contracting Authority shall bear the legend “Motorway Maintenance” and retro-reflective red and fluorescent yellow chevron markings at the rear of the vehicle. All vehicles provided for the Contracting Authority shall be free from markings identifying any company associated with the Agreement.
  - 1.1.11 The following vehicles of EU manufacture shall be provided:

| Type | Number Required | Period Required                                       |
|------|-----------------|-------------------------------------------------------|
| A    | 5               | Period 1 and 2 as defined in Appendix 1/1 Section 12. |
| B    | 30              | Period 1 as defined in Appendix 1/1 Section 12        |

## Part 4: Specification

**Appendix 1/2: Vehicles for the Contracting Authority**

| Type | Number Required | Period Required                                       |
|------|-----------------|-------------------------------------------------------|
| C    | 6               | Periods 1 and 2 as defined in Appendix 1/1 Section 12 |

- 1.1.12 The minimum requirements of the above vehicle types shall be as defined in Sections 1.2 – 1.4 below.
- 1.1.13 Where the Company wishes to provide equivalent vehicles to the example named vehicles below, the specification of the vehicles provided shall include all equipment and features provide as standard on the example named vehicles plus those additional requirements specified for each below.
- 1.2 Type A – 7 seat Station Wagon, min 2500cc (Land Rover Discovery or equivalent approved by the Contracting Authority)
- 1.2.1 This vehicle shall be suitable for on and off-road use, have 4-wheel drive, power steering and be supplied in light colour. The vehicle shall be free from markings identifying any company associated with this Agreement. Equipment to be provided with the vehicle shall include: fire extinguisher, first aid kit, hazard flashing unit, full size spare wheel, fuel filler cap lock, bonnet lock and spare wheel lock, link mats front and rear, tow rope, towing hooks front and rear, sign boards reading “Motorway Maintenance” in accordance with Diagram 7404 of Schedule 12, Part V of the *Traffic Sign Regulations and General Directions 2002* on the rear of the vehicles (the lettering shall be the largest x height that can be accommodated out of the following heights: 37.5, 50, 62.5, 75 millimetres), retroreflective red and fluorescent yellow chevrons on the rear of the vehicle and a roof-mounted amber flashing light bar comprising at least 2 light sources in accordance with Section O5.3 of Chapter 8 of the Traffic Signs Manual and the *Road Vehicle Lighting Regulations and General Directions 2002* and 5 (minimum) rear seats.
- 1.3 Type B – 4 seat Short Wheelbase Station Wagon, min 2000cc (Land Rover Freelander or equivalent approved by the Contracting Authority)
- 1.3.1 This vehicle shall be suitable for on and off-road use, have 4 wheel drive, power steering and be supplied in light colour. The vehicle shall be free from markings identifying any company associated with this Agreement.
- 1.3.2 Equipment to be provided with the vehicle shall include: fire extinguisher, first aid kit, hazard flashing unit, full size spare wheel, fuel filler cap lock, bonnet lock and spare wheel lock, link mats front and rear, tow rope, towing hooks front and rear, sign boards reading “Motorway Maintenance” in accordance with Diagram 7404 of Schedule 12, Part V of the *Traffic Sign Regulations and General Directions 2002* on the rear of the vehicles (the lettering shall be the largest x height that can be accommodated out of the following heights: 37.5, 50, 62.5, 75 millimetres), retroreflective red and fluorescent yellow chevrons on the rear of the vehicle and a roof mounted amber flashing light bar comprising at least 2 light sources in accordance with Section O5.3 of Chapter 8 of the Traffic Signs Manual and the *Road Vehicle Lighting Regulations and General Directions 2002* and 2 (minimum) rear seats.
- 1.4 Type C – 5 door Estate car, 1800 cc (Ford Focus or equivalent approved by the Contracting Authority)
- 1.4.1 This vehicle shall have a carrying capacity of at least 0.25 tonne, a minimum clearance (unladen) of 150 millimetres and independent suspension. The vehicle shall be supplied in light colour and shall be free from markings identifying any company associated with this Agreement.

**Appendix 1/2: Vehicles for the Contracting Authority**

Equipment to be provided with the vehicle shall include: full size spare wheel, fire extinguisher, first aid kit, tow rope, luggage straps suitable for carrying survey equipment, sign boards reading "Motorway Maintenance" in accordance with Diagram 7404 of Schedule 12, Part V of the *Traffic Sign Regulations and General Directions 2002* on the rear of the vehicles (the lettering shall be the largest x height that can be accommodated out of the following heights: 37.5, 50, 62.5, 75 millimetres), retroflective red and fluorescent yellow chevrons on the rear of the vehicle and a roof mounted amber flashing light bar comprising at least 2 light sources in accordance with –Section O5.3 of Chapter 8 of the Traffic Signs Manual and the *Road Vehicle Lighting Regulations and General Directions 2002*.

