

Consideration of the MTS STAG assessment together with trunk road strategies and objectives has led to the development of the following trunk road scheme specific objectives:

- Improve access and transport efficiency (economy and employment)
- Provide traffic relief on the existing congested A90 (environment and accessibility)
- Reduce traffic on urban radial routes (environment and accessibility)
- Provide access to existing and planned park and ride and rail facilities (integration)
- Increase opportunities for public transport (integration)
- Improve road safety (safety)
