**Appendix 1/16: Schedule of Works to Statutory Undertakers Apparatus****1 Indicative Schedule of Statutory Undertakers' Works**

- 1.1 Notwithstanding any information provided in this Appendix 1/16 'Schedule of Works to Statutory Undertakers' Apparatus' for the design, execution and completion of the Works, the Company shall consult and comply with the requirements of all Statutory Undertakers, Private Apparatus owners and others affected by the New Works as necessary to determine the effect of the design, execution and completion of the New Works on Statutory Undertakers' Apparatus and Private Apparatus, and to arrange any alterations of any Statutory Undertakers' Apparatus or Private Apparatus which, in the opinion of the Statutory Undertakers or Private Apparatus owners, may be necessary for or resulting from the design, construction and completion of the New Works.
- 1.2 The Company shall make arrangements with the Statutory Undertakers and others concerned for the co-ordination and phasing of the design, construction and completion of the New Works with all Statutory Undertakers' Works and works of others concerned required to be carried out concurrently with the design, construction and completion of the New Works.
- 1.3 The Company shall consult, and comply with the requirements of, all Statutory Undertakers and others concerned in connection with diversion routes, road closures, and interruptions to supplies and the like while Appendix 1/16 Works, Additional Appendix 1/16 Works, Statutory Undertakers' Works and Private Apparatus Works are being carried out.
- 1.4 The Company shall comply with any periods of notice being given by the Statutory Undertakers and others concerned. Any such compliance by the Company shall not relieve the Company of any other obligations under this Agreement.
- 1.5 The Company shall satisfy himself as to the exact location of all Statutory Undertakers' Apparatus and Private Apparatus prior to carrying out work in any part of the Site.
- 1.6 Statutory Undertakers' Apparatus and / or Private Apparatus to individual properties have not generally been shown on the drawings listed in Appendix 0/4 to the Specification.
- 1.7 The Company shall satisfy himself that the design, construction and completion of the New Works takes account of all existing Statutory Undertakers' Apparatus and Private Apparatus whether or not such existing Statutory Undertakers' Apparatus and / or Private Apparatus is shown on any drawings listed in Appendix 0/4 to the Specification.
- 1.8 Disconnected Statutory Undertakers' Apparatus and Private Apparatus shall only be removed where the prior written consent of the Statutory Undertakers and relevant owners of Private Apparatus has been obtained by the Company or where otherwise approved by the Contracting Authority in writing.
- 1.9 The names, addresses and telephone numbers of the Statutory Undertakers, Private Apparatus owners and others affected with existing 'known' Statutory Undertakers' and Private Apparatus in the locality of the Site include, but are not limited to, those described below in Table 1/16A as 'Known Statutory Undertakers, Private Apparatus owners and others affected'.
- 1.10 Notwithstanding the names, addresses and telephones numbers of the Statutory Undertakers, Private Apparatus owners and others affected with Statutory and Private Undertakers' Apparatus in the locality of the Site including, but not limited to, those described in Table 1/16A below or the Statutory Undertakers, Private Apparatus owners and others affected referred to elsewhere in this Agreement, the Company shall satisfy himself as part of the design, construction and completion of the New Works that he has consulted and complied with the requirements of all Statutory Undertakers, Private

---

**Appendix 1/16: Schedule of Works to Statutory Undertakers Apparatus**

Apparatus owners and others affected and any others affected by the design, construction and completion of the New Works.

- 1.11 If the Company locates any Apparatus which was unknown to the Parties as at 17 April 2014 and which the Company demonstrates to the satisfaction of the Contracting Authority may be affected by the New Works (and in this context the New Works shall be restricted to those New Works which would have been required had the Baseline Apparatus Design been adopted by the Company without change) the Company shall prepare a revised Appendix 1/16 detailing such additional Diversionary Works (Type 1) and submit the same to the Contracting Authority. The Parties shall meet as soon as reasonably practicable thereafter to agree whether Appendix 1/16 should be so revised.