**Appendix 1/3: Communicating Systems for the Contracting Authority****1 Mobile Telephones**

- 1.1 The communications equipment shall be provided new and shall be maintained by the Company throughout the period of the New Works and replaced as required. Each of the Contracting Authority's personnel and their Representatives that will be on Site until the end of Period 2 shall retain a mobile telephone until the end of Period 2 as defined in Section 12 of Appendix 1/1. All other mobile telephones shall be returned to the Company at the end of Period 1 as defined in Section 12 of Appendix 1/1.
- 1.2 The equipment shall comprise 60 hand portable mobile telephones for designated users from the Contracting Authority's personnel and their Representatives, complete with carrying case, and charger. Spare chargers shall be provided for 30 of the telephones, as directed by the Contracting Authority. 12 mobile telephones for the use of the Contracting Authority's personnel and their Representatives shall be supplied if Temporary Initial Accommodation is provided as permitted by Section 1.25 of Appendix 1/1 of this Specification.
- 1.3 The Company shall provide an additional 5 hand portable mobile telephones for use as 'pool-phones' by the Contracting Authority personnel or their Representatives who may visit and work at the Site for short periods.
- 1.4 The Company shall allow for all calls from each of the mobile telephones and shall bear all costs associated with each phone that is supplied for the use of the Contracting Authority personnel and its Representatives.
- 1.5 The Company shall replace any mobile telephones that are lost, damaged or require replacement and shall arrange for the maintenance of mobile telephones as required.
- 1.6 The Company shall allow for 10 of the mobile phones provided in accordance with Section 1.2 above, for users as directed by the Contracting Authority, to permit international calls to be received and made from the UK and to have international roaming facilities allowing calls to be received and made overseas.
- 1.7 The Company shall provide a mobile telephone for each of the Contracting Authority's personnel and their Representatives involved in monitoring of any off Site Works, such as casting and fabrication Works. All of the telephones shall permit international calls to be received and made from the UK and overseas.
- 1.8 The Company shall not be responsible for the cost of any non-project related calls made by the Contracting Authority's personnel and their Representatives on mobile phones provided in accordance with this Appendix and shall forward to the Contracting Authority on a monthly basis details of any calls it considers may not be business related. The Contracting Authority shall confirm to the Company within 4 weeks of receipt of said details any non-project related calls made by the Contracting Authority's personnel and their Representatives. The Company shall operate a system to allow reimbursement to the Company by individual members of the Contracting Authority's personnel and their Representatives of the cost of any non-project related calls made.

**Appendix 1/5: Testing to be Carried out by the Company****1 Notes:**

- 1.1 Unless otherwise stated below, all sampling and testing in this Appendix shall be undertaken by the Company.
- 1.2 Tests comparable to those specified in this Appendix will be necessary for any equivalent work, goods or materials proposed by the Company (See sub-clause 105.4 of the Specification)
- 1.3 (N) indicates that a United Kingdom Accreditation Service (UKAS) or European Cooperation for Accreditation of Laboratories (EAL) accredited laboratory sampling and test report or certificate is required.
- 1.4 Unless otherwise shown in this Appendix, tests for work, goods or materials as scheduled under any one Clause are required for all such work, goods or materials in the Works.
- 1.5 Cube strengths are not required for concrete complying with Clause 2602 of the Specification.
- 1.6 Unless otherwise shown in this Appendix, test certificates for work, goods or materials as scheduled under any one Clause are required for all such work, goods or materials in the Works.
- 1.7 The Company's attention is drawn to the Requirements for additional testing requirements.
- 1.8 The Company shall incorporate in the schedule of tests required under Clause 36 of the Conditions of Agreement as a minimum the tests detailed in the following table together with all additional tests required by the Agreement.
- 1.9 All samples and cores taken for testing in accordance with series 900 of the Specification shall be photographed against a suitable base scale to the approval of the Contracting Authority.
- 1.10 The photographs, together with corresponding RRS1 and CRS1 Forms included in Clause 976AR of Appendix 0/1, shall be delivered to the Contracting Authority within seven days of the sampling on site.
- 1.11 All reference to FWD within this Appendix shall mean Falling Weight Deflectometer as described in HD29 of the DMRB.
- 1.12 All references to LWD within this Appendix shall mean Light Weight Deflectometer as described in Clause 895 of Interim Advice Note 73/06. The use and interpretation of the LWD shall be in accordance with Interim Advice Note 73/06 and the "LWD Good Practice Guide" (2009) produced by Loughborough University.
- 1.13 Where supplier declaration is required for material properties then this shall be in accordance with the factory production control system outlined in Annex C and D respectively of BS EN 13285.

Part 4: Specification

**Appendix 1/5: Testing to be Carried out by the Company**

| Clause      | Works, Goods or Material                                   | Test                                          | Frequency of Testing                                       | Test Certificate        | Comments                                          |

**Appendix 1/6: Supply and Delivery of Samples to the Contracting Authority**

- 1 When required by the Contracting Authority, the Company shall provide samples of any material proposed to be incorporated in the New Works.

**Appendix 1/7: Site Extent and Limitations of Use****1 New Works Site Extent**

- 1.1 The New Works Site extent is detailed in the Agreement of these New Works Requirements and comprises:
- a) The Land Made Available by the Scottish Ministers for the New Works as detailed in the Land Made Available by the Scottish Ministers for the New Works Drawings listed in Appendix 0/4; and
  - b) Any further land acquired by or conveyed to the Scottish Ministers (from any persons, including the Company) from time to time for the purposes of the Design and the New Works.
- 1.2 The Company shall make provision for carrying out work on private land as required under this Agreement for example Accommodation Works, traffic signing, road lighting, drainage works and otherwise.

