## 1. Archaeology and Built Heritage Gazetteer

1.1.1. Site numbers in bold refer to site which will be impacted by any of the Mainline and Junction Options.

- GDL = Garden and Designed Landscape
- LB = Listed Building
- SM = Scheduled Monument
- HER = Historic Environment Record
- HES – Historic Environment Scotland

**Table 1.1 Archaeological Remains and Historic Buildings**

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
1	HES number GDL00246	NGR 287195 808517	Garden and Designed Landscape	Designated (GDL)	Kinrara	In 1789, Duchess Jane Gordon (1748-1812), wife of Alexander Gordon, 4 <sup>th</sup> Duke of Gordon, began laying plans for a large picturesque designed landscape at Kinrara. The Duchess had been influenced by Uvedale Price's Essay on the Picturesque. Price had advocated an appreciation of the particulates of planting and farming, combined with local circumstances.  With this inspiration the Duchess created an outstanding and unique example of late 18 <sup>th</sup>	18th century	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>century picturesque designed landscape design. It has been noted that Kinrara makes a significant contribution to the scenic qualities and nature conservation values in Strathspey.</p> <p>The architectural features that fall within the area consist of Kinrara House. The large estate house was designed by John Smith and constructed in 1804. Farm buildings, kennels and a keeper's cottage are situated to the north of the house. To the south-west of the house is a large memorial to the Duchess.</p> <p>The garden surrounding the house has largely been laid to lawn. Two herbaceous borders are situated to the south-west side of the house. The 'Dell' is located to the west and consists of an area formed by the excavation of earth forming a podium in which the House stands. This area was once the site of a shrubbery that had been laid out by the Duchess. None of the original planting survives.</p>		

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>The Kitchen Garden lies 0.5 km to the north of the House. The garden is elliptical in shape and is fenced off by a wooden palisade fence. The garden is no longer in use but several fruit trees remain on the grounds.</p> <p>Two access roads break off from the B9152, crossing the Edinburgh to Inverness line, before leading to the asset. During the mid-19<sup>th</sup> century there was an elaborate network of tracks and footpaths. Some of these paths can still be followed but, many have now been lost due to unused and overgrown vegetation.</p> <p>As a prime example of a mid-18<sup>th</sup> century formal landscape, and in recognition of its inclusion on the Inventory of Gardens and Design Landscapes, Kinrara Garden and Designed Landscape has been assessed to be of high value.</p>		
2	HES number GDL00139	NGR 289281 809023	Garden and Designed Landscape	Designated (GDL)	Doune of Rothiemurchus	Doune of Rothiemurchus is a picturesque designed landscape of outstanding historical value forms the main ornamental landscape character along this stretch of Strathspey. Formerly	17th century	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>a 17<sup>th</sup> to early 18<sup>th</sup> century formal design, it was significantly formalised in the 19<sup>th</sup> century by parkland designed according to picturesque principles.</p> <p>The area contains several important buildings. The 17<sup>th</sup> century Doune, which is a large estate house, faces south and comprises of a two storey five bay structure. Above the entrance a decorative Venetian window was constructed. Associated with the estate house is Done Farm cottages. These structures consist of a single storey cottage range built to a U-shaped plan which has been dated to 1800-10.</p> <p>Also located within the area is West Lodge. This building was constructed in 1805 and remodelled by Elizabeth and Jane Grant in 1812. The building consists of a single storey white-harled cottage. Two other buildings that were built by the Grant sisters are also located within this area. Rothiemurchus Croft House and</p>		

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>the Polchar were constructed in 1812-14.</p> <p>Several buildings that are not associated to the estate house are also located in the area. These are the James Marineau Memorial, the Old Church and Burial Ground and Rothiemurchus Old manse.</p> <p>The Kitchen Garden was built on a new site in the early 19<sup>th</sup> century and occupies a sheltered spot south-west of the Polchar. The garden was fenced and consisted of two enclosed areas. The gardens glasshouses are now in ruin due to neglect and all that remains of the gardens is traces of footpaths and a few fruit trees.</p> <p>Parkland is located to the south and east of the Doune estate. The area mainly consists of arable land although some parkland trees survive. Woodlands were long established and recorded by the estate from the 16<sup>th</sup> century and an extensive forest still survives on the hills.</p> <p>As a prime example of a mid-17<sup>th</sup> to 18<sup>th</sup> century designed</p>		

