MOBILITY AND ACCESS COMMITTEE
FOR SCOTLAND (MACS)
Publication Scheme

February 2019
Introduction to the Publication Scheme

The Freedom of Information (Scotland) Act 2002 (FOISA) provides individuals with a right to request any recorded information held by Scotland’s public authorities. Anyone can use this right, and information can only be withheld where FOISA expressly permits it.

Section 23 of FOISA requires Scottish public authorities to produce and maintain a publication scheme, which ensures that the public bodies:

- publish the classes of information that they make routinely available, and
- tell the public how to access the information and what it might cost.

The Mobility and Access Committee for Scotland has adopted the Model Publication Scheme 2018. The publication scheme is designed to ensure that the authorities meet their obligation to take account of the public interest in providing access to the information that they hold, which, which relates to:

- the services they provide
- the costs of those services
- the standard of those services
- the facts that inform the important decisions they take, and
- The reasoning that informs their decisions.

MACS has therefore decided to publish all information which the Committee holds, which falls within the classes of the information in the scheme. This information is available on MACS website: www.macs-mobility.org.

The website is organised into topic-related sections, each of them clearly marked with a headline. Additionally on the top right, a search engine is available to allow perform more detailed information finding.

If you would like to access information not published on the website under the scheme, you can still request it under FOISA – for further information please see ‘How to access information which is not published’ section below.

Scottish Ministers on accessible transport for disabled to enable them travel without barriers.

While supported and sponsored by Transport Scotland, MACS offers its views independently of government. Equally, MACS is expected to reflect the views of disabled people and organisations representing disabled people, but it works independently of those individuals and organisations.

More about MACS’ role and remit is available on MACS website: [www.macs-mobility.org](http://www.macs-mobility.org).

The Committee has adopted the Open Government Licence for public sector information. This sets out what you can and cannot do with our published information where we are the copyright holder. Where the Committee does not hold the copyright in information we publish, we will make this clear.

**Our records management and disposal policy**

The Committee’s Secretariat is provided by Transport Scotland. Transport Scotland follows the Scottish Government’s records management process. These include Record Retention and Disposition Schedules in respect of all documents that it creates and holds. These schedules set out the lengths of time for which all types of records must be held. This means that whilst the Act is retrospective, it is only possible to provide copies of records still in existence. You can see the current Scottish Government procedures detailed in the Record Management Manual².

Some Government records are selected to be preserved at the National Records of Scotland. The Schedules referred to above set out what types of records will normally be preserved. Once transferred to the NRS, these records are public and are listed on their on-line catalogue³.

**How to access information which is not published**

Our aim in maintaining this publication scheme as to be as open as possible. You should note, however, that there might be limited circumstances where information will be withheld from publication. Information will only be withheld where FOISA expressly permits it. For example, where the information’s disclosure would breach the law of confidentiality, harm an organisation’s commercial interests, or endanger the protection of the environment. Information may also be withheld if it is another person’s personal information, and its release would breach the data protection legislation.