**2 Limitations on the Use of the New Works Site**

- 2.1 The New Works Site shall be used solely for the construction and completion of the New Works.
- 2.2 The Company shall not use areas of land with a temporary right of access for any purpose other than the construction and completion of the New Works.
- 2.3 When carrying out Accommodation Works on land not made available by the Scottish Ministers for the New Works, the Company shall minimise the area of land occupied to that which is essential for the safe construction and completion of such part of the New Works.
- 2.4 The Company shall ensure that all areas of land which have been temporarily occupied are reinstated to the satisfaction of the affected landowner, occupier and the Relevant Authorities.
- 2.5 Road access to the New Works Site shall be gained solely via roads as detailed by Appendix 1/19.
- 2.6 The Company may gain entry to the New Works Site via private land only with the prior express agreement in writing of the landowner and occupier/tenant. Any access to private land from a public road shall be to the satisfaction of the Relevant Authority. The Company shall bear full responsibility for negotiation, paying for and bearing all costs relating to these accesses and for any matters arising with parties who consider themselves to be affected by these accesses.
- 2.7 The Company shall erect appropriate signs to show accesses and restricted routes.
- 2.8 The Company shall comply with the restrictions imposed by Network Rail for all New Works to be carried out within or adjacent to Network Rail property.
- 2.9 The Company shall not cross any watercourses via the river banks and bed and shall take all necessary measures to avoid any disturbance of the banks and bed.
- 2.10 The Company's attention is drawn to the Special Requirements detailed in these New Works Requirements.

## Appendix 1/8: Operatives for the Contracting Authority

### 1 Operatives for the Contracting Authority

- 1.1 The following specification details the operative requirements for the New Works.
- 1.2 The Company shall provide the following operatives:

| Operative              | Number | Period Required                                  |
|------------------------|--------|--------------------------------------------------|
| Survey/Driver/Handyman | 1      | Period 1 as defined in Appendix 1/1              |
| Survey/Driver/Handyman | 1      | Periods 1 and 2 as defined in Appendix 1/1       |
| Office Attendant       | 1      | Period 1 as defined in Appendix 1/1              |
| Traffic Police Officer | 1      | Period 1 as defined in Appendix 1/1 – see Note 1 |

Note 1: The Company shall cover the cost of providing the Traffic Police Officer, who will be seconded on a full time basis from Police Scotland.

**Appendix 1/9: Noise and Vibration Control Applicable to the New Works Site****1 Noise Control Applicable to the New Works Site**

1.1 The Company shall consult and comply with the requirements of:

Aberdeen City Council; and

Aberdeenshire Council;

as appropriate, prior to commencement of work on the New Works Site.

These requirements, together with the Company's proposed methods of work and Constructional Plant, shall be discussed and agreed in writing by:

Aberdeen City Council; and

Aberdeenshire Council;

as appropriate, prior to commencement of the relevant activities.

The Company shall provide Consultation Certificates in accordance with the Certification Procedure in respect of these requirements.

1.2 The Company shall comply with the contents and recommendations of British Standard BS 5228: 'Noise and Vibration Control on Construction and Open Sites', together with the specific requirements of this Appendix 1/9.

Further to this, the company shall refer to the Department for Environment, Food and Rural Affairs 'Update of Noise Database for Prediction of Noise on Construction and Open Sites' which is an update to the existing construction plant noise database, contained in Annex C, Part 1 of British Standard 5228 'Noise and Vibration Control on Construction and Open Sites'.

1.3 All Constructional Plant used for the New Works shall be subject to the acknowledgement of the Contracting Authority and shall be the quietest of its type practical for carrying out the work required and shall be maintained in good condition with regard to minimising noise output.

In this respect, the Company shall refer to BS 5228: 2009: 'Code of practice for noise and vibration control on construction and open sites, Part 1, which contains details of typical Constructional Plant noise levels that the Company shall use as a basis for prediction.

All Constructional Plant shall be operated and maintained in accordance with the manufacturer's written recommendations including the use and maintenance of any specific noise reduction measures.

1.4 Where the Design requires a diversion for traffic which places the traffic temporarily closer to adjacent properties, the Company shall carry out an assessment of the predicted noise levels associated with the construction and completion of the New Works (either temporary or permanent) and the use by traffic. If this assessment indicates an increase in the ambient noise levels at any properties of more than 3dBLA10(18hr), a suitable noise barrier (temporary or permanent) shall be provided as a minimum for the duration of the diversion works and diversion, and shall be placed prior to the commencement of any such work.

1.5 Best practicable means shall be employed including the positioning of Constructional Plant and activities to minimise noise at sensitive locations, the use of mufflers on pneumatic tools, the use of non-reciprocating Constructional Plant and the use, where practical, of affective sound reducing enclosures to ensure all Constructional Plant used in connection with the New Works operates with the minimum of noise.

---

**Appendix 1/9: Noise and Vibration Control Applicable to the New Works Site**

The Company shall ensure that any piling works are kept to a practicable minimum and that machinery and vehicles are switched off when not in use.

