

## Aberdeen Western Peripheral Route Scheme Location Plan

This exhibition is being held following the publication of Draft Road and Compulsory Purchase Orders and the Environmental Statement (ES) for the Aberdeen Western Peripheral Route. The exhibition shows the route described in these documents, which comprises:

- **NORTHERN LEG** – from North Kingswells to Blackdog
- **SOUTHERN LEG** – from Charleston to North Kingswells
- **FASTLINK** – from Stonehaven to Cleanhill

The Draft Special Road and De-Trunking Orders have been republished to comply with new European legislation which came

into effect in Scotland in February 2007. The republished Environmental Statement has been updated with more detail on environmental mitigation following the results of additional studies.

The ES and Draft Orders are available for inspection at this exhibition. The following documents are available to take away:

- A Non Technical Summary of the ES
- A scheme brochure

Officials from the Aberdeen Western Peripheral Route Managing Agent and their consultant, Jacobs, are in attendance to listen to your comments and to discuss with you any points that you may wish to raise.