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						landscape, and in recognition of its inclusion on the Inventory of Gardens and Design Landscapes, Doune of Rothiemurchus Garden and Designed Landscape has been assessed to be of high value.		
3	HES number LB50909	NGR 287050 809285	Bridge	Designated (category C)	Loch Alvie Bridge on B1952	<p>Constructed by the engineer, Sir Owen Williams, and designed by architect, Maxwell Ayrton, in 1925-26, Loch Alvie Bridge is situated on the south-east side of Loch Alvie. The two-arched, reinforced concrete modern movement bridge comprising of distinctive faceted concrete sides and 6-sided shuttered arches. Splayed piers form cutwater to the centre and retaining walls are located at the banks. Small parapets are located to the leading to the road.</p> <p>The bridge is an excellent example of a 20<sup>th</sup> century reinforced concrete bridge. The structure is similar to that of seven other bridges of the same form and design by Williams located along the A9. The reinforcements appear to be suffering corrosion, however</p>	Modern (20th century)	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						the structure has weathered and blended with the surroundings and as such has been assessed to be of low value.		
4	HES number LB1650	NGR 286401 809330	Church	Designated (category B)	Alvie Parish Church and burial ground	<p>Alvie Parish Church and burial grounds date to 1768, with repairs conducted in 1833, 1880 and 1952. The Category C Listed Building comprises of a simple rectangular in plan church orientated east to west and built of coursed tooled granite.</p> <p>The church is accompanied and surrounded by a burial ground which is enclosed by a rubble wall. The entrance is located to the west and is flanked by a pair of simple squared rubble tooled piers.</p> <p>The church and grounds are an example of a mid-18<sup>th</sup> century simple church and grounds. The building is still in use today and commands views between Loch Alvie and Loch Beag. As such, the asset has been assessed to be of Medium Value.</p>	18th century	Medium
5	HES number LB1651 MHG47797, 44204 & 15388	NGR 286338 809338	Manse	Designated (category C) & HER	Alvie Manse (former Church of Scotland)	Alvie Manse was constructed and designed by John MacCulloch in 1807-8. The	19th century	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
					Manse) and steading.	<p>initial design of the structure was a two storey three bay house. It was Baronialised with substantial additions by Thomas Mackenzie in 1848-9 to form a three storey L-shape in plan house with drum tower entrance porch.</p> <p>The associated early 19<sup>th</sup> century Manse constructed in a baronial style has undergone many adaptations, alterations and additions and as such has been assigned a Low value.</p>		
6	MHG4422	NGR 285769 809639	Shieling	HER	Alvie	<p>The asset comprises of the remains of a heather-covered shieling, on the edge of a river terrace at Alvie. The shieling has a rectangular foundation of earth and stone which measures 12.6m by 6.0m over walls 0.2m high and spread to 1.8m wide.</p> <p>The remains of this asset could not be identified during a site walkover and the details on the HER highlight that this may be in part due to the possible destruction of the asset during the construction of the A9. The asset may represent potential insights into pre- clearance</p>	Undated	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						exploitation of this area of the Highlands and as a result the asset has been assigned a Low value.		
7	MHG4429	NGR 286119 809850	Burial Cairn	HER	Loch Alvie	<p>The non-designated asset comprises of a heather-covered cairn which is possibly housing a cist (see site 8 below), located on a flat stretch of ground on an undulating moorland at Loch Alvie. Within the moorland the cairn is also accompanied by several field clearance heaps. The cairn measures 4.7m in diameter and 0.3m high. Occasional kerb stones are visible to the west and south of the asset.</p> <p>The remains of the cairn could not be identified during a site walkover and details on the HER highlight that this may be in part due to the possible destruction of the asset during the construction of the A9. The asset may represent potential insights into prehistoric ritual activities in this area overlooking Loch Alvie. As a result of the tentative nature of the asset and its current</p>	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						existence, the asset has been assigned a Medium value.		
8	MHG44891	NGR 286119 809850	Cist	HER	Loch Alvie	<p>The asset comprises of a probable cist which is possibly associated with a cairn located at the same location (see site 7 above). The cist appears to have been disturbed and comprises of eight rounded boulders which enclose an area of 0.4 by 0.3m and two flat slabs which may have been capstones.</p> <p>The remains of the cist could not be identified during a site walkover and details on the HER highlight that this may be in part due to the possible destruction of the asset during the construction of the A9. The asset may represent potential insights into prehistoric ritual activities in this area overlooking Loch Alvie and contribute to our understanding of Prehistoric burial practices. As a result of the tentative nature of the asset and its current existence, the asset has been assigned a Medium value.</p>	Prehistoric	Medium
9	MHG44892	NGR 286119 809850	Cairnfield	HER	Loch Alvie	A Cairnfield is also located in the area which has been	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>associated with both the burial cairn (site 7) and cist (site 8). The cairnfield consists of up to 15 field clearance cairns which have a maximum diameter of 4m and stand at a height of c.0.4m.</p> <p>The remains of the cairnfield could not be identified within the boundary of the proposals during a site walkover. Details on the HER highlight that this may be in part due to the possible destruction of the asset during the construction of the A9. The asset may present potential insights into prehistoric ritual activities in this area overlooking Loch Alvie. As a result of the tentative nature of the asset and its current existence, the asset has been assigned a Medium value.</p>		
10	MHG4431	NGR 286380 809889	Ring Cairn	HER	Loch Alvie	The site consists of a ring-cairn that is located on a broad shelf overlooking Loch Alvie. The asset measures 12.3m in diameter. Around the northern half of the cairn the inner kerb is well preserved. It has also been noted that much of the cairn infill still survives and the	Prehistoric (Bronze Age)	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>sub-surface archaeological material may still be in a state of good preservation.</p> <p>The remains of the well-preserved Bronze Age ring-cairn, do not appear to have been impacted on during the original construction of the A9. The value of the asset has been assigned as Medium due to its preservation and potential for the central/interior elements to have survived. If this is the case, the survival of these remains would contribute to our knowledge of Prehistoric burial practices.</p>		
11	MHG40202	NGR 286380 809889	Hut Circle	HER	Loch Alvie	<p>The possible remains of a hut circle measuring c.16m in diameter were located at Loch Alvie. The asset is defined by a grassed bank of rubble stones that are spread to 3.5m around the northern arc of the circle. It has been noted that a depression located in the eastern extent may indicate an entrance to the structure.</p> <p>The remains of the possible well-preserved Prehistoric hut circle, does not appear to have been impacted on during the</p>	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						original construction of the A9. The value of the asset has been assigned as Medium due to its preservation and potential links to adjacent funerary features. The proximity between the dwellings and funerary monument could contribute to our understanding of the inhabitants who built these monuments.		
12	MHG40203	NGR 286380 809889	Clearance Cairn	HER	Loch Alvie	A clearance cairn comprising of a round earthen-clad stony bank is situated on a shelf overlooking Loch Alvie in the south and the A9 corridor directly to the north. The area contains three or four stony mounds which are located close to site 11 (above). These have been noted as possibly being associated with contemporary stone clearance heaps. The proximity between these mounds and known funerary monuments could contribute to our understanding of the construction methods associated with these funerary structures.	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
13	MHG4430	NGR 286399 809900	Field System	HER	Loch Alvie	A post-medieval field system which is possibly associated with a nearby depopulated settlement (site 14 below) is located on the shores of Loch Alvie. A survey conducted in 1986 found that the field system was possibly dated of at least two periods. Stress was also placed on the assets survival due to its possible destruction due to the construction of the road.  With this asset the potential exists to expand on the knowledge of a small rural community possibly dating to the 19 <sup>th</sup> century or earlier The value of the asset has been assigned a Low value.	Post medieval or Modern	Low
14	MHG41946	NGR 286399 809900	Settlement	HER	Loch Alvie	The asset comprises of the remains of possible post-medieval field systems associated with the remains of a small settlement located on the shores of Loch Alvie. The township was shown to contain four unroofed buildings and one enclosure on the 1 <sup>st</sup> edition Map of 1874. It was noted on HER that the settlement went through at least four	Post medieval or modern	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>construction phases and the associated field system had been assessed as relating to at least two periods. The township no longer exists on the current edition of the OS 1:10000 map.</p> <p>The potential exists to expand on the knowledge of a small rural community possibly dating to the 19<sup>th</sup> century or earlier</p> <p>The value of the asset has been assigned a Low value.</p>		
15	MHG3127	NGR 286409 810150	Cairn	HER	Ballinuig	<p>An overgrown stony mound measuring 8.0m in diameter and standing at a height of 0.6m is located at Ballinuig. It has been assessed that the mound is a possible prehistoric cairn, but this classification remains uncertain on the HER.</p> <p>This asset may be an aspect or related to the known prehistoric cairn field to the south. Due to the potential of buried prehistoric remains and the potential for preservation, the asset has been assigned a Medium value</p>	Prehistoric	Medium
16	MHG25000	NGR 287399 810040	Settlement	HER	Loch Alvie	<p>The area contains the remains of twelve or more rectangular structures which are located on</p>	Undated	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>a gentle slope leading down to the shores of Loch Alvie.</p> <p>Due to the asset being assessed as a possible settlement site with surviving structural surface remains the potential for the survival of archaeology in the sub-surface material is high.</p> <p>With this asset the potential exists to expand on the knowledge of a small rural community possibly dating to the 19<sup>th</sup> century or earlier This asset has been assigned a Low value.</p>		
17	MHG26438	NGR 287130 810339	Building	HER	Druim Mhor, Loch Alvie	<p>The remains of a building at Druim Mhor, Loch Alvie was highlighted by RCAHMS in 1996. The structure was identified as a single unroofed building which is marked on the 1<sup>st</sup> edition OS map of 1874 but is not shown on the modern editions.</p> <p>The potential sub-surface remains of a post medieval farmstead. The structure is no longer visible as above ground remains, however may survive sub-surface. As a result, this</p>	Post medieval or Modern	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						asset has been assigned a Low value.		
18	MHG24995	NGR 287199 810400	Military Camp	HER	WW2 Camp site	<p>This area was used by a military battalion for an encampment during WWII. It was noted that level areas on a steep hillside may represent the possible remains of hut platforms.</p> <p>Due to the nature of any surviving and temporary archaeological material, this asset has been assigned a Low value.</p>	Modern	Low
19	MHG24997	NGR 287250 810579	Burial Cairn	HER	Ballinluig	<p>The possible remains of a cairn were located at this location in Ballinluig. This asset may be an aspect or related to the known prehistoric cairn activity overlooking Loch Alvie that is prominent in this area. The asset measures 10m in diameter and seems to be encircled by four smaller clearance heaps.</p> <p>Due to the potential of buried prehistoric remains and the potential for preservation, the asset has been assigned a Medium value</p>	Prehistoric (Bronze Age)	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
20	MHG44907	NGR 287250 810579	Clearance Cairn	HER	Ballinluig	<p>The possible remains of the four clearance heaps have been recorded at this location in Ballinluig. This cairn may be related to the known prehistoric cairn that is located adjacent. The four clearance heaps are also situated close to a burial cairn (site 19).</p> <p>Due to the potential of buried prehistoric remains and the potential for preservation, the asset has been assigned a Medium value</p>	Prehistoric	Medium
21	MHG44908	NGR 287250 810579	Standing stone	HER	Ballinluig	<p>Located in close proximity to the burial cairn (site 19) at Ballinluig is a Prehistoric standing stone. The monolith stands at 1.5m in height in an area covered in thick bracken and birch trees.</p> <p>This standing stone may be an aspect or related to the known prehistoric cairn adjacent. Due to the potential of buried prehistoric remains and the important ritual and funerary nature of the monument, the asset has been assigned a Medium value</p>	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
22	MHG24996	NGR 287160 810510	Hut Circle	HER	Ballinluig	<p>The area contains the remains of two possible hut circles which are located on the southern facing slopes above Loch Alvie. Within the area are numerous clearance cairns, which measure 3-4m in diameter and stand at 0.5m in height.</p> <p>The hut circles likely identify with the prehistoric ritual and funerary element surrounding. As a result, the remains could reveal a wealth of information regarding the construction aspects of the surrounding sites. As a result, the asset has been assigned a Medium value.</p>	Prehistoric	Medium
23	MHG24998	NGR 287049 810609	Stone Alignment	HER	Ballinluig	<p>A double row of stones are located at Ballinluig measuring 20m in length, running north-south along the side of a small hillock above a burn. Two further stone rows have been discovered to the east running across a modern track.</p> <p>This potential stone alignment may be a natural feature indicating natural outcrops, however its proximity to known prehistoric activity may</p>	Undated	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						highlight a ritual/funerary aspect. As a result, the asset has been assigned a Medium value.		
24	MHG26439	NGR 286940 810699	Enclosure	HER	Ballinluig	<p>Within a modern fence at Ballinluig is a stone built enclosure measuring 15m by 30m. The large enclosure area contains two structures within its boundaries. Located outside of the enclosure are footings for a further two more structures.</p> <p>The enclosure likely relates to the original Ballinluig farmstead, as a result the asset has been assigned a Low value.</p>	Undated	Low
25	MHG45040	NGR 286929 810719	Burnt Mound	HER	Ballinluig	<p>The asset comprises of the possible remains of a small burnt mound located in close proximity to a stream at Ballinluig.</p> <p>This feature may relate to known prehistoric activity in the area, however these assets can also date through to the Medieval period and beyond. Due to the lack of material culture generally encountered within these types of features, the asset has been assigned a Medium value due to the</p>	Undated	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						known Prehistoric activity in the area.		
26	MHG24999	NGR 286929 810719	Structure	HER	Ballinluig	<p>Located in close proximity to the burnt mound (site 25) are the footings of a small structure measuring 2m by 5m. Located at Ballinluig these assets were discovered in 1999.</p> <p>This feature likely relates to the nearby farmstead remains and as a result have been assigned a Low value.</p>	Undated	Low
27	MHG14320	NGR 287109 810750	Cup Marked Stone	HER	Ballinluig Farm	<p>The asset comprises of a large worked stone located on the top surface of a natural outcrop located at Ballinluig Farm. The stone has been decorated with 25 perforated cup marks. The surface on which the cup marks occur slants downwards to the south and boulder is made of schist.</p> <p>Also within this area are several assets that may be associated with the stone and point to a prehistoric date. In close proximity is the possible remains of a turf dyke, an ancient wall, an enclosure and two possible house sites. There</p>	Prehistoric (Bronze Age)	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						are also a number of clearance heaps located in the area. This asset likely identifies as prehistoric rock art and due to the scarcity of the asset and magnitude of the markings the asset has been assessed as Medium Value.		
28	MHG4697	NGR 287346 809467	Hotel	HER	Lynwilg Hotel	Lynwilg Hotel is reputed to be one of the oldest inns in the Spey Valley and is believed to have been constructed in the 1700's. The current Hotel, which is still in operation, also appears to have been extended in the 1800s. It has now been renamed as the Rowan Tree Country Hotel. This asset has been assigned a Low value due to its modest and speculative historical association.	Undated	Low
29	MHG32783	NGR 287450 809548	House	HER	Ballinluig Cottage	Ballinluig Cottage is an example of a sleeper built house. Nothing remains of the structures surface remains but evidence may still survive of the buildings foundations. This asset has been assigned a Low value due to the scarcity of	Undated	Low