- 1.6 Subject to the other requirements of this Agreement, the normal working hours within the New Works Site shall be Monday to Friday between 0700 and 1900 hours and Saturday between 0800 and 1300 hours, with no working on Sundays and public holidays.

Permissible construction noise levels for these periods in relation to pre-construction ambient noise levels are detailed in Table 9/1 below. Consent for work outside these hours may be given by Aberdeen City Council and Aberdeenshire Council as appropriate.

The Company shall have written permission to operate at the relevant permissible noise levels for each area, within the normal working hours, from Aberdeen City Council and Aberdeenshire Council as appropriate.

The Company shall apply, in writing, for consent to work outside normal working hours to Aberdeen City Council and Aberdeenshire Council as appropriate, at least 14 days in advance of the proposed work.

The granting of such consents shall be dependent, amongst other things, on the Company demonstrating to the satisfaction of Aberdeen City Council and Aberdeenshire Council as appropriate in their application that:

- a) it is not reasonably practicable to carry out the work during standard working hours;
- b) the Company has considered all mitigation measures and has implemented appropriate measures;
- c) all interested parties have been consulted; and
- d) all alternative means to reduce the amount of work to be undertaken out with standard working hours has been explored.

Written confirmation of consent shall be required for each and every occasion when the Company proposes to work out with standard working hours.

In the event of written permission being granted, the Company shall provide the Contracting Authority with a copy of the written permission at least 48 hours prior to commencing the work.

The Company shall also arrange for leaflets to be delivered to residents within 200 metres of the proposed New Works, giving a full description of the proposed Works, their duration, and of the sources, character and levels of noise expected to arise, including a named contact to respond to any noise or vibration concerns or nuisance.

Operating times and noise levels for Sundays and public holidays shall be subject to the agreement and written consent of Aberdeen City Council and Aberdeenshire Council as appropriate.

- 1.7 A pre-construction ambient noise assessment shall be undertaken by the Company, using an appropriately qualified acoustician who is a member of the Institute of Acoustics for agreement with Aberdeen City Council and Aberdeenshire Council as appropriate within 100 metres of where the New Works shall be undertaken, before the commencement of the New Works.

The noise assessment shall demonstrate the typical pre-construction ambient noise levels at representative properties adjacent to the New Works Site.

Measurement locations chosen for the pre-construction ambient noise assessment shall be representative of surrounding properties, shall be considered the "worst case" property in terms of noise levels for that particular area, and shall be directly compatible with the noise levels given in Table 9/1.

**Appendix 1/9: Noise and Vibration Control Applicable to the New Works Site**

The Company's acoustician shall be required to undertake additional assessments or noise measurements at locations and methods agreed previously in writing with the Contracting Authority, Aberdeen City Council and Aberdeenshire Council as necessary.

- 1.8 The pre-construction ambient noise levels, as detailed in paragraph 1.7 above, shall be used to calculate maximum permissible construction noise levels.

Any measured construction noise level shall not exceed any appropriate level, given in Table 9/1 below when compared to the pre-construction ambient noise level. The permissible construction noise level shall not be exceeded at any property in the surrounding area of the New Works.

In exceptional circumstances, permission may be granted to carry out works which exceed the levels given in Table 9/1 below with the agreement of the Aberdeen City Council and Aberdeenshire Council appropriate, provided that the Company can demonstrate that all possible mitigation measures shall be implemented.

- 1.9 Notwithstanding the specific requirements of this Appendix 1/9, the Company shall comply with the contents of Scottish Office Roads Directorate Office Section Instruction 2/92, The Noise Insulation (Scotland) regulations 1975.

Part 4: Specification

**Appendix 1/9: Noise and Vibration Control Applicable to the New Works Site**

**TABLE 9/1: PERMISSIBLE CONSTRUCTION NOISE**

| Typical Pre-Construction Ambient Noise as appropriate | Permissible Construction Noise Levels                      |                          |                                                      |                          |                                                          |                                                       |                          |                            |

| 75                                                    | 80                                                         | 101                      | 80                                                   | 90                       |                                                          | 80                                                    | 101                      |                            |

*\*All permissible levels should be façade.*

**Notes**

- (i) The pre-construction ambient noise level shall be the total  $L_{Aeq}$  as determined from the pre-construction ambient noise assessment from all the noise sources at the measurement location over the specified period.
- (ii) Maximum sound level shall be the highest value indicated on a sound level meter. New sound level meters shall comply with EC 61672-1:2002 (BS EN 61672-1:2003 Electroacoustics; Sound Level Meters; Specifications), Class 1 or 2. For all others, compliance with BS EN 60651:1994 or its equivalents, and also to BS EN 60804:1994 if either  $L_{eq}$  or SEL is available, to Types 0, 1 or 2.
- (iii) The measurement location shall be representative such that the measurements are representative of the noise which is experienced by the neighbouring properties and the microphone shall not be subject to any unusual screening.

**2 Specific Requirements for Noise Control in Respect of Camphill Milltimber Estate**

2.1 Notwithstanding the general requirements in respect of control of construction noise, the Company shall note that a Joint Statement has been agreed with Camphill Communities in respect of, inter alia, the effects of construction noise on Camphill Milltimber Estate at times outwith holiday periods during the Camphill school academic year. The following additional requirements shall apply in respect of the control of construction noise in relation to Camphill Milltimber Estate. "Holiday Periods" in relation to Camphill school shall be the periods of school holiday occurring at Easter, Summer, October, and Christmas/New Year each year.

