Proposed A9 bridge (A9 1260) requiring the realignment of the Dalmagarry burn.

Left bank will be slightly embanked to maintain existing flood levels.

Proposed realignment with-wide two-stage cross section and sinuous (4m) low flow channel.

Woody material and appropriate marginal / bankside planting to be included at detailed design.

Proposed side road bridge (A9 1260 S).

Proposed footbridge (A9 1260F) across the Dalmagarry burn.

Left hand bank to be reinforced with 60m long retaining wall to protect adjacent properties.

Scattered native trees in wet grassland.

2 Stage channel to accommodate flood flows and minimise erosion whilst maintaining morphology at low/average flow.