						this once common structure found within this area of the Highlands.		
30	HES number LB253	NGR 288601 809782	Mansion	Designated (category B)	The Doune, Rothiemurchus	<p>The Doune, Rothiemurchus is a Category B Listed Building which consists of a large estate house that has gone through several construction periods, between the late 17<sup>th</sup> and mid-19<sup>th</sup> centuries.</p> <p>The south facing principle block was built in 1780-1813 and comprises of two storeys with five bays. An addition to the rear, and constructed at a right angle is a late 17<sup>th</sup> – early 18<sup>th</sup> century house comprising of three storeys and seven bays.</p> <p>This is the family home of the Grants of Rothiemurchus. The house contained a re-set date stone of 1598 which originated at the Dell of Rothiemurchus.</p> <p>Due to the historical association with the Grants of Rothiemurchus and elements of the structure originally dating to the 17<sup>th</sup> century, the asset has been assigned a Medium value.</p>	17th century	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
31	HES number SM9336	NGR 288617 809885	Motte	Designated (SM)	Doune Motte	<p>The Doune Motte is an elongated mound traditionally held to be the site of a castle belonging to the Comyn family. The mound is a natural fluvio-glacial hillock rising above the flat floodplain of the River Spey and close to a crossing point. At some point in the past the hillock has been sculpted to provide a flat top and a flanking ditch with access causeway approaching from the north by north-east. It is possible that the former castle, whose existence is not well documented, may have replaced earlier structures on the same site. The flat summit was once again levelled in the 19<sup>th</sup> century, removing all visible traces of early remains. There is a high possibility that considerable sub-surface archaeological material potential may survive.</p> <p>The designated asset is of national importance as the early residence of one of Scotland's leading families, and for the potential it contains for evidence relating to medieval</p>	Medieval	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						and possibly earlier fortified settlement. This asset is a Scheduled Monument and taking into consideration the possible contributions to research themes and filling gaps in our knowledge of the Medieval period in this area of the Highlands, this asset has been assessed to be of High value.		
32	HES number LB254	NGR 288577 810045	Cottages	Designated (category B)	The Doune Farm Cottages	Constructed in 1800-10, the Doune Farm Cottages are Category C Listed buildings consisting of an east facing U-shaped plan single storey range of cottages. The building has been constructed with harl pointed rubble and tooled rubble dressings. The Duchess Elizabeth Grant wrote in her memoirs that the house once belonged to the local griever. This asset has been assigned a Medium value due to its historical associations with the Grant family.	19th century	Medium
33	MHG30057	NGR 288479 810420	Military Road	HER	General Wade's Military Road	The area contains a section of General Wade's Military Road. The section measures 360m long in a south-westerly to	17th century	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>north-easterly direction. No trace of the road is apparent and the line of this road has been recorded as a cropmark site. There is uncertainty about whether the most south-westerly portion of the supposed road would have been suitable for road construction due to the steepness of the riverbanks.</p> <p>The Military Road was constructed in the wake of the Jacobite risings, principally for moving troops quickly across the Highlands. The asset generally has the potential to contribute to research themes analysing Scottish and British identities around this time of upheaval.</p>		
34	MHG23952	NGR 288359 810599	Bridge	HER	Easter Lynwilg Bridge	<p>The Easter Lynwilg Bridge is a concrete construction which currently carry's the current A9 across Alt-na-Criche river.</p> <p>The structure has been assigned a Negligible value as it has no architectural or historical note.</p>	Post medieval	Negligible
35	MHG26437	NGR 288100 810660	Farmstead	HER	Lynwilg Farm	<p>Lywilg Farm comprises of a large farmstead, comprising of six roofed buildings, three of</p>	Post medieval	Low