---

**Appendix 1/9: Noise and Vibration Control Applicable to the New Works Site**

- 2.2 Construction works carried out at any time or day outwith the hours of 07.30 to 18.00 Monday to Friday shall not result in perceptible levels of construction noise at Camphill Milltimber Estate. The Company shall prepare a detailed construction noise assessment (CNA) for the receptor locations noted below in respect of the predicted construction noise levels at the receptors noted below, for each stage of the Company's proposed programme of works:
- Beltane;
  - Camphill House; and
  - St Hilda's.
- In each case the construction noise levels shall be detailed in respect of the façade of the location exposed to the highest levels of construction noise.
- 2.3 In preparing the CNA the Company shall allow for the weighting factor of 5 dB (A) as described in Paragraph 8.5f) of BS 5228: Part 1:1997. This is in recognition of the potential sensitivities of particular children who may be resident within the Camphill Milltimber Estate.
- 2.4 The Company shall programme their planned construction works such that activities which are expected to give rise to the highest noise levels at the specified receptors are programmed to occur during Camphill school holiday periods wherever practicable. Where this cannot be achieved the Company shall identify the period proposed for such works and shall consult with the Contracting Authority and Camphill Communities in respect of this proposal.
- 2.5 The Company shall schedule their planned construction works such that activities outwith Camphill school holiday periods shall generally not result in predicted noise levels exceeding 55dB LAeq(12 hour) at each of the specified receptors noted in paragraph 2.2, including allowance for the noise weighting factor described in paragraph 2.3.
- 2.6 The Company shall take all practicable measures to minimise predicted construction noise levels at the receptors specified in Paragraph 2.2, which shall include, but not be limited to: use of construction plant giving rise to the lowest noise levels commensurate with construction and completion of the Works; and use of temporary noise mitigation measures, including barriers, placed either close to the noise source or at such other location as may be suitable for achieving effective mitigation. The effects of each noise mitigation measure allowed for within the CNA shall be identified explicitly within the CNA.
- 2.7 The CNA shall follow the general format of the Illustrative Camphill Construction Noise Assessment provided for information, modified as appropriate to reflect the Company's proposed construction sequence, the noise levels associated with the Company's proposed construction plant and equipment, and the particular mitigation measures proposed by the Company. This CNA shall be submitted to the Contracting Authority no later than 28 days prior to the proposed works commencement date for any works in any part of the New Works Site bounded to the south by the southern abutment of the River Dee Crossing, and to the north by Culter House Road. Following submission of the CNA, the Company shall consult with the Contracting Authority and Camphill Communities in respect of the CNA. The Company shall note that the activities to be included in the CNA shall not be restricted to those within the part of the New Works Site described above, but shall include all works at any location within the New Works Site which may contribute to predicted construction noise levels in excess of 55dB LAeq(12 hour) at each of the specified receptors noted in paragraph 2.3.
- 2.8 Following this consultation, and any modification of the CNA by the Company arising as a consequence of the consultation, the Contracting Authority shall approve the CNA, such approval not to be unreasonably withheld. The Company shall not commence any works

---

**Appendix 1/9: Noise and Vibration Control Applicable to the New Works Site**

with the part of the New Works Site noted above prior to obtaining approval of the CNA from the Contracting Authority.

- 2.9 The Company may provide a single CNA for the whole duration of works within the part of the New Works Site described in paragraph 2.7, or a series of assessments covering discrete periods within the overall duration of such works. If the Company provides a series of assessments, each assessment shall be submitted to the Contracting Authority no later than 28 days prior to the proposed commencement date for the earliest works included within the relevant assessment, and each assessment shall be subject to the consultation and approval process set out in paragraphs 2.7 and 2.8.
- 2.10 The Company shall consult and comply with the Contracting Authority to include within the CNA identification of proposed noise monitoring locations and a method statement for undertaking and reporting daily monitoring of actual construction noise levels at these locations. The method statement shall describe how the recorded noise levels shall be appropriately compared to the noise levels predicted within the CNA to determine whether or not the predicted noise levels are being exceeded and, if so, to determine the extent to which the predicted noise levels are being exceeded.
- 2.11 The Company shall undertake monitoring of construction noise in accordance with the method statement within the approved CNA on all days outwith the Camphill school holiday periods during which works are being undertaken. The Company shall provide the Contracting Authority with the daily monitoring results within 24 hours of undertaking the monitoring. In addition, the Company shall provide a weekly report on the monitoring results from the preceeding week, comparing the actual noise levels with the predicted noise levels for that period, and provided detailed comments and analysis of any instance where the actual noise levels exceed the predicted noise levels.
- 2.12 If, in the opinion of the Contracting Authority and at its sole discretion, the monitoring results indicate that the Company is regularly and repeatedly exceeding the predicted noise levels set out within the approved CNA for reasons within the control of the Company, the Contracting Authority may require the Company to identify and implement measures to prevent further exceedences. Such measures may include some or all of the Company amending its programme of working, making use of alternative plant and equipment, and incorporating additional mitigation measures. Where such measures result in changes to the approved CNA the Company shall prepared a revised CNA. Any such revised CNA shall be subject to consultation with the Contracting Authority and Camphill Communities and approval by the Contracting Authority. During the period of preparation of any such revised CNA the Company may continue to undertake works within the part of the New Works Site described in paragraph 2.7, taking such further measures as may be necessary to prevent repeated and regular exceedence of the predicted noise levels within the then current approved CNA for reasons within the control of the Company.

