

Appendix A15.4: Predicted Residual Operational Noise Levels at All Noise Sensitive Receptors

1.1 Introduction

1.1.1 Table A15.4-1 presents the predicted residual operational noise levels at the façade of all noise sensitive building receptors within 600m of the proposed scheme. Noise levels have been predicted for the following scenarios:

- Do Minimum scenario in the opening year (DMOY 2036), assuming that the proposed scheme is not constructed.
- Do Minimum scenario in the future assessment year (DMFY 2051), assuming that the proposed scheme is not constructed.
- Do Something scenario in the opening year (DSOY 2036), assuming that the proposed scheme is constructed.
- Do Something scenario in the future assessment year (DSFY 2051), assuming that the proposed scheme is constructed.