						<p>which surround a courtyard, one unroofed building and three enclosures. The buildings and enclosures are depicted on the 1<sup>st</sup> edition OS map of 1874. Only four roofed buildings and six enclosures are shown on the modern OS map.</p> <p>The farmstead was home to the Cumming family during the early 1800s. The family formed a large part of the local society as for generations they operated the local shop and later the hotel. The farm expanded in the 1860s with the tenancy being taken over by a famer from Banffshire. It was also recorded that a local schoolhouse also stood at this location in the 1890s.</p> <p>The current Lynwilg Farm occupies a number of these structures, as a result of the potential association with a late 19<sup>th</sup> century farmstead occupying the site of an earlier structure the asset has been assigned a Low value.</p>		
36	MHG33497	NGR 288139 810800	Building	HER	Lynwilg	The remains of a building located at Lynwilg are located on a steep slope above a	Modern	Negligible

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>modern road which has been cut into the bank behind. The remains of the house stand at 1m in height with the front of the building only reaching 0.3 m high. Much of the buildings stone material has tumbled down the hill. About 200m away from the building is a spring or well which may have been used as the closest water source.</p> <p>Due to the lack of evidence on the ground and the uncertain nature of the assigned location of this asset, a Negligible value has been assigned to the asset.</p>		
37	MHG51431	NGR 287959 810803	Ford	HER	Ford northwest of Lynwilg Farm	<p>The ford northwest of Lynwilg Farm is reached by a sunken trackway. Although a substantial construction the ford is not marked on the OS maps.</p> <p>Due to the lack of indication on the 1<sup>st</sup> edition Ordnance Survey mapping of this crossing point, this likely relates to a modern construction and as a result the asset has been assigned a Negligible value.</p>	Modern	Negligible

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
38	MHG51370	NGR 287874 810809	Fank, Sheep Fold	HER	Site of sheep fank northwest of Lynwilg Farm	<p>The site of the sheep Fank, northwest of Lynwilg Farm is visible on the 1<sup>st</sup> edition OS map. The map highlights one roofed building with a small attached enclosure at this location. The 2<sup>nd</sup> edition map does not show the building but instead two conjoined rectangular enclosures. This is located at the west end of an area of a former improved and enclosed field. A walkover survey in 2007 confirmed that the only structure now visible is the remains of a rough concrete sheep dip.</p> <p>Due to the lack of surviving upstanding elements and the concrete construction indicating a relatively late date for construction or alteration, the asset has been assigned a Negligible value.</p>	Post medieval	Negligible
39	MHG51369	NGR 287752 810880	Shelter	HER	Site of temporary structures northwest of Lynwilg Farm	<p>During a walkover survey in 2008, two structures were identified within a grassy loop of the stream bed northwest of Lynwilg Farm. These structures have been assessed as possibly contemporary with the artificial straightening of the stream.</p>	Post medieval	Negligible

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						They also have been interpreted as being temporary structures which may be associated with a nearby farm. The structures may not be of great age, and appear to contain a short section of wooden seat, however this may indicate re-use of an older structure. Due to, their proximity to the farm and positioning within the dry stream bed suggests some other form of temporary structures. As a result, the asset has been assigned a Negligible value.		
40	MHG51433	NGR 289360 810360 (centred)	Bank (earthwork), Dyke, Flood Defences	HER	Flow dyke around loop of River Spey south of Aviemore	The asset consists of a substantial stone and rubble dyke that runs parallel to the river edge all around the loop of the Spey, south of Aviemore. It has been determined that the asset may have been constructed in the 18 <sup>th</sup> century as it can be seen clearly marked on the 1 <sup>st</sup> edition OS map. Due to the assets practical use and possible alterations and additions, the asset has been assigned a Negligible value.	18th century	Negligible