**3 Vibration Control**

- 3.1 The Company shall consult and comply with the requirements of, Aberdeen City Council and Aberdeenshire Council as appropriate prior to commencement of New Works.

These requirements, together with the Company's proposed methods of work and Constructional Plant to be used shall be discussed and agreed in writing by Aberdeen City Council and Aberdeenshire Council as appropriate, prior to commencement of the relevant activities on Site.

The Company shall provide Consultation Certificates in accordance with the Certification Procedure in respect of this requirement.

---

**Appendix 1/9: Noise and Vibration Control Applicable to the New Works Site**

- 3.2 The maximum permitted peak particle velocity (PPV) generated by continuous construction of the New Works shall be 5 millimetres/second measured at the property closest to the operations being carried out and applies to all operations.

Where the Construction of the Work is intermittent, the maximum PPV generated shall be no greater than 10 millimetres/second.

- 3.3 Ground vibration at any Structure, property or building and otherwise affected by blasting, shall be kept within the levels given in BS 7385: Part 2. Evaluation and Measurement for Vibration in Buildings; Guide to Damage Levels From Groundbourne Vibration.

The maximum peak component particle velocity measured next to any Structure under construction shall be:

- (a) Equal to or less than a zero to peak displacement of 0.6 mm/s at frequencies less than 4 Hz;
- (b) Less than 15 mm/s at 4 Hz, rising to less than 20 mm/s at 15 Hz; and
- (c) Less than 20 mm/s at 15 Hz, rising to less than 50 mm/s at 40 Hz or above.

With regard to vibration, the level for up to a maximum of three blasts per day, should be 8.5 mm/s, Monday to Friday between 10:00 hours and 16:00 hours. At any other times it should be 2.8 mm/s.

- 3.4 The Company shall provide written details of the proposed method and periodicity of monitoring of the Vibration Dose Value (VDV), to Aberdeen City Council and Aberdeenshire Council as appropriate.

3.5 Vibration Monitoring Equipment

- 3.5.1 The type of instrumentation suitable for monitoring vibration shall be a digital seismograph having the following minimum specification:

- a) Minimum sampling rate 1000 samples/second/channel;
- b) Capable of recording Peak Particle Velocity (Directly), Peak Acceleration (Calculated), Peak;
- c) Displacement (Calculated), Frequency at the Peak Velocity (Calculated);
- d) Dual Mode instrument having (a) Self Triggering Mode and (b) Continuous Monitoring Mode;
- e) Transducer - 3 orthogonally mounted transducers on one mounting unit;
- f) Frequency Range - 4.5 to 200 Hertz;
- g) Minimum Resolution - 0.05 millimetres/second, velocity;
- h) Range - 0 to 100 millimetres/second, velocity;
- i) Record of Events - hard copy printout and storage on solid state memory or disc for subsequent printout; and
- j) Power - 240 volt mains for continuous unattended operation plus internal battery with minimum of 24 hours capacity.

**Appendix 1/12: Setting Out and Existing Ground Levels****1 Setting Out and Existing Ground Levels**

- 1.1 The Company shall be responsible for the establishment of a grid of permanent ground survey stations throughout the New Works Site.
- 1.2 The Company shall supply setting out information, including a schedule of coordinated ground survey stations to the Contracting Authority whenever information is available, updated or revised.
- 1.3 The Company shall erect clearly marked chainage markers at 20 metre intervals at suitable locations for the duration of the New Works.
- 1.4 Before commencement of any earthworks, the Company shall establish permanent survey stations within the New Works Site for the setting out and checking of the New Works