Baseline Apparatus Design means the draft design prepared by or on behalf of the Contracting Authority and used as the basis for the preparation of the Diversionary Works (Type 1), a copy of which draft design is attached to this Agreement on disk as Attachment 2

**2 General**

- 2.1 It shall be the responsibility of the Company to agree the location of service connections or access chambers for Statutory Undertakers' Apparatus and Private Apparatus with the relevant Statutory Undertaker, owner of the Private Apparatus and the Contracting Authority.
- 2.2 Wherever practical the Company shall ensure that no service connections or access chambers for Statutory Undertakers' Apparatus and Private Apparatus, except Traffic Scotland Equipment ("TSE"), shall be situated within the boundary as delineated by the permanent motorway fence and within the trunk road boundary. Wherever practical the Company shall ensure that no Statutory Undertakers' Apparatus or Private Apparatus, except Traffic Scotland Equipment, shall be situated longitudinally within the boundary as delineated by the permanent Trunk Road fence and within the trunk road boundary. The Company shall ensure that new Statutory Undertakers, Private Apparatus owners and others chamber covers which shall be required, shall not be permitted within the road pavement of all roads described in Table 1 of Schedule 19 of the Agreement.
- 2.3 The Company shall be responsible for the protection of all Statutory Undertakers' Apparatus and Private Apparatus during the construction and completion of the New Works and shall comply with the Special Requirements of the affected Statutory Undertaker, Private Apparatus owner or any other person concerned as described in these New Work's Requirements subject to approval of the Statutory Undertaker, Private Apparatus owner or other person concerned.
- 2.4 In respect of existing Statutory Undertakers' Apparatus or Private Apparatus, the Company shall raise, lower or relocate the covers of existing manholes, chambers, catchpits, gullies or otherwise where necessary and / or where resulting from the design, construction and completion of the New Works. Prior approval of the asset owner is required in this respect.
- 2.5 The Company shall ensure that all Private Apparatus to be diverted shall be diverted to a standard equivalent to that which would be provided by an equivalent Statutory Undertaker or to a higher standard where this existed prior to the New Works commencing. Except for TSE, ducting, chambers and drawpits shall be provided by the Company as required to allow the service, supply or otherwise to be accessed and maintained from points wholly out with the New Works wherever possible.
- 2.6 The Company shall be responsible for all traffic management associated with the New Works in connection with all Appendix 1/16 Works, Additional Appendix 1/16 Works and Private Apparatus Works required to be carried out in accordance with this Agreement,

---

**Appendix 1/16: Schedule of Works to Statutory Undertakers Apparatus**

unless otherwise agreed with the Statutory Undertaker or Private Apparatus owner. Provision of traffic management shall be in accordance with the requirements of Appendix 1/17.

- 2.7 Table 1/16B only lists those works to existing Statutory Undertakers', Private Apparatus owners and others affected Apparatus that are necessary for the design, construction and completion of the New Works.
- 2.7.1 The 'Design Period' and 'Design and Material Order Period' as relevant, shown in Table 1/16B shall commence when the relevant Statutory Undertaker, Private Apparatus owners and others affected has received the associated C6 (or equivalent) notice from the Company and any required payment has been received. The 'Duration of Material Order and Notification to Attend Site' and the 'Notification Period to Attend Site' as relevant, shown in Table 1/16B shall commence when the Statutory Undertakers, Private Apparatus owners and others affected have received notification from the Company. It shall be the Company's responsibility to confirm all timescales with the Statutory Undertakers, Private Apparatus owners and others affected and others concerned.
- 2.7.2 The 'Main Works by Company' items identified for each diversion contained in Table 1/16B are those items which the Company shall design, execute and complete to enable the Appendix 1/16 Works to be completed.
- 2.7.3 The 'Works by Statutory Undertakers', Private Apparatus owners and others affected items identified for each diversion contained in Table 1/16B are those items which shall be carried out by the Statutory Undertakers, Private Apparatus owners and others affected or their third party contractors to enable the Appendix 1/16 Works to be completed.
- 2.7.4 Notwithstanding the provisions of Table 1/16B the Company shall carry out all works required in order to consult and comply with the requirements of the Statutory Undertakers, Private Apparatus owners and others affected and the other provisions of the Agreement.
- 2.8 The Company shall provide setting out instructions to Statutory Undertakers, Private Apparatus owners and others affected and supervise Statutory Undertakers, Private Apparatus owners and others affected as necessary to avoid any delay with regard to the positioning of Statutory Undertakers', Private Apparatus owners and others affected Apparatus.
- 2.9 The Company shall notify the Contracting Authority of all meetings between the Company and any Statutory Undertaker, Private Apparatus owners and others affected at least seven days in advance to allow the Contracting Authority the opportunity to attend the meeting as an observer.
- 2.10 The Company shall supply copies of all correspondence between the Company and any Statutory Undertaker, Private Apparatus owners and others affected within seven days of issue or receipt as appropriate.