						<p>alignment to the east of the asset is the original alignment which probably dates from 1862.</p> <p>The asset has been assigned a Low value, due to its potential association with the Railway and its relatively modern construction.</p>		
47	HES number LB256	NGR 290034 811157	Church	Designated (category B)	Episcopal Church of St John the Baptist and Burial Ground	<p>Designed and built in 1929-30 by J Ninian Comper is a simple aisle-less cruciform church which sits at an orientation of east to west. A simple burial ground surrounds the church.</p> <p>The asset has been assigned a Medium value due to its designated status, its architectural merits but also its historical association with the Grants of Rothiemurchus.</p>	Modern (20th century)	Medium
48	MHG32785	NGR 289140 811269	House	HER	Birch View Cottage	<p>The asset consists of a sleeper built house constructed in 1927 as a two-apartment cottage. The structure is of total sleeper construction including all partition walls, with a roof clad with corrugated iron. Although the house is over sixty years old the structure is still in a state excellent condition.</p>	Modern (20th century)	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						This asset has been assigned a Low value due to the scarcity of this once common structure found within this area of the Highlands.		
49	MHG3128	NGR 289200 811300	Road	HER	Aviemore	<p>During a walkover survey in 2007, surviving sections of the 19<sup>th</sup> century coach road were observed at the top bank immediately west of the cut-off the new B9152. Cross sections of General Wade's Military Road were also measured at seven trenches cut across the road line. This asset has been assigned a Medium value.</p> <p>The Military Road was constructed in the wake of the Jacobite risings, principally for moving troops quickly across the Highlands. The asset generally has the potential to contribute to research themes analysing Scottish and British identities around this time of upheaval.</p>	18th century	Medium
50	MHG32784	NGR 289090 811349	House	HER	March Cottage	The March Cottage comprises of a sleeper built house located on the southern outskirts of Aviemore.	Modern (20th century)	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						This asset has been assigned a Low value due to the scarcity of this once common structure found within this area of the Highlands.		
51	HES number LB48029 MHG30511	NGR 289404 811691	House	Designated (category C) & HER	Pine Bank (formerly Craigellachie House)	Pine Bank House was constructed during the late 19 <sup>th</sup> to early 20 <sup>th</sup> century. The building is located on the southern extent of the town of Aviemore. The house was extended to the rear in the late 20 <sup>th</sup> century and comprises of a single storey six bay gabled villa designed in a Highland Estate style. It is constructed from coursed, snecked, roughly squared rubble with stugged and droved ashlar dressings. The building retains much of its original character.  The asset has been assigned a Low value, due to its designation and the retention of much of its original character.	19th century	Low
52	MHG22661	NGR 289499 811700	Bridge	HER	Aviemore, Old and New Bridge	The foundations for the Old and New bridge in Aviemore were laid in 1884 and it was opened in 1885 by Lady Grant of Rothiemurchus. The bridge	19th century	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>functions as a crossing point of the River Spey just south of the town of Aviemore. A plaque on bridge is inscribed 'Constructed by the Tees Side Iron &amp; Engine works Co. Ltd. Engineers, Middlesboro' on Tees'.</p> <p>Due to the historical associations of the bridge and its links to the Grant family, the asset has been assigned a Low value.</p>		
53	HES number SM9337	NGR 290149 811728	Enclosure	Designated (SM)	Rothiemurchus, Palisaded enclosure to NW of Dell Farm	<p>The remains of a palisaded enclosure and a settlement site of later prehistoric date are located north-west of Dell Farm at Rothiemurchus. Due to the large area the asset occupies it is normally only visible from the air as a difference in crop growth. The enclosure lies on a slight rise on relatively level ground, probably a post-glacial terrace of the River Spey. It measures about 55m to 60m across and is a near circular oval plan. The surface of the monument has been ploughed flat but there is still good potential for the survival of sub-surface remains. It has been</p>	Prehistoric (Iron Age)	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>assessed that the enclosure possibly encompasses at least two round houses with internal diameters between 10m and 12m. A number of indeterminate cropmarks have also been discovered scattered across the field.</p> <p>Due to the potential for sub-surface remains surviving and the contribution to our understanding of Prehistoric enclosed settlements, this asset has been assigned a High value.</p>		
54	MHG49319	NGR 289356 811804	Church	HER	St Aiden's Church	<p>St Aiden's Church is thought to date to the early 20<sup>th</sup> century although its exact build date is unknown. The church is constructed to an unusual T shape whose south-east end is dominated by a large main window which contains coloured and decorated panes. Very little detailed information is supplied for this church on the HER.</p> <p>Due to the relatively modern date and the lack of any known historical connections this asset has been assigned a Low value.</p>	Modern (20th century)	Low