## Appendix 1/13: Programme of Works

### 1 Form of Programme

- 1.1 The Company shall provide the Construction Programme in the form of a time chainage chart supported by gantt charts as follows:
- a) The work required for the Design and the New Works shall be subdivided into individual distinct operations which shall be illustrated in the time chainage chart and the gantt charts.
  - b) The time chainage chart shall be ruled in columns and rows using a horizontal scale of chainage (minimum 1:10,000, that is, 10 millimetres wide column per 100 metres) and a vertical scale of time (minimum 5 millimetres high row per week). On the time chainage chart the Company shall plot its programmed start (date/chainage point) and finish (date/chainage point) for each milestone, and shall draw a line (the "milestone line") connecting each start point to the corresponding finish point for that operation. The milestone line shall be taken as a representation of the Company's programmed average rate of progress of that operation from its start to its finish by reference to the date and chainage at intermediate (date/chainage) points along the milestone line. At the request of the Contracting Authority the Company shall provide further details by sub-dividing operations and showing the corresponding operation lines for each sub-division.
  - c) Where at a particular part of the New Works there is a local concentration of individual distinct operations which cannot be satisfactorily represented by milestone lines (for example at a junction, Structure and otherwise) such operations shall be shown on the time chainage chart as a rectangular box (the "operations box") whose diagonal is the operation line for all operations required for that part of the New Works considered en bloc. Each operations box shall be named to identify the part of the New Works to which it refers and shall show the number of the gantt chart (refer below) on which these operations are illustrated.
  - d) The time chainage chart shall show along its top a diagrammatic plan (the "diagram") showing, suitably annotated, the features of the parts of the New Works represented by the chart. The diagram shall be drawn to the same horizontal scale as the time chainage chart, and be aligned with the chainage columns of the chart in vertical projection.
  - e) At the request of the Contracting Authority, the Company shall provide a gantt chart for any part of the New Works. Gantt charts shall list the location and description of operations to which they refer and show for each listed operation a horizontal bar indicating the start, duration and stop date of that operation plotted to a horizontal scale of time. Gantt charts shall be provided by the Company for all operations contained in the operations boxes. The Contracting Authority shall have the right to require the Company to introduce additional operation boxes into the time chainage chart and the Company shall supply to the Contracting Authority the amended time chainage chart and gantt charts.
  - f) The Company shall also provide in writing, for the Contracting Authority, a general description of the arrangements and methods of construction which the Company proposes to adopt for carrying out the New Works, together with a detailed resources allocation histogram showing all plant labour (including site and head office staff) and materials the Company proposes to use in the construction of the New Works.
- 1.2 The level of detail should not be less than the following:

---

**Appendix 1/13: Programme of Works**

## 1.2.1 Level 1

## (i) DESIGN

## a) For each Structure:

- (i) Foundation;
- (ii) Substructure;
- (iii) Superstructure;

## b) For each Project Road:

- (i) Alignment;
- (ii) Site Clearance
- (iii) Fencing
- (iv) Road Restraints
- (v) Drainage systems;
- (vi) Earthworks;
- (vii) Road pavement;
- (viii) Kerbs Footways and Paved Areas
- (ix) Road markings,
- (x) Signing,
- (xi) Lighting
- (xii) Traffic Scotland Equipment;
- (xiii) Statutory Undertakers and Private Apparatus
- (xiv) Ecological Mitigation & Planting

## (ii) CONSTRUCTION

## a) Each Structure;

## b) Earthworks - each cutting and embankment;

## c) Road works - in length not exceeding 1.0 kilometre for the Trunk Roads, Side Roads and New Means of Access:

- (i) Fencing;
- (ii) Site clearance;
- (iii) Topsoil strip;
- (iv) Drainage (pre-earthworks and second stage);
- (v) Sub-base;
- (vi) Sub-grades improvement layer;
- (vii) Road base or concrete paving;
- (viii) Surfacing;
- (ix) Soiling and seeding

## d) Major alterations to privately and publicly owned services and supplies;

## Part 4: Specification

---

**Appendix 1/13: Programme of Works**

- e) Traffic management measures including operation of site accesses, plant crossing and temporary diversions;
  - f) Accommodation Works;
  - g) Planting
- 1.2.2 Level 2
- (i) At least four weeks before the commencement of any item of work:
    - a) For each Structure;
      - (i) Piling (where appropriate);
      - (ii) Substructure;
      - (iii) Superstructure;
      - (iv) Finishes;
    - b) Roadworks;
      - (i) As for Level 1 but intervals not exceeding 500 metres and including lighting, signing, soiling, seeding and planting, roadmarking, cabling and Traffic Scotland equipment;
      - (ii) All public alterations and additions to privately and publicly owned services and suppliers;
      - (iii) Planting to individual areas;
- 1.2.3 Level 3
- (i) Further breakdown of items and other details as may be required.
- 1.3 Schedule of Constraints
- 1.3.1 The Schedule of Constraints shall include, but shall not be limited to, the following:
- (i) compliance with technical approval procedures and Design and Design checking procedures in relation to Structures designed by the Company, including awaiting approvals, and checking;
  - (ii) consultation and compliance with the requirements of SNH, HS, SEPA and any relevant others regarding approval / consent procedures; and
  - (iii) compliance with the requirements of the Environmental Assessment Documents.

