Welcome

In September 2025, we held public exhibitions to present the findings of the Design Manual for Roads and Bridges (DMRB) Stage 1 Assessment and asked for your feedback on early route options developed as part of the DMRB Stage 2 Assessment.

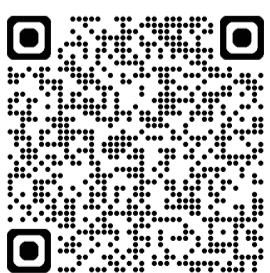

Since then, Transport Scotland and its technical advisors, Jacobs, have been progressing early DMRB Stage 2 Assessment work, taking into consideration feedback received to date and the findings of various surveys and consultations.

This exhibition presents an update on the ongoing DMRB Stage 2 design development and assessment work and we are seeking your feedback. We will take all feedback into account as we continue to develop our plans.

Please take the time to review the information on display, speak to a member of our team and provide your feedback by completing a feedback form or sending it to us after today's event.