						value of the asset has been assigned a Low value.		
104	HES number SM889 MHG3129	NGR 289687 813476	Cairn and Stone Circle	Designated (SM) & HER	Aviemore Chambered Cairn and Standing Stone	<p>The assets comprises of Clava-ring Cairn which is now surrounded by a relatively modern housing development. There is very little cairn material left, and the central area seems to have been disturbed. The outer kerb is almost complete with a diameter of 42' and has slight traces of a bank against the outside. There were only three outer monoliths surviving in 1966. Four were noted in 1957, while seven were noted in 1877.</p> <p>The asset has the potential to provide a significant contribution to our understanding of the past, in particular the design, construction and use of burial and ceremonial monuments. It retains its field characteristics to a marked degree including the surviving structural form of the outer kerb of the cairn and remains of the stone circle. As a result, the asset has been assigned a High value.</p>	Prehistoric (Bronze Age)	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
105	MHG25002	NGR 288899 813871	Saw Mill	HER	Milton, Aviemore	The asset comprises of a sawmill which was possibly in use during WWII. The mill extends to the Milton Burn. Due to the potential for contribution to our understanding of local rural industry in the area at this transition, the asset has been assigned a Low value.	Modern (20th century?)	Low
106	MHG 32763 & MHG44805	NGR 289329 813685	Cup Marked Stone	HER	Milton Wood	Situated beside the Aviemore Orbital path is a cup marked stone. The asset was located 30m north of 'sheep creep' underpass and 30m south of a fence line crossing the path. This has been assigned a Neolithic date in the HER, but cup marked stones are more traditionally associated with the Bronze Age. Due to the rarity of this type of prehistoric art and the lack of clarity and function of monuments of this type, the asset has been assigned a Medium value.	Prehistoric (Bronze Age)	Medium
107	MHG32397	NGR 289389 813738	Grain Mill	HER	Meall Mill, Aviemore	A mill is shown on the 1 <sup>st</sup> edition OS map (1875) as part of Milton Township. It is annotated as 'Corn and Barley Mill'. The remains of this mill complex are now very	19th century	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						overgrown, but the main mill structure survives as a fairly stable roofless shell to a height of c.1.5m. Traces of mill-lades, sluices and external structures are still visible. Due to the fragmentary remains and the potential for contribution to our understanding of local rural industry surrounding the town of Aviemore, the asset has been assigned a Low value.		
108	MHG54493	NGR 289393 813740	Grain Mill Sluice	HER	Aviemore, Milton, Meall Mill	The Milton Meall Mill is associated with the mill site above (site 105). There are two sluices associated with the mill, as well as a mill pond. Due to the fragmentary remains and the potential for contribution to our understanding of local rural industry surrounding the town of Aviemore, the asset has been assigned a Low value.	19th century	Low
109	MHG26442	NGR 289401 813800	Township	HER	Milton	Milton is a township comprising of two unroofed, one partially roofed, two roofed buildings one of which is annotated as a corn and barley mill (site 101 above) and two enclosures which are depicted on the 1 <sup>st</sup> edition OS 6-inch map. Two unroofed and three roofed	Unknown	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						buildings are shown on the 1986 map. The area has now been developed and built over. Due to the lack of potential for survival of upstanding remains the asset has been assigned a Low value.		
110	MHG54494	NGR 289229 813786	Mill, Mill Pond, Sluice	HER	Aviemore, Milton	A roofed building is annotated as a 'corn and barley mill' on the 1 <sup>st</sup> edition 6-inch OS map at this location. There is a sluice and a pond shown on the maps as well. The area has since been developed and these assets have been built over. Due to the lack of potential for survival of upstanding remains the asset has been assigned a Low value	Unknown	Low
111	MHG33490	NGR 289233 813802	Sluice	HER	High Burnside	The High Burnside Sluice is probably associated with site 110 above. Due to the lack of potential for survival of upstanding remains the asset has been assigned a Low value	Post-medieval	Low
112	MHG33489	NGR 289230 813805	Mill Dam	HER	High Burnside	A post-medieval mill dam is located at High Burnside. No further information is available on HER for the asset. Due to the lack of potential for survival of upstanding remains the asset has been assigned a Low value.	Post-medieval	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
113	MHG26441	NGR 289599 814099	Township	HER	Easter Aviemore	A township comprising of five unroofed, twenty-one roofed buildings and six enclosures is depicted on the 1 <sup>st</sup> edition OS 6-inch map at this location. Fourteen roofed buildings are shown on the 1986 map. The site was visited in 2011 and a number of features, including rig and furrow and a corn kiln were located. Due to the potential for survival for subsurface remains relating to this township and the potential to contribute to our understanding of the sparse population across the Highlands at this period, the value of the asset has been assigned as Low.	Uncertain	Low
114	MHG32764	NGR 289256 814006	House	HER	High Burnside, Forest Cottage	The High Burnside Forest Keeper's Cottage is located on the Reidhaven estate. The building was later destroyed by fire and only the two gable ends and walls survive. Unfortunately the roof of the structure was completely destroyed. Due to the lack of survival for any evidence relating to the original structure, the value of the asset has been assessed as Negligible.	Post medieval	Negligible

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
115	MHG33478	NGR 289294 814044	Poultry House	HER	High Burnside, Forest Cottage	A possible henhouse was located near to the Keepers Forest Cottage during a walkover survey in 2003. The poultry house is most probably associated with the High Burnside Forest Cottage. Due to the lack of survival for any evidence relating to the original structure, the value of the asset has been assessed as Negligible.	Post-medieval	Negligible
116	MHG33488	NGR 289336 814102	Midden	HER	High Burnside	A large midden containing stones, metal wire, buckets, barbed wire and glass was located during a walkover survey in 2003 at this location. Due to the poor contextual associations related to a deposit of this type, the value of the asset has been assessed as Low.	Post-medieval	Low