**Appendix 1/15: Accommodation Works****1 Accommodation Works**

- 1.1 Accommodation Works that have been agreed are shown on the attached schedules and their locations on the Accommodation Works Drawings as listed in Appendix 0/4.
- 1.2 The Company shall complete Accommodation Works as early as possible after the date of commencement of the New Works and in such a manner as to minimise inconvenience and disruption to landowners and occupiers/tenants.
- 1.3 Notwithstanding this, private access shall be provided across the New Works Site to adjoining landowners and affected parties to the same level as that which shall be provided by the completion of the New Works including Accommodation Works and until such time as the New Works including Accommodation Works are complete.
- 1.4 The Accommodation Works Access Tracks at the various locations defined in the following schedules shall be designed to comply with the following parameters:
  - (i) minimum horizontal radius and curve widening to suit agricultural vehicle use. The Design shall allow for use by a tractor and trailer combination and modern combines in transportation configuration;
  - (ii) access track and other surfacing shall be in accordance with paragraph 1.7.4 to Part 2 of these New Works Requirements; and
  - (iii) maximum vertical gradient shall be 8 percent where practicable.
- 1.5 The fencing and gate types in the Accommodation Works Schedules are shown on the Standard Detail drawings as listed in Appendix 0/4 or in Volume 3 of the MCHW.
- 1.6 Where Accommodation Works fencing is indicated along the boundary of the Land Made Available by the Scottish Ministers for the New Works, the fence shall be set parallel to the boundary with fence posts contiguous to the boundary and with the fence outside the Land Made Available by the Scottish Ministers for the New Works.
- 1.7 Accommodation Works fencing shall be connected to adjacent existing fencing or permanent fencing to ensure continuity of the fence.
- 1.8 Where water supplies shall be provided as part of the Accommodation Works, the Company shall make every effort to ensure that the installation prevents freezing of the water supply. Any lagging to pipe work shall be robust to prevent damage from livestock and otherwise.
- 1.9 The exact location of all gates, water troughs, holding pens and otherwise shall be agreed with the relevant landowner and occupier/tenant prior to installation.
- 1.10 Where watercourses shall be piped as part of the Accommodation Works, the Company shall carry out the Design in accordance with these New Works Requirements.
- 1.11 All drains and field drains severed by the New Works shall be reconnected and a plan showing depths and sizes submitted to the relevant landowner and copied to the Contracting Authority. All drainage and ditch systems shall be reinstated and properly tied into roadside drainages as appropriate.
- 1.12 Where existing water troughs are removed by the New Works, or fields are severed from their water supply, the Company shall ensure that a suitable temporary water supply and trough are provided to the satisfaction of the landowner and occupier/tenant pending permanent replacement of the water supply and trough by the landowner.
- 1.13 The Company shall liaise with landowners to identify their proposals for relocation of water troughs as appropriate. Where landowners have made arrangements for new water supplies to relocated water troughs, the Company shall liaise with the party engaged to

**Appendix 1/15: Accommodation Works**

install the new water supply and shall accommodate installation of the new water supply within the New Works Site as appropriate. In the event that installation is not expected to proceed in advance of construction of affected Project Roads, the Company shall make suitable provision for the future installation of water supplies to avoid the need for excavation of paved areas of the Project Roads. Where landowners have not made arrangements for new water supplies to relocated troughs, the Company shall confirm to the landowners concerned the provisions that shall be included within the New Works Site to enable future installation of water supplies to avoid the need for excavation of paved areas of the Project Roads

1.14 Table 1 below details the landowners for whom Accommodation Works are to be undertaken and the status of the Accommodation Works schedule included within this Appendix 1/15. The status noted within the table shall have the following meanings:

- (i) **Agreed:** The schedule of Accommodation Works has been agreed with the relevant landowner, who should be consulted regarding Design, construction and completion of the specified Accommodation Works as appropriate;
- (ii) **Pending Agreement:** The schedule of Accommodation Works has not yet been agreed with the relevant landowner; and
- (iii) **Instructed by Contracting Authority:** The schedule of Accommodation Works has been instructed by the Contracting Authority, who should be consulted regarding Design, construction and completion of the specified Accommodation Works as appropriate.

## Part 4: Specification

**Appendix 1/15: Accommodation Works**

|         |                                                                                                                                                                                                                                                                     |                      |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| 250/07  | Provide approximately 200 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. Eastern end to be tied into fence provided in works ref 250/06 and western end to terminate at edge of CPO boundary.                          | *Accommodation Works |
| 250/08  | Provide approximately 260 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. South western end to begin at edge of CPO boundary and north eastern end to be tied into end of Bogenjoss footpath.                           | *Accommodation Works |
| 250/09  | Provide approximately 240 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. Southern end to begin at end of Bogenjoss footpath and northern end to be tied into opposite end of the Bogenjoss footpath.                   | *Accommodation Works |
| 250/010 | Provide approximately 185 linear metres of badger and otter proof fencing to drawing number B1033200/SD/300/F2 Option B. Northern end to be tied into existing boundary treatment and the southern end to be tied into fence provided in works ref 250/011.         | Scheme Works         |
| 250/011 | Provide approximately 105 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. Western end to be tied into fence provided in works ref 250/010 and eastern end to be tied into existing boundary treatment.                  | *Accommodation Works |
| 250/012 | Provide approximately 115 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. Western end to be tied into fence provided in works ref 250/013 and eastern end to be tied into existing boundary treatment.                  | *Accommodation Works |
| 250/013 | Provide approximately 130 linear metres of badger and otter proof fencing to drawing number B1033200/SD/300/F2 Option B. Northern end to be tied into fence provided in works ref 250/012 and the southern end to be tied into fence provided in works ref 250/014. | Scheme Works         |
| 250/014 | Provide approximately 90 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. North western end to be tied into fence provided in works ref 250/013 and south eastern end to be tied into existing boundary treatment.       | *Accommodation Works |
| 250/015 | Provide approximately 35 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. To be tied into existing boundary treatment at both ends.                                                                                      | *Accommodation Works |
| 250/016 | Provide approximately 85 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. To be tied into existing boundary treatment at both ends.                                                                                      | *Accommodation Works |
| 250/017 | Provide approximately 340 linear metres of post and 5 plain wire fence to drawing number B1033200/SD/300/F3 Option B. Western end to be tied into existing boundary treatment                                                                                       | *Accommodation Works |