						at this location. Due to the lack of survival for this element of the possible township the asset has been assigned a Negligible value.		
143	MHG24887 & EHG85	NGR 289720 814889	Enclosure	HER	Shunem	A low banked structure was located during a walkover survey in 1996 at Shunem. The enclosure survives to a height of 0.3m and comprises a structure or enclosure measuring 8.0m by 20m to the north of a small stream which is immediately west of the A9 . Due to the nature and use for these buildings and the potential to infer information regarding an early township in the 18 <sup>th</sup> century, the asset has been assigned a Low value.	Post medieval (19th century?)	Low
144	MHG24885 & EHG85	NGR 290070 815389	Road	HER	Allt na Criche	This site is marked as a Military Road and has been bisected by a new access road for the A9. The northern stretch lies within a birch woodland and is 6m broad. The southern stretch of road appears as a 6m broad farm track which is occasionally flanked by either walls or ditches.	Post medieval (18th century)	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						The Military Road was constructed in the wake of the Jacobite risings, principally for moving troops quickly across the Highlands. The asset generally has the potential to contribute to research themes analysing Scottish and British identities around this time of upheaval. As a result of the potential for preservation of elements of the road in this location, the asset has been assigned a Medium value.		
145	HES number SM899 MHG4647 & EHG745	NGR 290780 815503	Cairn and Stone Circle	Designated (SM)	Loch nan Carraigean chambered cairn and stone circle	The asset comprises of an impressive Clava Ring-Cairn which is in an excellent state of preservation despite some interior disturbance. The asset is located at Loch nan Carraigean. The kerb of stone around the edge of the asset is almost complete. Surrounding the cairn is a circle of monoliths which are now represented by two prostate slabs, part of another and four hollows which possibly indicate the former positions of removed stones. The asset has the potential to provide a significant contribution to our	Prehistoric (Bronze Age)	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						understanding of the past, in particular the design, construction and use of burial and ceremonial monuments. It retains its field characteristics to a marked degree including the surviving structural form of the outer kerb of the cairn and remains of the stone circle. As a result, the asset has been assigned a High value.		
146	MHG4682	NGR 290636 815633	Hut Circle	HER	Loch Nan Carraigean, hut circles	A number of hut circles are located to the north of an area of field systems at Loch Nan Carraigean. This asset lies on either side of a tributary burn flowing into Loch nan Carraigean. There are around five oval structures in total, defined by stone walls spread to between 2.5m and 3.0m. These hut circles likely identify with the prehistoric ritual and funerary element surrounding. As a result, the remains could reveal a wealth of information regarding the construction aspects of the surrounding sites. As a result, the asset has been assigned a Medium value	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
147	MHG40377	NGR 290636 815633	Field System	HER	Loch Nan Carraigean, field system	A field system associated with a number of structures is located at Loch Nan Carraigean. The field system is defined by clearance heaps and an occasional field wall and lynchet which form plots averaging around 25m by 20m. These field systems likely identify with the prehistoric structures, ritual and funerary element surrounding. As a result, the remains could reveal a wealth of information regarding the construction aspects of the surrounding sites. As a result, the asset has been assigned a Medium value	Prehistoric	Medium
148	MHG4690	NGR 290800 815603	Mound	HER	Loch Na Carraghean, mound	The asset comprises of a grass covered mound located on the east side of Loch na Carraghean. Reported to consist of two circular grass covered mounds measuring 40ft and 50ft in diameter. Although these assets might relate to nearby known Prehistoric activity, the poor records regarding the true location cause difficulty in corresponding this relation. As a result, the asset has been assigned a Low value.	Prehistoric	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
149	MHG4674	NGR 290803 816109	Enclosure	HER	Avielochan, enclosure	The remains of two oval enclosures, 5.0m apart are located at Avielochan. Each is defined by a stone wall spread to around 2.4m. They appear similar in respect to hut circles, although no entrances are evident. There are no associated field systems. These enclosures likely identify with the prehistoric structures, ritual and funerary element surrounding. As a result, the remains could reveal a wealth of information regarding the construction aspects of the surrounding sites. As a result, the asset has been assigned a Medium value	Prehistoric	Medium
150	MHG24849 & EHG171	NGR 290690 816359	Building	HER	Avielochan	A drystone built structure measuring 10m by 3.0m was found during a walkover survey in 1996 at Avielochan. The walls of the structure survive to a height of 0.6m. The fragmentary remains of an enclosure were visible running to the west. Due to the nature and use for these buildings and the potential to infer information regarding an early township in the 18 <sup>th</sup> century,	Post medieval	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						the asset has been assigned a Low value.		
151	MHG22608 & EHG171	NGR 290290 816320	Bridge	HER	Avielochan Bridge	A substantially collapsed bridge was located during a walkover survey in 1996 at Avielochan. The bridge lies on the route of the military road, which at this point is 4.0m wide. A 1.5m wide span of the bridge does still survive. The Military Road was constructed in the wake of the Jacobite risings, principally for moving troops quickly across the Highlands. The asset if related to the Military Road generally has the potential to contribute to research themes analysing Scottish and British identities around this time of upheaval. As a result, the asset has been assigned a Low value	Post medieval	Low
152	MHG34111 & EHG171	NGR 290379 816390	Unenclosed settlement	HER	Avielochan	Two rectilinear structures measuring 4.0m by 3.0m and 7.0m by 3.0m were located on a walkover survey in 1996 at Avielochan. The structures survive as grassed covered stony banks which survive to a height of 0.4m. To the southwest a further structure is	Post medieval	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						located which has an attached enclosure. Due to the nature and use for these buildings and the potential to infer information regarding an early township in the 18 <sup>th</sup> century, the asset has been assigned a Low value.		
153	MHG24863	NGR 290350 816450	Road	HER	Avielochan	Although the asset has been noted as a road no detailed information about this site is given on the HER. The asset has been assigned an Unknown value as the importance of the site has not and could not be ascertained.	Unknown	Unknown
154	MHG24846 & EHG171	NGR 290230 816570	Cairn	HER	Avielochan	A circular bank of stony material was located during a walkover survey in 1996 at Avielochan. The cairn measured 7.5m in diameter and survived to 0.3m in height. There were no breaks in the bank and earth fast stones were located on the outer edge. It is noted that the asset could possibly be a ring cairn. 3.0m to the south is large boulder which contains two clusters of 4 cup marks. This likely identifies with the prehistoric structures, ritual and	Bronze Age	Medium

						have been deconstructed. It is composed of a circular bank of stony material with some earth fast stones visible to the east and south sides. It measures 8.0m in diameter and 0.3m high). Due to the potential of buried prehistoric remains and the important ritual and funerary nature of the monument, the asset has been assigned a Medium value		
157	MHG34342	NGR 290519 816700	Bridge	HER	Avielochan Bridge	The asset comprises of Avielochan Bridge. The bridge is located on the line of the old military road and its construction may have be associated with it. The bridge was described as 'broken down' in 1938. The Military Road was constructed in the wake of the Jacobite risings, principally for moving troops quickly across the Highlands. The asset if related to the Military Road generally has the potential to contribute to research themes analysing Scottish and British identities around this time of upheaval. As a result, the asset has been assigned a Low value.	Post medieval (18th century?)	Low

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
158	MHG24848 & EHG171	NGR 290620 816730	Unenclosed settlement	HER	Lochside	An un-enclosed settlement was located during a walkover survey in 1996 lying in an area of raised marginal ground within an arable field at Lochside. The main feature of the settlement was a corn drying kiln attached to a barn to the southeast. Further to the southeast of the kiln lay the remains of a structure or possibly an enclosure. Due to the nature and use for these buildings and the potential to infer information regarding an early township and rural industry in the 18 <sup>th</sup> century, the asset has been assigned a Low value.	Post medieval	Low
159	MHG24845 & EHG171	NGR 290340 816800	Building	HER	Balnabruich	Remains of a sub-rectilinear structure were located during a walkover survey in 1996 at Balnabruich. The structure measures 4.5m by 2.5m and survived to 0.3m in height. The HER has assigned this structure as a Neolithic date, however the original survey highlights a potential early Modern date. Due to the nature and the use for the structure and cairn and the potential for insight into	Prehistoric (Neolithic)/ Modern	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						either early Prehistoric and/or early Modern human activity in these remote areas of the Highlands, the asset has been assigned a Medium value.		
160	MHG41512 & EHG171	NGR 290340 816800	Cairn	HER	Balnabruich	The asset comprises of a well-constructed cairn which was located during a walkover survey in 1996 at Balnabruich. The asset measures 1.5m in diameter and stands at a height of 1.5m. The cairn lies in a rough pasture next to the A9. Immediately south of the cairn was a stony spread which was apparently the remains of a sub-rectilinear structure (see site 159). Due to the nature and the use for the structure and cairn and the potential for insight into either early Prehistoric and/or early Modern human activity in these remote areas of the Highlands, the asset has been assigned a Medium value.	Uncertain (Prehistoric) /Modern	Medium
161	MHG4646	NGR 290530 816890	Cairn	HER	Cairn with finds, Avielochan	A cairn was known to have existed at this location until it was ploughed up in 1910. After the event local farmer, Mr Macintosh, discovered a pin under one of the stones which	Medieval	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						was four inches long with a flat round head with projecting shoulders. Originally dated to the Viking period, a more recent assessment of the pin in 1995 suggests that it more likely to be medieval being placed in the 11 <sup>th</sup> or 12 <sup>th</sup> century. This assessment is based on parallels discovered elsewhere. Although badly damaged by agricultural activities, the presence of material culture dating potentially to the Medieval period and the potential for buried sub-surface remains to survive intact, the asset has been assigned a Medium value.		
162	MHG24866	NGR 290759 817190	Military Road	HER	Laggantygown	A walkover survey in 1996 visited and traced the route of General Wade's Military Road. No visible evidence for the road was located on the ground at this location but it has been assessed that road must of came through this route.  The Military Road was constructed in the wake of the Jacobite risings, principally for moving troops quickly across the Highlands. The asset generally has the potential to	N/A	Unknown

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						contribute to research themes analysing Scottish and British identities around this time of upheaval. As a result of the lack of existence of the road in this location, the asset has been assigned an Unknown value.		
163	HES number SM4157 MHG4689	NGR 290515 817227	Fort	Designated (SM) & HER	Tor Beag Fort	The overgrown remains of a once stone walled fort on a rocky promontory are located at Tor Beag. All that remains of the inner wall of the fort is a short-tumbled stretch on either side of the entrance. The terracing which forms the second line of defence is visible for most of its periphery apart from a section on the southeast side which has been obliterated by soil creep. Both sides of the entrance have been strengthened by a boulder faced wall. To the south of the entrance is a breastwork of similar boulder faced construction. A documentary source from 1885 mentions that 'many flint arrowheads have been found in the neighbourhood'. This may indicate an early prehistoric date for the monument.	Prehistoric	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						This asset is a Scheduled Monument and taking into consideration the possible contributions to research themes and filling gaps in our knowledge of the Prehistoric period in this area of the Highlands, this asset has been assessed to be of High value.		
164	MHG24847	NGR 290720 817520	Clearance Cairn	HER	Laggantygown	<p>Two cairns were located during a walkover survey in 1996 at Avielochan Farm. The first cairn measured 3.5m in diameter and stands at 1.5m in height with the regular depression in its summit. The second cairn measured 3.0m in diameter and stood at a height of 0.7m. The assets lie to the north of a ridge within a deciduous woodland. The HHER records have assessed these assets as Neolithic in date, but they may have been constructed much later.</p> <p>The cairns have the potential to provide a significant contribution to our understanding of the past, in particular the design, construction and use of field</p>	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						systems and/or burial and ceremonial monuments. The cairns retain their original field characteristics to a marked degree including the surviving structural form and as a result the asset has been assigned a Medium value.		
165	MHG29248	NGR 291014 817331	Cemetery	HER	Laggantygown Cemetery	No precise date is given for Laggantygown Cemetery but it has been assessed that the graveyard possibly dates from the 16 <sup>th</sup> century. No further detailed information is provided on HHER. The cemetery is still currently in use and due to the local historical connections to Laggantygowan, the asset has been assigned a Low value.	16th century to 21st century	Low
166	MHG26546	NGR 290999 817399	Building	HER	Loch Vaa	An unroofed building with an attached enclosure is depicted on the 1 <sup>st</sup> edition OS map (1875) at Loch Vaa. The asset is no longer shown on the current version of the OS map. Due to the nature and use for these buildings and the potential to infer information regarding an early township in the 18 <sup>th</sup> century, the asset has been assigned a Low value.	Post medieval	Low

						has no architectural or historical note.		
210	MHG34347	NGR 283550 825770	Marker Stone	HER	Slochd Mor Stone	Slochd Mor Stone is a marker stone which stands at the junction of two tracks. The stone is unmarked but appears to be contemporary with General Wade's Military Road. The stone stands at 1.0 m in height and measures 1.0 m wide and has a depth of 0.4 m. This asset has been assigned a Low value due to its designation and its historical association with General Wades Military Road.	Post medieval	Low
211	MHG2820	NGR 283200 826300	Clearance Cairn	HER	Clearance Cairn, Carn Na Doire Leathain	Two small groups of stone clearance heaps are centred at this grid reference at Carn Na Doire Leathain. The HHER has assigned these a Neolithic date, but they may equally date to the Later Bronze Age or Iron Age. The cairns sit on a ridge at 11,450 ft. This asset has been assigned a Medium value, due to the potential to contribute and inform information on possible Prehistoric settlement/agriculture in this region of the Highlands.	Prehistoric	Medium

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
212	MHG2821	NGR 282700 826500	Field System	HER	Field System, Carn Na Doire Leathain	A field system, centred on this grid reference is located on a southeast facing hillside at Carn Na Doire Leathain. The field system comprises of stone clearance cairns and lynchets which form cultivation plots that measure around 15m square. Contemporary features may also survive in the vicinity. This asset has been assigned a Medium value, due to the potential to contribute and inform information on possible Prehistoric settlement/agriculture in this region of the Highlands.	Iron Age	Medium
213	MHG57197	NGR 282705 826656	Shooting Stands	HER	Shooting butts, Braereich, Corrybrough estate	A number of grouse butts identified on current OS mapping are located on the Braereich, Corrybrough estate. These rectangular structures appear recessed into the slope and are generally relatively well constructed with internal stone faces. They appear relatively modern in appearance and possibly still in use within the estate. Due to the lack of archaeological interest these assets have been assigned a Negligible value.	Historic	Negligible

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
214	MHG23808	NGR 282480 826320	Road	HER	Carn A'Gharbh-Choire	The asset comprises of a section the Old Coach Road from Perth to Inverness immediately north of the main railway line to Inverness that was abandoned in 1897. A section of the road was excavated in 1974 which located the original road surface and drainage ditch to the north. Due to the poor preservation of the road and the potential to contribute to our understanding of the original route, the asset has been assigned a Low value.	Post Medieval	Low
215	HES number SM11673	NGR 281959 826767	Hut Circles	Designated (SM)	Drumbain Cottage, hut circles	The scheduled monument located at Drumbain Cottage comprises of the remains of three hut circles. These designated assets are visible as low circular banks in the heather moorland. They are located on a gentle south-western facing slope to the east of the river Findhorn in Strathdearn. It has been assessed on the HER that the hut circles are likely to be Late Bronze Age or Iron Age, dating to the first or second millennium BC.	Prehistoric	High

Site number	Highland HER/Historic Environment Scotland Reference Number	Grid ref and Location	Site Type	Designation	Site Name	Description	Period	Value
						<p>Each hut circle measures approximately 10m in diameter and survives as a circular stone and earth bank measuring about 2.0m wide. Each of the assets have an entrance gap in the south-eastern quadrant. The inner and outer facing stones are visible in each hut circle, and all three have been terraced into the slope. The eastern hut circle measures about 12m in diameter. This asset survives as a stone and earth bank about 1.2m wide. Inner and outer facing stones are visible on this wall and the northern part of the interior has been terraced into the slope. The asset has the potential to provide a significant contribution to our understanding of the past, in particular the design, construction and use of burial and ceremonial monuments As a result the asset has been assigned a High value.</p>
